team gained its second victory in as 15-yard line. Royal Oak took time out. many starts when it overwhelmed the Fetter drove off tackle for seven yards, Royal Oak Acorns 37-6 last Monday but on the next play the Blue Devils afternoon on the High School field.

With the sound of the opening whisthe barely out of the air, the Blue Devils scored the first of six touchdowns. the next play he blasted the center of Royal Oak kicked off to Maas on the 10-yard line, and he returned the ball to the 20 before he was thrown by three tacklers. On the first play Maas took the ball on a spinner play, and behind fine interference ran 59 yards to the Royal Oak 31. Bridge carried the ball off tacle on the next play, and just as he was being tackled he flipped a lateral to Maas, who crossed the goal line standing up. Bridge placekicked the extra point, and the locals led 7-0. A few minutes later Chamberlain, Royal Oak fullback, fumbled, and Hooper recovered the ball for Grosse Pointe on the Royal Oak 30-yard line. Interference was ruled on a pass from

# Lecture on Christian Science by Dr. Walton Hubbard, C.S.B

A Lecture

**Christian Science** 

Entitled Christian Science: Its Healing Ministry

by

Dr. Walton Hubbard, C. S. B. of Los Angeles, California Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston,

Massachusetts

Under the auspices of Second Church of Christ, Scientist, 147 Tuesday, September 28, 1937 East Grand Boulevard.

The lecturer spoke substantially as follows

Were it possible to call upon the students of Christian Science who form a large portion of this audience to explain the reason for their presence here and their allegiance to Christian Science, it would be found that most of them had been healed by Christian Science of sicknesses which had defied other methods of treatment. And the range of these sicknesses which had been healed would be found to be so wide and so varied as to indicate with certainty that the law of God, as taught and applied in Christian Science, heals all manner of sickness and sin.

While the growth of the Ohristian Science movement has been exceptional since its discovery by Mary Baker Eddy but little more than seventy years ago, it would no doubt be much more rapid if the people knew the blessings it would confer upon them if they would study and practice it. In approaching Christian Science one must be willing to give up pre-conceived notions and prejudices. In my own experience, in order to accept Christian Science it was necessary for me to recognize that the medical methods which I was using were effective only according to the degree in which were believed; that is, that the result following the use of material writing. means, when there is a result, is always mental, not material.

It is my intention not only to discuss the teachings of Christian Science, but to tell you something of my own observations in connection with my problem of growing out of the practice of medicine and into the practice of Christian Science. Perhaps these observations may be helpful to some of you.

#### Mary Baker Eddy

A-discussion of Christian Science may quite properly begin with its Dis-coverer and Founder, Mary Baker Eddy. Whatever I may say of her in the limited time at our disposal must of necessity be brief. I would earnestly recommend a study of her life. Several biographies are available at Christian Science Reading Rooms, and she has written something of herself in her book "Retrospection and Introspection." To understand how Christian Science unfolded in her consciousness will make it easier for it to unfold in yours.

Mary Baker Eddy was a woman of unusual spirituality and deep religious of disease enables us to become more sense, She was a consistent and tire- proficient in its use, and more grateful through years marked by sickness and us to the need of destroying sin and weapons of Christian Science are spirtrials her profound religious sense led every other discordant condition. her always to strive to see and derstand the infinite Principle in every blessing which she received. This per sistent search for Truth was finally rewarded by the discovery of the divine laws of God, which she named Christian Science. For three years following her discovery she devoted all of her time to a searching study of the Scriptures, seeking further unfoldment of this revelation. Quoting her own words from page 109 of Science and Health, she says: "I knew the Principle of all harmonious Mind-action to be God. and that cures were produced in primitive Christian healing by holy, uplifting faith; but I must know the Science of this healing, and I won my way to absolute conclusions through divine revelation, reason, and demonstration. The revelation of Truth in the understanding came to me gradually and apparently through divine power. Jesus declared that spiritual perception is necessary in order to understand his teaching. On one occasion after declaring the grossness of their thought to be the reason the people could not understand him except he spoke in the simplest parables, he commended the spiritual receptivity of his disciples by saying, "But blessed are your eyes, for they see: and your ears, for they hear." And may I say that the eyes and ears of Mary Baker Eddy were likewise blessed. Her study of the Scriptures revealed the fact that the entire Bible record teaches conclusively that a right understanding of God has always brought dominion over all material conditions. and that when the knowledge of Truth has been correctly applied, it has always been attendedby healing and regeneration. The Scriptures abound in evidence that to understand God brings healing. Especially is the New Testament replete with the statement of the liberty that comes, as Mrs. Eddy declares, through "a right apprehension of Him whom to know aright is Life eternal" (Science and Health, p. vii).

ning and to accept the fact of his nothing more was said. In practicing medicine, I soon found

Learning to Understand God

Christian Science declares itself to be the law of God. It further declares that this law is demonstrably true; that we may understand it, that we may apply method was supported by their own it, and that the results will prove its truth.

> Obviously, if we are to understand God's law, we must first understand the nature of God. And in order that the nature of God may unfold in our thought, we must contemplate the Supreme Being, we must dwell upon His nature and character. Men have so contemplated God in times past, and they have called the Supreme Being by the name of the quality in which Go:

has been revealed to them. So God is Elohim, the all-powerful. He is Je hovah, the eternal Being, who was and who is and who will be. He is Spirit. He is Life, Truth, and Love. He is al of these because men recognized in Him the qualities and characteristics which these terms bespeak.

The Bible speaks of God as Spirit, as Life, as Truth, and as Love. It also nized that it was his own thinking speaks of Him as the creator - that from which all proceeds. This thought is expressed in Christian Science by the use of the word Principle for God, since Principle is that from which all pro-

ceeds and by which it exists. Mrs. Eddy has also given us the term Father-Mother, by which there is which it is believed will accomplish brought to consciousness the completeness of the divinity, the motherhood as well as the fatherhood of God, and also a larger thought of God as Love When we think of God the Father, our thought of His is limited by our earthly sense of fatherhood, which, no matter how complete, is still lacking in the fullness of those qualities of love and tenderness which the mother-thought expresses. The word Spirit, as used in Genesis, and the word which is translated Almighty God, had something of through the difficulties in translating these words this phase of their meanng has been lost to us.

No matter by what term we may Life, or infinite Principle, or infinite Mind, a logical deduction as to the nature of man and the creation will always bring us to the same point-that of the eternal perfection of all that God has made, and the unreality of sickness and all that is contrary to His divine nature. The only way we can fail to arrive at this conclusion is by making no effort to understand the divine nature, and by insisting that the sicknesses and sins which we see about us are in some way in accordance with His infinite and loving design.

It should be obvious that infinite Life cannot be made manifest in death. Nor can infinite Life be made manifest in sickness, for sickness may ultimate in death. Infinite Life can only be made manifest in life and health.

God, who is infinite Truth, cannot be accord with every other idea of Truth. just as one mathematical truth is in harwith every other mathematical mony sickness and claims to be true.

that Love and supply them with infinite good, and infinite good does not include how much more shall vour dren.

Mind." Again, Mrs. Eddy declares on steadfastly to sick and sinful man He said, "Come out of him, and ent page 503 of Science and Health: "This through much denying of error togeth- no more into him." That is, he addres Mind." creation consists of the unfolding of er with little realization of Truth. spiritual ideas and their identities, which are embraced in the infinite any given condition as prayerfully, as man has lost his mind, we declare a Mind and forever reflected. These ideas thoughtfully, and as completely as we realize that man possesses and reflected range from the infinitesimal to infinity, know how to do, we should let the pow- the one, perfect Mind which is infini

related facts, let us take the next logi- of saying that impatience makes the recal step and "move in" on this conclu- sult seem slower in appearing. In He insisted that to see the kingdom sion. but insist, that we are ideas in divine iety are definitely deterring thoughts Mind.

Presuming, then, that we have admitedted it, or better still that we have accepted it to the limit of our ability. let us take the consequences of this admission, this acceptance. And the consequences are portentous, for it means that in our real being, we are spiritual manifest, as children of God, comes from the one, perfect Mind in which we exist. Thus we are setting up a diit is essential that we do this, and that we make every effort to hold it, to per-manently entertain it. With a clear realization of our true selfhood in Mind, we can see the falsity and deny the

reality of any error which has gained admission to our thought.

#### Falsity of Matter

Whatever of strength the sicknesses and discords which fret and disturb human consciousness seem to possess, lies experience, where the result was such in the belief that they are conditions and effects of matter, and that matter is substance and is governed in all its conditions by laws pertaining to itself. It would be much easier to be rid of Three physicians would not attempt to promises made. He said not, And sickness if we could gain the actual this same thought of motherhood, but realization, through an understanding of was too great. The material jaws that Christian Science, that there is no matter. The proposition is very simple in its statement. It is this: since God is bones could never be set in proper posi-All, and God is Spirit, there is no matthink of God, whether it be as infinite ter. But in practice, it is not quite so to the elbow, and that even with an imsimple, for the reason that we are beset on every hand by the insistence of the

human or mortal mind that the supposed laws of matter are valid and real. If we accept the proposition that divine Mind and its ideas constitutes all reality, we have definitely done away! with matter, because matter is not in | twentieth day showed the bones so percluded in this spiritual declaration Christian Science definitely declares that there is no matter.

In logic this is obviously correct, but what are we going to do about it? How are we to account for all the objects and things which we have thought of as Health (p. 401) that "Until the advancmatter? Christian Science teaches that ing age admits the efficacy and supre they are beliefs, false mental concepts. and it is perfectly logical in doing this; Scientists to leave surgery and the adfor it is evident that all reality is embraced in divine Mind and its idea, or, made manifest in sickness, for every as the Christian Science textbook also was done in this case, but when mater idea of Truth is in absolute harmonious states it, "God and His thoughts" (Science and Health, p. 114). Any other thoughts which we accept

So the child of God is fully expectant of good, and this realization builds up hope and faith. Christian Science is God's law, and its declaration and realization heal.

#### Christian Science Heals

Some who are unfamiliar with Christian Science might ask for proof that it heals, that it annuls so-called material laws. Let me cite one or two instances of healing which occurred in my own as to indicate quite definitely the setting aside of material laws. I recall the case of a young man whose arm was badly shattered just below the elbow. set it because, they said, the swelling were declared about it were that the result would be a stiffened elbow, that the tion because the fracture was too close perfect result, the man would not be able to use the arm for six months.

The result under Christian Science treatment was that the elbow joint was ness of the Christ, and there are man not stiffened in the slightest degree, that without any human effort to set Testament which indicate that the bones, an X-ray picture taken on the Christ comes to each one of us, a fectly set and so completely healed fact. which defines the complete creation. So that it was difficult to detect the points Christ in fullest measure, the Bible de of fracture, and instead of this man clares that "of his fulness have all being kept from work for six months, the healing was so complete in twenty days that he returned to his work. They And yet, having arrived at this point sical healing must be brought about by wanted to safeguard their method from I was filled with fear, for I saw that the of divine Mind. If we are certain of

material means, we had not deemed it possible that God had provided spir-lished clinics in two large cities and not mix with the materiality of my procarried on their work with the greatest fession, and I did not want to give up

form of error; so we studied the Bible ethical regularity and dignity. There the practice of medicine. But the leaven with the view of substantiating our was no hint of any mercenary motive, of Truth was working in my conscious-Bible ought to teach. We are led through the study of Christian Science and the study to stop viewing man as sick and sin- in cases under treatment, but shortly began to practice Christian Science.

Father which is in heaven give good things to them that ask him?"

It should not seem difficult to recog-When we consider God as Principle that from which all proceeds, we find nize that there are forms of thought that we may see and touch as well as t impossible to conceive of both sickness and health proceeding from this perceive. Through continued alertness n our thinking, we are able to see beone infinite Principle, and yet there is liefs where before we saw material obno other source from which anything could come, for, as John declares, jects, and the strength of an error is "without him was not anything made more readily broken when it is seen as that was made.' a deceptive belief, and not as matter.

When we consider God as Mind, we arrive at this same conclusion, for the manifestation of Mind is thought, and the thoughts of infinite Mind are not sick thoughts, but perfect and healthful and holy.

#### Applying God's Law

Now, we have been discussing the nature of God, and our relationship to come to recognize that all disease is sufficiently conscious of this relationmental. However, since I had so large ship to destroy some erroneous belief which we may be entertaining. In my own experience I have found that the concept of God as Mind is the simplest one from which to reason. Mrs. Eddy has said on page 467 of Science and

Health, "Reasoning from cause to effect n the Science of Mind, we begin with Mind, which must be understood cannot be learned from its opposite, man in an effort to further realize inatter." So, in undertaking to determine what man is, let us go back as far

edge I would be able to accomplish as possible to a beginning. And this beginning must be some conclusion which will illustrate this point further. An everything I could find from mental we entertain with absolute certainty. Some excellent results in healing have been obtained by simply declaring spir- certain that these ideas are as perfect. ent results are attained through an act-

I am sure that we are all convinced that there is divine intelligence. We

some sense of sickness, or discord, or ment sheweth his handywork." And there is no such entity as matter, that

> true about us, we can effectively deny into someone or something else. Of them and refuse to believe them, and course, we all know that in this day a

we can demonstrate the healing. Let us not look too long or too closely at error-just a sidelong glance. Just intelligence, we must be just as certain destroyed. Then let us return in sanity today. It would be possible for of Mind, as certain of it as we are of thought to the contemplation of our me to tell of numerous healings. Yet,

our own existence. It is evident that the sole and only function of Mind is in expressing ideas. On page 256 of Science and Health, Mrs. image or idea emanating from this His perfect man. Be careful not to cling ails you." No, that is not what he said.

ounter feit qualities, which include form and iously been in attendance, hearing that the child had not succumbed, wanted to see her. I was informed that he declared he did not come to interfere; in-

stead he said, "There is a miracle going here and I want to see if." Now, the medical belief in this case was that microscopic forms of vegetable life called germs had gained entrance to the membranes of the spinal cord and brain, and that they were growing and

It should be noted that Mrs. Eddy developing there, inflaming and de-stroying these portions of the body to uses the word belief to indicate the counterfeit of, or lie about an idea. the point where, according to material Thus it never, indicates other than that laws, death was inevitable. But Chris which is falsely mental. Great care should be taken to see that when we tian Science set aside these material laws. It destroyed their claim of decall a material object a belief, we really structiveness and inevitability. It prov-

recognize it to be falsely mental and ed them to be but lying beliefs, which cease thinking of it as matter. Rememwere readily destroyed through the apber that belief is not another name for prehension cf spiritual facts. matter: rather that matter is another

And what do you suppose became of name for belief. To recognize the body the germs that were said to be in there causing all the trouble? When deas a belief, a part of human consciousness, and not as matter, begins at once structive thoughts are believed to be to free us from the false laws of matpreying on the mental concept called ter. and makes it easier to heal the body, and through Christian Science the conviction is entertained that right Divine Mind

thoughts, God's thoughts, divine ideas, do not prey upon each other, what happens? Why, the lying beliefs dis-appear, and the destructive germs Having set forth a method by which the nothingness of matter becomes more evident to us, let us again declare through the idea which expresses it and the spiritual facts about God and His cease to be. Easy to see, if we realize that they are only beliefs, false mental concepts; but hard to see if we believe them to be matter. Fortunately, there

man's perfection. Let us begin with Mind. We are certain of infinite Mind because we see is no matter.

Jesus' Healing unquestioned evidences of divine intel-The various healings which Jesus, the ligence. We recognize that divine Mind master Christian, brought about are of can only be expressed in ideas. We are especial interest to those who are enleavoring to follow his command to that man is altogether perfect and spiritual. In Miscellany (p. 242) Mrs. heal the sick, for he instructed his disciples to go into all the world and Eddy declares, "Unless you fully perteach all nations to do whatsoever he ceive that you are the child of God, had commanded them to do, and he cerhence perfect, you have no Principle to tainly commanded his disciples to heal the sick.

Among the recorded healings which Jesus brought about are several where the sufferers were said to be possessed method and got results, while I was matter, and which dared to deny the clare the glory of God; and the firma- lack. We can become conscious that of devils. It seems to have been the accepted belief of that time that the devils came from somewhere and enterwhich we can all subscribe, "In beauty, claims are all deceptive, and that in the ed into a man, who was possessed of light of our realization of that which is them until they departed and entered

person so suffering is thought to have

lost his mind, or to be demented. Now. Jesus healed his cases quickly and cerenough to deny that which needs to be tainly. Christian Science also heals in-

THE GROSSE POINTE REVIEW

Wednesday: Sign up for life-saving are passers of better than average classes. Sign up for handball tournaability and capable ball-carriers. Gary uses a wing back formation with a shift. There are half a dozen good Thursday: Dramatic club. Sign up sophomores on the squad but it is unfor badminton. Demonstration of sinlikely that any save Art Guse will be gles, doubles and mixed doubles badable to win a regular position this minton. Reese Cramer, state champion season.

Coach Dorais probably will start a team comprising nine lettermen against the Teachers. The only exceptions will

be Chesney at right end and White at center, and both of these players were only a few minutes short of the playing time required to get a letter last season. As things now shape up, no sophomore will be in the starting lineup unless McDermott is able to displace Al Oliveto, to senior backfield utility man, who has been transferred to fullback this season and has shown fine form in the position. McDermott has plenty of drive as a ball carrier but lacks the experience right now to

be as valuable on defence as the seasoned Oliveto.

whole world. We know at

The fast tempo of modern living has exacted an appalling penalty from human eyes. One child out of every five in our public schools, 40 college students in a hundred, and half the people over 35 have defective vision. We make demands on our eyes that were unheard of a century ago. Books, magazines, newspapers, cards, the movies . . . all lay heavy burdens on our eyesight. Today more than ever, we need to do everything in our power to protect priceless vision.

Light Conditioning helps to protect eyes young and old. The eyes of a child are immature and easily strained . . . they require frequent examinations and abundant light of good quality. Old eyes need more light because from middle age on, the pupil of the eye grows smaller and admits less light to the retina. The older people in your family need more light than the young people.

It is a simple matter to Light Condition your home. Without charge, one of our Home Lighting Advisers will measure your lighting with the Sight Meter, and make recommendations for improved lighting for comfort and beauty. Phone for a survey of your lighting today.

## Grosse Pointe High Grid Team Defeats
