At The Theaters

By MOLLY ELGOOD WILSON THEATER

"Tomorrow and Tomorrow," a play about emotion, is the newest work by that eminent young American dramatist, Philip Barry, and will be shown Gilbert Miller in the Wilson theater,

beginning Monday, January 18. Barry, one of the most distinguished alumni of the celebrated "47 Workshop" dramatic course of Professor George Pierce Baker, is the author of "You and I," which in 1922 won him the Harvard Prize and was later his first New York production. He is also the author of "In A Garden," "White Wings," "John," "Cock Robin" in col, laboration with Elmer Rice), "Paris Bound," "Holiday" and "Hotel Universe." Barry is famous for his fine dialogue and for the civilized sophistication of his point of view.

In this latest play, he has dealt subtly with the problem of a childless woman of richly creative personality, and his portraiture is sure to attract the most serious attention.

Heading the cast are Zita Johnson, who is remembered for her fine emotional work in "Machinal" and "Uncle Vanya," and Glenn Anders, who is known to American audiences for his splendid acting with the Theater Guild productions. The cast further includes Harvey Stephens, John T. Doyle, and others of note.

"Tomorrow and Tomorrow" ran all last season in the Henry Miller Theater, New York, and comes to Detroit as the third offering of the New York Theater Guild's present subscription

Barbara Stanwyck, whose pictures have been winning her countless admirers, is now appearing at the Michigan in the Columbia screen hit, "For-United Artists theater following the bidden." It is said that in her latest ability that far-eclipses anything she has previously done. The production was made under the direction of Frank Capra, one of the foremost directors of today and the supporting cast includes such favorites as Adolphe Menjou and Ralph Bellamy. The plot of the story hinges upon the indiscretions of a young wife and how they later effect the career of the man involved. The picture is one of the outstanding dramatic hits of 1932 and definitely marks Barbara Stanwyck as an actress whose talents are extensive.

Healthful Humidity

Humidity in houses should be from 30 to 50 per cent, but in most houses it is probably 20 per cent or lowertoo dry for health. The dryer the air the more difficult it is to heat a house, as moisture in the air carries and retains heat. If frost forms freely on the inside of the glass, there is probably enough humidity. If there is no sign of frost, the air is too dry.

Soldier's Wife True to

Her Duty as "Muzzler" The late General Edwards, leader of the Twenty-sixth division, vied with General Butler in the gentle art of "speaking out of turn." Edwards, when still a lieutenant, was once banished to the farthest outpost for his indiscreet remarks when Senator Calvin Brice tripped and fell from a stage

into a row of decorative plants. But marriage put an end to this falling, for Mrs. Edwards was an everpresent and astute councilor. On one occasion, after the general had given a lengthy interview to a reporter, Mrs. Edwards demanded bluntly: "Have you received permission from the War department to give out this inter-

"Why, no," stammered Edwards, blushing like a boy who had been caught stealing jam.

"I'm sorry," said Mrs. Edwards, turning to the reporter, "but you must hold up that story until the War department has okehed it. You see," she added with a smile, "it is the duty of the enemy to muzzle my husband's guns if he is able to do so. It is my duty to muzzle his tongue until the War department allows him to commence firing."-Los Angeles Times.

Paper Currency Today

Mere Promises to Pay Paper money may be looked upon as token money carried to its final extreme. A piece of it has no value at all in itself; the value depends wholly on a promise printed on it. But although the idea of paper money might be expected to have developed easily from token money, no one in the West seems to have considered the matter feasible until more than a thousand years after token coins appeared, says a bulletin of the National

Geographic society. Paradoxically, the first "paper" money was a brick, for the germ of the idea seems to have been born in Babylonia more than 2.000 years before the Christian era. Bonds for the repayment of loans were written on clay tablets and baked. These passed from hand to hand as representations of the amounts involved. Simitarly deposits were made with individuals, and clay-brick drafts were written against them. Later brick bills of exchange transferred wealth from place to place.

What He Had Feared

Do you know what a malingerer is? No? Maybe that's what you are. In a general sense, a malingerer is a person who feigns sickness in order to avoid having to do any work.

A Kansas City-physician was called to the jail the other day to examine a prisoner, who was reported ill. The jailer, a bluff, hearty Irishman, watched the examination with almost profes-

"What's the matter with him, Doc?" he asked, when the examination was completed. "Oh, he looks to me like a malin-

gerer," the physician said. "Just what I was thinking," the jailer ejaculated. "I knew right along that prisoner had some terrible disease!"-Kansas City Star.

Derivation Hard to Trace

The word "dupe" has a curious hisory. Originally it meant a dove or pigeon-one of the most simple and guileless of creatures. Webster and Littre both claimed that the word came from the old French name for the hoopoe, probably on the ground that Randle Cotgrave (1611) described dupe as "a hooper: a bird that hath on her head a great crest or tuft of feathers, but nestles in ordure." Littre quoted "Berry, dube, la huppe," as its source, but added "It has been suggested that the Swabian German duppel, imbecile, is a possible source." He insists, however, that dupe is to be traced from huppe, from the ease with which the bird can be captured.-Literary Digest.

Second Guess Advisable

Your second guess is likely to be about twice as good as the first, and it pays students to think twice before recording their answers in college examinations. This fact has been revealed by submitting "true-false" questions to more than 4,500 students, from which it was found that the chances are about two to one that the second answer will be the correct one. It also pays to be dubious, and it is much safer to change a judgment from apparent true to false than vice versa .-Popular Mechanics Magazine.

The Despotic Husband

Leonor Lores railroad magnate, talked about husbands at a meeting of college trustees.

"In Fulton City in my boyhood," he cuded, "old Uncle Jethro Rossiter said the last word about husbands.

"There are only two kinds of husbands,' said Uncle Jeth, 'namely, the henpecked husband and the despot. "The henpecked husband gives in at once. The despot gives in after

supper.'

Scorpion Drags Mate Around

When it comes to courting, the male of the scorpion family takes the initiative, picking out his own mate and dragging her around until he finds a crevice that satisfies him as a dwelling place. But once established in a home of her own, the wife soon assumes the upper hand, in fact, by the time she has finished her breakfast in the morning there are only a few fragments of the male scorpion left as proof that she ever had a husband.

In Praise of Merchants

There are not more useful members in a commonwealth than merchants. They knit mankind together in a mutual intercourse of good offices, distribute the gifts of nature, find work for the poor, add wealth to the rich, and magnificence to the great.-Joseph Addison in the Spectator,

PRETTY GERMAN SPY DYING IN MADHOUSE

"Blond Lady of Antwerp" Prisoner in Asylum.

Berlin .- Formerly one of the cleverest and most beautiful spies the world has ever seen, a haggard, wildeyed woman, whose name is given as Bertha Heinrich, lies in the great asytum for the insane at Wittenau, near here, awaiting her rapidly approaching end.

An entry in the books of the institution indicates that she was a hopeless drug addict, when, more than two years ago, she was first admitted. But behind that simple entry lies the story of one of the most amazing personalities of the war years.

Known as the "Blond Lady of Antwerp," she was one of Germany's most successful spies, and betrayed countless allied secret service men.

Caused Many Deaths. Her victims, however, were by no means confined to that field, for one of her duties was the appointment of hundreds of German agents, and these, without being in the least aware of the fact, were in turn spied on by members of a special corps which she had organized.

It has been averred that in this way she was responsible for the shooting of a number of spies in the pay of Germany who were suspected of playing their paymasters false.

At the height of her power she was a tall, slim, graceful creature, possessing an irresistible allure. In a pale oval face of delicate mold were set two big blue eyes, luminous and appealing. Few there were who could of. say "No" to her, and yet, behind all fascination there worked a brain masterly in its perception and intuition.

Little more than a girl when she first entered Germany's spy service, she soon revealed such brilliant qualities that it was not long before she was left with a free hand. She made Antwerp her headquarters, and it was there that she brought off some of her greatest coups.

Used "It" on Captives.

When a Belgian or French secret service agent was taken by the Germans, he was, in nine cases out of ten, left to the mercies of the "Blond Lady." Her "interrogation" followed none of the orthodox lines; all the witchery and fascination nature had given her were employed to the full.

And in almost every instance where the stern cross-examination of a military court would have been resisted. the skill of this modern Delilah was successful, for men stammered out to her their secrets against the promptings of their training and their judg-

Her daring, too, was as great as her personal fascination. Time and again she penetrated to points behind the French line.

It was after the war that Nemesis overtook this "woman with the smile of a Gioconda and a heart of the hardest rock," as she has been called. Haunted by the ghosts of dead menmen betrayed by her hand and brainshe sought temporary forgetfulness in drugs. But the phantoms remained, and before long the "Blond Lady," now a hopeless drug addict, had lost evertyhing, beauty, charm, reason itself-everything in fact except the insatiable craving for cocaine.
