#### Farms Beats Village: Handsome Fund for Charity is Obtained

By JOHN E. ALLARD

Proceeds from sales of tickets and donations for the base ball game sponsored by the Grosse Pointe Village and Grosse Pointe Farms Base Ball Clubs last Sunday netted \$365.08. This amount was turned over to the Village and Farms Police and Firemen Benefit Fund immediately after the game and will be dispensed with during the Christmas period to help in making happy the needy of Grosse Pointe.

#### Children and Bi.ds

Children always find a great deal of fascination in watching the birds. If you make a sanctuary for these feathered visitors the children will be deeply interested and more than anxious to help. It's very easy-evergreens for shelter, flowers for color, berried shrubs for the birds' winter menu, and last of all a lovely bird bath. Simple, isn't it? You will find it difficult to decide who is most pleased-the children or the birds!

#### Board Will Inspect Schools: Report Cut in Budget Impossible

Inspection of school buildings and properties in Grosse Pointe by the five members of the School Board will be made next Tuesday morning, it was decided at a meeting of the Board

The School Board's tour of the School District is an annual affair and this year will be preceded by a break fast at the High School cafeteria.

The members of the Board who will make the tour of inspection are Charles A. Parcells, J. Lee Barrett Charles Poupard, Walter S. Conely and of schools, Dr. S. M. Brownell, will accompany the Board on the inspection

At the Board's meeting last Thursday evening, the School budget for the current year was affirmed after reportng as a committee of the whole that no reductions in any of the items comprising the budget were possible.

Close scrutiny and intensive examination and analysis had been given this year's budget by the Board with the hope that a reduction in the total gent; Mrs. R. V. Allman, 1st Vice Re- amount might be possible. The results Regent; Mrs. W. R. Carlin, Mrs. W. nounced at the meeting last Thursday H. L. Everard, Mrs. J. H. Mahherl, show however that no savings will be possible in the budget appropriations.

> A resolution was also passed at the Board's meeting providing for all banks in which funds of the School District are deposited to post security bonds.

#### "Bottocino Marble" The bureau of mines informs us that

Botticino marble is a cream-colored variety of Italian marble with brewn markings. This marble is popular in this country for interior decorating because of its beautiful coloring and markings. #### Uninhabited Islands

Tristan da Cunha, in the south Atlantic, is one of a group of three small islands, two of which are uninhabited. This group is believed to be the most isolated uninhabited group on earth. The two uninhabited islands are named Nightingale and Inaccessible. The Cocos, or Keeling, in the Indian ocean, includes 20 islands, some of which have no inhabitants.

#### End of the Mamelukes

The Mamelukes were slaves brought. into Egypt from the Caucasus and formed into a standing army. In 1254 the army raised one of its members to the supreme power. Mamelukes ruled over Egypt until 1517, when they were everthrown by Selim I, sultan of Turkey. The country was ruled by 25 Mameluke beys under a Turkish viceroy. In 1811 the pasha of Egypt, by a wholesale massacre, annihilated the

#### Interesting Gold Nugget

In an Australian museum is a gold nugget made into two flags, the stars and stripes and the other representing the British tri-color. These flags are probably the smallest in existence, being only half an inch in length and three-eighths of an inch wide. This trophy was so made by an Americanborn miner and was the first nugget discovered in one of the celebrated gold fields in Australia.

#### Edible Bird's Nest

The nest of the selangave is valuable as food. It is used as a delicacy byo the Chinese. It has the shape and size of a half teacup, is attached to the rock in the interior of a cave and has the appearance of fibrous gelatin. It is composed of a mucilaginous substance or isinglass, secreted by special glands, and is not, as was thought, that made from a glutinous seaweed.

#### Comprehensive Slang Word

The slang word "gadget" is applied to a thousand different things. It is a kind of generic term applied to anything. It takes the place of the old term "thing-um-a-jig"-meaning someor has temporarily forgotten.

Andorrans Stand for

Nothing "New-Fangled" It was Charlemagne, according to tradition, who gave the valleys of Andorra their sovereign independence; it was the deep snows and the high mountains that made it possible for an isolated community of 5,000 souls to retain its individuality for a thousand years; and it is the Andorrans themselves who with scythes and shepherd's crooks defend the ancient republic to-

Spain invaded Andorra-Spain, in, the person of a road gang of 400 swarthy laborers who thought that the exigencies of road building rose superior to the existing channels of telegraph and telephone communication. The Andorrans, one gathers, were not very clear as to what the Spaniards were doing, but they resented it anyway, and their seythes and crooks sent

the shovel men downhill at top speed. So the valleys remain free, and almost as roadless as before. Life is uncomfortable in Andorra, and doubtless a good macadam road would bring in its train softer beds and bigger radies and aluminum saucepans and picture postcards and all the other triumps of modern civilization. But, for our part, we rejoice in the victory of the scythe men. It elates us to think that there is still one mountain corner without good roads, where stout mountaineers, with neither cruisers nor tanks to defend them, still wield their scythes as freemen, like their ancestors a thousand years ago.-New York Herald Tribune.

#### Before Silk Stockings

Came Into Common Use Gumuchain, Parisian American book dealer, has unearthed the first silk stocking poster used in France. It is dated 1560 and was executed for "Pierre Baudeau, a merchant."

Baudeau was one of the first silk hose makers in France." The poster is 12 by 15 inches and is a finely engraved wood cut, says a United Press dispatch. It has an architectural border, composed of cupids and grotesques, holding in their arms certain objects for sale. The majority of merchandise is silk stockings. There are some hats.

In the center is an oval containing the tradesman's mark—a magpie in a tree, surmounting a circular medallion on which is the inscription "Rex et regina casi legio arag si G," proving that Baudeau was a purveyor to Philip II of Spain. The approximate date of the poster coincides with the entry of Philip II into France, where he signed the treaty of Cateau-Cambresis. Hitherto, the wearing of silk stockings had been a custom confined solely to the courts, and this poster practically dates the popularization of silk stock-

#### Caul Superstitions

The veil or caul is a little membrane encompassing the head, found on some newly born children, and forms part of the amnion or fetal membrane. Superstition makes it a good omen to the child itself and also to the person who obtains the caul by purchase. An old Scotch name for it was the "haly or sely how," meaning "holy or fortunate hood or cap." Besides having a reputation for preserving against disease it was also considered a sure preservative against drowning, and sailors bought cauls for this purpose. Brand's 'Observations on Popular Antiquities" quotes numerous authors who have mentioned the various superstitions attached to the caul. It is stated that in the primitive ages of the church this superstition was very prevalent and that St. Chrysostom inveighed against it in several of his homilies.

#### Pan's Pipes in Pyrenees

Almost in any of the mountain towns between Biarritz and Andorra in the Pyrenees of southern France, you may be awakened in the morning, and soon after dawn, too, by the piping of the goatherds. On homemade pipes, a lad and a maid will announce their arrival in the street, and the housewives will come to every door with crock or heavy brass pitcher, into which the goatherds milk their charges. It is certified milk of a kind unknown in the milk markets of the West, but prized in the Pyrenees as in many other sections of Europe. Southern France simply makes the milk man musical in addition to use-

#### Time Sky Lark's Song

Nature Magazine published the following reference to the length of the song of the wonderful British skylark. "There have been many opinions expressed as to the length of time occupied by the song of a skylark. Opinions would have been fewer and more consistent had each observer taken the trouble to time more than a thousand songs, as Noble Rollin did before writing a short paper on the subject. Variations in length occur according to the time of day, the month of the year, and the idiosyncrasy of the birds themselves, so that the range runs from one to 19 minutes. But the average length, was only 2:22 minutes."

#### Getting It Right

Little Leona was sent to the store for milk and was just given the bottle. Somehow we forgot to give her the money, so the woman at the store thought we wanted to charge it. She did not know Leona and asked her what her daddy's name was.

"Well, mother calls him 'John,' but his real name is 'daddy.' "-Indianapolis News.

#### Not Enough Boy Babies A life insurance company figures

that the number of boys born in the United States is insufficient to perpetuate family names.

#### World Wants to Know

One's Best Attainment If anyone, man or woman, knows how to bake perfect buckwheat cakes, that might be his or her life work. It is a talent as rare as painting good portraits. To quote the philosopher, "It is what life demands of us." Ah, to find that out! Psychology and psychiatry claim much, but their harvest is small.

Carlyle says, "The folly of that recept, 'Know thyself,' until it can be translated into this partially possible one: Know what thou canst work at." And again: "Hast thou a certain faculty, a certain Worth, such even as the most have not?" Therein lies the meaning of the aphorism: The world owes every man a living—if he will convince it what job he is especially suited for. It is a great, a paramount responsibility.

We are going to quote some more: Emerson—"The only gift is a portion of thyself; thou must bleed for me. Therefore, the poet brings his poem; the shepherd his lamb; the farmer, corn; the miner, a gem." But it must be something, though it be but the best buckwheat cakes in the world .--F. H. Collier, in the St. Louis Globe-Democrat.

#### Fox's Regard for Crow

Not Too Deeply Seated recent issue of a magazine pertaining to wild life, went into detail in explaining the seeming regard that Reynard the fox has for the crow, claiming as a fact that a fox will never injure a crow. But this is the story told by Peter J. Tyer, called by Lee residents, "The Saga of Frogs Land-

"When I lived at the Landing, I had several foxes as well as a pair of tame The fox run was enclosed, crows. side and top with poultry wire. It was interesting to watch these crafty animals and their method of planning in their efforts to get a hold of some of the many chickens, ducks and pigeons outside. They would carry bones and other scraps that were inside their inclosure and place them close to the wire to induce the live stock to reach for the tempting bait. Then they would lie flat on the ground apparently fast asleep, but when a head came through the mesh, make a jump for it. One day-one crow-no head."—Springfield (Mass.) Union.

#### Mackin**ac**

The place-name Mackinac is applies to the famous trading post between Lake Huron and Lake Michigan. Mackinaw, representing the Canadian French Mackinac, is identical with makinak, the word for "turtle" in Chippewa, and closely related dialects of Algonkian; said also to be a reduction of Michilimackinac, a corruption of an earlier mitchi makinak, signifying "big turtle" in Chippewa. According to Dr. William Jones, the Chippewa of Minnesota claim the word to be a shortened form of mishinimakinunk, "place of the big wounded or big lame person," This, however, may be an instance of folk-etymology. Literary Digest.

#### Treasures in Library

Buffalo public library has thousands of dollars' worth of rare books hidden away in its shelves, according to the head librarian. Many of them are under lock and key. Irreplaceable his tories of Buffalo and the Niagara frontier are included in the list. Scrapbooks of anecdotes of Grover Cleveland, Millard Fillmore and Elbert Hubbard are found alongside guide books on Niagara falls dated as far back as 1835, newspapers with 1811 date lines, and Buffalo city directories since 1828. The books are available for reference to those making a study of frontier history.

#### Fossil "Hunting Ground"

The single district where more different types of fossil remains have been found than any other is the district within the city limits of Los Angeles, Calif., known as LaBrea Pits. LaBrea is a Spanish word meaning "the tar" and these pits are so called because of a large yield of tar which comes from them, in which the remains of a large number of prehistoric animals were imbedded. Apparently the tar insnared these animals at the time it was formed and the bones are in a remarkable state of preservation in many cases.

#### Instincts of Youth Told

Prof. Olive Wheeler of Cardiff university college of Cardiff, Wales, said recently that investigation showed that the instincts that most easily got out of control in the case of boys were aggressive ones, while in the case of girls they tended to be passive, tending toward lying and attempted suicide. Professor Valentine of Birmingham said that he had found half his students confessed a tendency during adolescence to suicide in the case of girls and running away from home in the case of boys.

#### Beautiful Constellation

The Southern Cross constellation is situated near the Antarctic circle, and therefore is never visible in northern latitudes. It consists of four bright stars, to which fancy, aided by Christian associations, gives the cruciform shape. The two brilliant stars which mark the summit and foot of the Southern Cross have nearly the same right ascension, and the constellation. therefore, is almost vertical when passing the meridian so that these two stars act as pointers to the South pole.

#### Once Indian "Capital" Where the city of Washington now

stands, prehistoric Indians had a village of considerable importance, a sort of local capital for the region.

#### Rabbit's Odd Ear

A rabbit with one ear shorter than the other was killed near New Orleans. One ear was normal and the other about two inches long. It was thought that the rabbit had lost an ear and that it was growing back like the tail of a lizard.

Some Advantage

"George Sand," said Heinrich Heine, "is, indeed, as beautiful as the Venus de Milo, and has the additional advantage of being much younger."-Golden Book Magazine.

### for Elizabeth Barrett

Elizabeth Barrett was no scholar. Books were to her not an end in themselves but a substitute for living. "There are few of the youngest women in the world," she wrote, "who have not seen more, heard more, known more of society than I. who am scarcely to be called young now. I grew up in the country-I had no social opportunities, had my heart in books and potery and my experience in reveries."

She raced through folios because she was forbidden to scamper on the grass. She wrestled with Aeschylus and Plato because it was out of the question that she should argue about politics with live men and women Her favorite reading as an invalid was Balzac and George Sand and "immortai improprieties" beother cause "they kept the color in my life to some degree."

Nothing is more striking when at last she broke the prison bars than the fervor with which she flung herself into the life of the moment. She loved to sit in a cafe and watch people passing; she loved the arguments and politics and strife of the modern world. The past and its ruins, even the past of Italy and Italian ruins, interested her much less than the theories of Mr. Hume, the medium, or the politics of Napoleon.-London

#### John Wesley's Thunder

Against "Costly Silks" I conjure you all who have any regard for me, show me before I go hence that I have not labored in vain for half a century. Let me see, before I die, a Methodist congregation full as plain dressed as a Quaker congregation. Only be more consistent with yourselves. Let your dress be cheap as well as plain. Otherwise you do but trifle with God and me and your own souls. I pray let there be no costly silks among you, how grave soever they may be. Let there be no Quaker linen, proverbially so-called for their exquisite fineness; no Brussels lace, no elephantine hats or bonnets, those scandals of female mod-

It is stark staring nonsense to say, "O, I can afford this or that." No man living can afford to waste any part of what God has committed to his trust. And it is far worse than simple waste to spend any part of it on gay or costly apparel.-From John Wesley's Sermons,

#### "Johnny Appleseed"

John Chapman, who was born in Springfield, Mass., in 1775, claimed that his mission in life was to have apple trees growing in the western wilderness when the settlers arrived. It is believed that his first nursery was in a narrow valley along the Ohio river, opposite what is now Wellsburg, W Va. It is estimated that he set out more than 100 nurseries in the forests. Many of the finest orchards in the early days of Ohio and Indiana were composed of trees bought from Johnny Appleseed. He would dig the soil and plant thousands of apples, peach and pear seeds. When he had built a fence of brush around the spot to keep away grazing animals he moved on, and the arriving settlers would find and use the trees they could buy for practically nothing.

When a Girl Gets to Be 25 A twenty-fifth birthday is one thing to a man. He preens himself, fixes his biceps, expands the muscles of his chest, feels at last that he is a man, so to speak. But to a girl, and especially an unmarried girl, a twentyfifth birthday is a different matter. It is the sharp revolver shot on the last lap of youth's course. It announces, quite definitely, that the racer had better pep up her stride, for the racewill be won-or lost-within the next few minutes. Of course, youth isn't everything. . . . But it's an awful lot to a girl standing on the pinnacle

I'm not a bookkeeper and I'm 5 foot 10 in what's left of my socks, but I'm terribly curious and, having nothing else to do, I went around to the place. The boss started to wave me away, but I said, "Wait a minute! Why the 5 feet 6? 'Our bookkeeping department is located in a mezzanine gallery, sez he."-Philadelphia Bulletin.

#### Natural "Golf Balls"

Nature apparently was in a playful mood when she created some of the formations in Manti national forest, Utah. Among the most unusual specimens are scores of almost perfectly round hard-stone balls found in the soft sandstone strata, some of them two or three feet in diameter. They are known as "Goliath's golf balls," and scientists are studying them in an effort to explain their origin.-Popular

#### Odd Claims Insurance Companies Had to Pay

The strangeness of some accidents for which insurance companies have been mulcted in the past almost disrupts human belief, says an article in Pearson's Weekly (London). Take lovers, for instance. One man recently received insurance for broken ribs caused by being hugged too endearingly by his fiance. Another young "sheik" held his sweetheart on his lap until his foot went to sleep. When he rose to say good-by, his leg crumpled up under him, and he bumped himself severely. His insurance company paid for the damage. Take a quiet stroll through your neighborhood, and the same puckish spirit of disaster may be conspiring to work you grievous ill. At least, that is what an Exeter policeman must have thought recently, when some cough drops exploded in his pocket, and set fire to his clothes so effectively that the local fire brigade had to be called out in order to extinguish them. It was explained later that the tablets contained chlorate of potash, which had ignited through being rubbed against the lining of his pocket as he walked along on his beat.

#### Popular Quotation Not

to Be Found in Bible Among the many things popularly supposed to be in the Bible is the following oft-quoted saying: "The time will come when you cannot tell summer from winter except by the putting forth of the buds and the falling of the leaves." It is not in the Bible and its origin is not known, says Pathfinder Magazine. Genesis 8.22 seems to express the opposite idea: "While the earth remaineth, seedtime and harvest, and cold and heat, and summer and winter, and day and night, shall not cease." However, like a lot of other "homespun Scripture," the quotation under discussion undoubtedly was suggested by certain Biblical passages. It may have arisen originally from a wrong construction of the words attributed to Jesus in relating the parable of the fig tree. Accordto Matthew 24:32 and 33 Jesus said: "Now learn a parable of the fig tree: When his branch is yet tender, and putteth forth leaves, ye know that summer is nigh." In Luke 2:29 and 30 and in Mark 13:28 the parable is given in almost the same words.

#### Poisonous American Snakes

There are only two families of polsonous snakes in the United States, in each of which there are several species. The rattlesnake family, Crotalidae, has three genera-Crotalus, Sistrurus and Agkistrodon. Crotalus is the genus of the common rattlesnakes, of which there are about 15 species. Sistrurus is the genus of the Massasaugas, of which there are only three species. Agkistrodon is the genus of the copperhead and the water mocensin. The other family of poisonous snakes is the family of the coral snakes, Elapidae. There are only two species of this family common in the United States—the Harlequin snake and the Sonoran coral snake, both belonging to the genus Elaps.—Washing-

#### Famous Rooms Reproduced

Rooms famous in literature were a feature of the Ideal Homes exhibition held in London. They were reproduced in detail, and were visited by large crowds. There were shown the Boar's Head tavern in Eastcheap in Shakespeare's day, with Falstaff in great form; Little Dorrit's bare garret in Southwark; Sherlock Holmes' foggy Victorian room in Baker street; a drawing room from "Pride and Prejudice"; Trilby's studio, with its long sloping window overlooking the romantic roofs of somewhere near the "Boule Mich," and the hut millions have so often/pictured and longed to live in, the home of Robinson Crusoe.

#### Salaries of Presidents

The French President receives about \$152,000 a year. The President of the United States receives a salary of \$75,-000 a year with an allowance of \$25, 000 for traveling and entertainment expenses. The French President, however, is chargeable for practically all the expenses of the upkeep of his houses, as well as all services and personal charges. He is at the expense of entertaining and of traveling. The winter home of the French President is the palace of the Elysee and he has the choice for summer occupancy of several chateaux owned by the gov-

#### Chean Tea

In the days long ago when tea was too expensive for the children of agricultural laborers in Essex and Sussex, a beverage was given them made from the scalded raspings of overbaked bread called "T'owd Tea" (the Old Tea). The stimulating qualities of tea were well described by an old woman, who said: "It must be a bad complaint that a cup of tea didn't cure." In those days also poor men often smoked dried willow leaves in place of tobacco, which they could not afford to buy.-Montreal Herald.

#### More Dependable

Three weeks after buying a moderately priced dlamond for his flancee, a young man trudged disconsolately into the jewelry store and tossed a tiny box on the counter, saying:

"There's the engagement ring I bought here. I want to trade it in on a good watch-something I can put a little faith in."
