STAFF OF GROSSE POINTE

Miss Rena favorite Ann Arbor stylist has joined Marie Buzzelle at the Grosse Pointe Hairdressers at 279 Rivard Boulevard in order to cope with the ever increasing demand for the fine type service extended by this popular shoppe.

With two such splendid beauticians keep increasing. You will find splendid facilities and new hair modes of merit, at this Grosse Pointe institution.

GRAND OPENING OF MAYFAIR'S BAR WED.

The Mayfair at Mack and the Seven Mile Road announced the Grand Opening of their new Modernistic cocktail bar which has been installed for the convenience of their patrons at a considerable expense. The Grand Opening will be held Wednesday evening.

Special entertainment has been se-

cured and a lovely souvenir will be presented to the patrons on this occasion. The Mayfair invites you to join them in the festivities of the event which marks another progressive step by this Grosse Pointe institution. Entertainment, foods and beverages of the finest are at your disposal at this popular rendezvous.

threat star Captain Bob Westfall, Tasting defeat for the first time this scored in the second period after Westwas grounded and Kall was stopped twice in the third period. Grosse Pointe for no gain. Westfall then swung terference he ran 25 yards for the first touch-down. His place kick for the extra point was wide of the uprights.

> The half ended with no further scoring threat by either team, and the score was Ann Arbor 6, Grosse Pointe 0. A short punt by Rogge was run back

to the Grosse Pointe 41-yard line by the stocky Ann Arbor captain. Warner made 5 yards on a plunge through guard and a pass by Westfall was incomplete. On the next play, however, Westfall's pass was taken by Kalb who was thrown quite frequently and while classi- on the 10. After two line plays had fied as sport it is really a business gained a scant 2 yards. Westfall drove off left tackle for this second score. place in its make-up. Men are Dobansky's attempt to place kick the point after touchdown was wide.

A grim Blue Devil team then tried to pass their way into the scoring column, but Fetter's pass was intercepted by Plichta who ran 20 yards to the Grosse Pointe 8. On the following play he gained 2 yards by an off tackle play Kalb then scored the final touchdown running off right tackle for the remaining 6 yards. Westfall agained failed to

Captain Westfall was undoubtedly the best player on the field in this game. His punting was good, although Rogge often drove the Purple and White back with his long kicks. Westfall's passing (Continued on Page Two)

Thirty-Six Grosse Pointers Attending University of Detroit

Thirty-six residents of Grosse Pointe are attending classes at the University of Detroit this fall.

In the College of Arts and Sciences are enrolled William Brown, 4822 Washington; Margaret Carlin, 1220 Whittier; Bernadine Carnaghi, 1212 Three Mile Road; Harry Hoffmaster, 675 Rivard Blvd.; William Kronner, Mrs. John Stalker 17505 E. Jefferson; William Lutz, 923 Rivard Blvd.: Jane Martindale, 1212 Beaconsfield; Jack Nicholf, 1021 Nottingham; Robert Pfeffer, 832 Grand Marais: John Ward, 937 Washington; Robert Van Assche, 735 Roslyn; J. Beaufait, 1127 Devonshire; Hubert Corteville, 1410 Bedford; Hugh Daly, 1303 Beaconsfield; Frank Moran, 1035 Barrington; Henry and William Keane, Pointe Shores.

87 Beaupre. Road. The College of Commerce and Finance numbers among its members Dorothy Bohan, 553 Middlesex; Albert Ghesquiere, 970 Rivard Blvd.; John Huwiler, 38 Mapleton; Gordon Philip, 720 Pemberton; Ruiel Mason, 837 Barrington; Ray Mauer, Jr., 571 Lakeland; Robert Motschall, 1168 Three-Mile Rd.; Henry Peacock, 1262 Whittier; Philip Phillip, 720 Pemberton; Mark Walsh, 1048 Yorkshire; Jeanne Morris, 1415 St. Ambrose Mothers Grayton; Robert Whitty, 1221 Kensington and Wayne Long, 745 Grand

Marais. The College of Engineering claims Fred Allor, 357 Rivard Blvd.; David Conard, 502 Lincoln: Donald Martin 1405 Three-Mile Road; and Reginald Park, 125 Lewiston.

Canadian Legion

The U. S. A. Post No. 100, Canadian legion with headquarters at the Neighborhood House, 17145 Vernor Highway HAIRDRESSERS ENLARGED at St. Clair avenue, Grosse Pointe. is starting its Fall and Winter activities this month with regular meetings on the second Wednesday and social entertainment, for members, prospective members with their families, on the 4th Wednesday of the month at 8:00 p. m. Special entertainments will be announced later. This Post is now conducting a "Membership Drive" and all this shoppe's popularity is destined to ex-service men of the British Forces are invited to make application for admission, pay us a visit on either of the

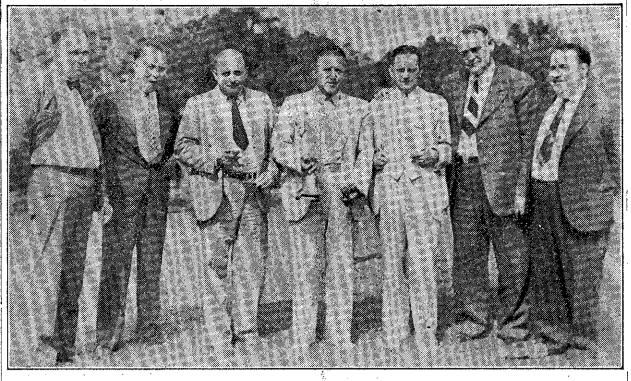

DR. HARVEY OPENS NEW VETERINARY FACILITIES

above nights for particulars.

Dr. James G. Harvey who has been established in the Grosse Pointe area for over six years has announced the establishment of his office and facilities for extending expert service to pets of the neighborhood requiring medical or surgical care, at 17151 Kercheval avenue at Neff Road. This new establishment is equipped with modern equipment throughout.

Polo ponies and horses from some of the riding stables are kept in excellent physical condition and treated for injuries by Dr. Harvey and his advise in the care and development of pets is highly regarded.

Officers Of Grosse Pointe Lions Club

Left to Right-Victor DeBaeke, 3rd Vice-President: Vincent Leach, Lion Tamer; William Ludwig, Treasurer; Jack Gagnon, President; Arthur P. O'Connor, Secretary; Norbert Denk,

Ed. Note-Nels Korte, Chairman of the Publicity Committee and who is responsible for the above photo, is sorry for the absence of Waldo Berns, 2nd vice-president. Nels claims that due to the total weight of the photo subjects it was impossible to find a camera large enough to include the entire staff.

LIONS TO HAVE ACTIVE YEAR

The Grosse Pointe Lion Club under the direction of President Jack Gagnon, with the help of the officers and the co-operation of the entire club, have mapped out a very full season of activities.

At the regular luncheon meeting last. Thursday the various committee chairman outlined their plans for the future and when carried out will make this season one of the best in the club's history.

George Elworthy through the Neighborhood Club will continue to be the dispensing agent for the club. Any organization or individual reporting the need for help such as clothing, shoes, eye-glasses, dental work, etc., for a worthy family, will receive the best of cooperation fro mMr. Elworthy.

To Entertain Tuxis Group Friday Eve.

Mrs. John Stalker will be hostess at a supper party Friday for the Tuxis Club, the young peoples club of the tea at the Defer school. > evening of varied entertainmen will follow a buffet supper. Monopoly, Keno, and ping-pong and other games along with dancing will occupy the thirty guests.

Jane MacNaughton who is general chairman of the party has as her a'ssistants: Madeline Smith, Doke Stalker, Andy Campbell, Claire MacNaughton, Arnold Morton and Carl Beckman.

Club Party Oct. 10th

The St. Ambrose Mothers Club are holding their first big party of the year Sunday, October 10th. Mrs. George H. Powers chairlady assisted by Mrs. Joseph LaLonde have been quite active and predict a tremendous turn out for this big benefit party.

A cordial invitation is extended to the people of the vicinity. A unique quilt will become the property of some lucky individual on this occasion, the proceeds of which will be used in the benefit of the Sisters of St. Ambrose. at the school.

Racing Trophies Awarded at Fair Haven Saturday

Yachting enthusiasts attended the Mackinac dinner at the Bayview Yacht Club at Fair Haven in substantial numbers Saturday, October 2nd to honor the winners in the recent yacht races to Mackinac.

The Club was gayly lighted for the occasion and Commodore Williams, well known to the yachting fraternity on the Detroit rivers, had the honor of presenting the winners with their trophies in the various classes.

This is one of the biggest sporting events held annually on Lake Huron, and crafts of almost every size and description enter for this long race from one end of Lake Huron to the other, the winner of each class respectively receiving a suitable award.

Defer PTA Tea Tuesday, Oct. 19

Plans have been made for a very busy season, with many special attractions for this-Fall. The season will get underway on the afternoon of Tuesday October 19th with a special afternoon

Parents of the area are extended an invitation to attend and get acquainted Announcements of various events will be published in the GROSSE POINTE REVIEW from time to time.

Trombly PTA Meeting Tuesday, October 12

The first meeting of the Parent-Teachers' Association of Trombly school will be held Tuesday, October 12, at 7:45 o'clock.

The meeting will open with a 45-minute period when classrooms will be open so that parents may talk with teachers and see the work of the pupils. A program in the auditorium will follow. Dr. Fitzsimmons and Mr. Lynn Bartlett will be the speakers. They will discuss special services offered by the school system in testing and psychological assistance.

During the business meeting a new president will be elected to take the place of Mr. Albert Stewart, who has moved out of the community."

The social period which is to follow the business meeting was planned last Monday by the mothers of 5A, 6B and 6A students, who held an informal tea

Pictured above are some of the Texas Tech linemen who will come charging in upon the Uni-

versity of Detroit backfield Saturday afternoon when the two teams meet for the first time in

Faith Lutheran Marks 20th Anniversary

Next Sunday morning, Faith Luthearn Church will celebrate the 20th aniversary of its organization, which took place on October 14, 1917 with 51 charter members. This small group has grown into a congregation numbering aproximately 1500 communicant members, and is one of the largest congregations in the American Lutheran Church. The church was organized by the present Pastor, the Rev. R. D. Linhart, who has served it since its

The Rev. Otto Mes, D.D.LL.D. President of Capital University, Columbus, Ohio, who preached at the dedication of the thre units of the church, will be the anniversary speaker Sunday morning at 10:45. An Anniversary Banquet will be held next Wednesday evening at 6:30.

Gamber Day Saturday October 9th at Beverly Hills Club

On Saturday, October 9, 1937, Beverly Hills Golf Club, Van Dyke at 121/2 Mile Road, will fete its professional, Clarence W. Gamber. "Cam," as he is Shore Golf Club. He is well known because of the long driving, and taking the International "Best Bail" Tournament some years ago.

An exhibition well worth seeing has been arranged between the two outstanding amateurs of the Detroit District, Bob Babbish and Chuck Kocsis, and two outstanding Professional golfers, "Gam" himself and Emeric Kocsis, brother and teacher of Chuck.

The recent golfing triumphs Bob and Chuck have brought back from Rochester, New York and the West (Chuck Kocsis was up there in the National Neuenfelt's court-room in Dearborn, at all season. In only six of 66 games Amateur in Oregon), makes certain that the Exhibition will be a good one and and By-Laws will be adopted. some records will be established.

The public is invited to attend this gala event GAMBER DAY at Beverly Hills Golf Club, Saturday, October 9th. A turkey dinner will be served.

Maya D. Gruhzit and Robert Dorn of Grosse Pointe hold Michigan Alumni Undergraduate Scholarships at the University of Michigan.

work. From then until Thanksgiving reason that like all teams from the Day Coach Dorais' men will not have warm region of the southwest, the Red anything that could be described as a Raiders reach their top form early and are harder to beat in October than they may be later in the season after hard games have slowed them up. However it was a case of now or never in arranging this date and rather than pass up the chance to tackle the boys from the Texas panhandle, Dorais consented to take a chance of meeting them when they are sure to be at their best.

This is one team to which Detroit penalties incurred by the northerners, than nine candidates for the tackle were given half a dozen downs in which positions at Texas Tech weighed over took the ball on downs and punted it of 193 being practically disqualified because of lack of ruggedness. The rest of the squad does not run so large as the tackles, to be sure, but there are plenty of fellows who weigh 180 or better. Furthermore, they grow them tall down in the Panhandle, a very valuable asset to football player in these days when so much of the action is in the air.

About the smallest of the regulars is order to permit him to give practically Captain Hershel Ramsey, end, who weighs only about 175 but is good and tall and, according to all accounts, a

The Red Raiders have had to develop a new backfield this season. All of last year's backfield stars, including Neill the great passer and punter, have graduated. This leaves only Smith and Curfman, quarterbacks, and Chernosky, halfback, among the wearers of the varsity letter. Otherwise the team is very well equipped with veterans. It has Murphy and Jess Browning for the tackle positions, Pete Owens and Lew Jones, guards, Frank Guzick, center, and Capt. Ramsey, Jim Brown and George Philbrick, ends.

With last year's strong line virtually intact, the new backfield should have no trouble gaining ground. That the offense has not suffered greatly as a result of the loss of so many regulars from last year's backfield, is attested by the fact that the Raiders recently made two touchdowns against the coached by Dana X. Bible. The Raiders were beaten by the Longhorns be-Texas U. and Detroit games, they ought to acquire a lot of polish, especially as they have a battle with the Montana team in the meantime.

The Red Raiders are coached by Pete Cawthon, a Southwestern alumnus, who has "Dutchy" Smith as his line coach. These men have been with the team ever since varsity football was intro-The organization adopted the name of | duced at the institution, seven seasons Justices of the Peace Organization of in all. Calico, Silk, Cashmere Names From Other Lands

Many of our names for cloth come to us from the Orient, observes a writer in the Kansas City Star. Calico is from Calicut. India, the city from which it was first imported. Doubtless at first the term used was Calicut cloth, but phrases often shrink in usage, and calico was an easy evolution. Madras, also in India, gave us the cloth which bears its name. This was first made from silk and cotton, but the name is applied to the same weave in cotton also, a fabric which is much used for men's shirts. Damask is from Damascus, noted long ago for its fine steel blades and for its silks. Damask is characterized by woven designs which represent flowers or conventional figures. It was originally made of silk, but the same name was later applied to the same weave in silk, cotton, rayon or wool used for hangings and upholsteries. and to linen woven for table napery and towels.

The word silk we should expect to be associated with China, and it is but the name has come to us in a roundabout way. The Anglo-Saxon was seoloc, from the Latin sericum, from Greek serikon, literally Seric stuff, from Seres, the Greek name for the Chinese. Cashmere comes from the name of a city in Tibet. From a close inner wool of the Cashmere goats were woven a fine dress fabric and beautiful shawls. Muslin comes from Mawsil, in

Mesopotamia, the city where it was first made. Nankeen got its name from the Chinese city, Nanking. Linsey-woolsey is an old English name from linsel, linen, and wolsye, Many woolen fabrics bear

English names, such as melton, from a town of that name in Leicestershire, and worsted, from a town in Norfolk. Broadcloth was so called because

this fine fabric was woven wider than ordinary woolens. Flannel is a word of doubtful origin, but is found in similar form in French, Spanish and the Scandinavian tongues. Linen is an Anglo-Saxon word derived from lin, the old word for flax. It is rather odd that we never call flax lin, but seldom say flaxseed and nearly always say, linseed oil.

Old-Fashioned Remedies

Favored by the Japanese

The Japanese boast of the most fantastic medicines, and the country folk go in for "cures" which, to a European, would seem a good deal worse than the disease, notes a writin Pearson's London Weekly.

A widely-used cure for fever consists of placing a poultice of earthworms on the patient's stomach, because Japanese believe that this will draw the fever out. Anyone suffering from a sty or

other eye trouble is advised to lie down and sprinkle salt on the stomach. Burned clay, raked out of old cooking stoves, is another cure-all. Eaten-slowly, it is supposed to banish any kind of sickness. The effects of eating too many

pysters are supposed to be removed by eating powdered oyster shell, and this cure is also widely used for in-digestion and similar ailments. Heartburn-not the indigestion kind, but that which comes from blighted affections-can be soothed by eating a few toads. But the most widely-used treat-

ment consists of sticking pins into one's anatomy. According to the Japanese way of thinking, there are than 300 different parts of the body into which a pin can be stuck, each part being the location of a different disease.

Babies, however, are not considered strong enough to withstand these cures, so the Japanese mother deceives the germs of disease by hanging a notice outside the house informing all germs that the baby is not at home.

The Knout, a Heavy Whip The knout was the official instrument of punishment formerly used in Russia, consisting of a heavy whip of leather thongs artificially hardened, twisted with wire and sometimes hooked at the ends. One hundred strokes were considered equivalent to a sentence of death as the victim seldom survived. On account of the severity of the punishment Nicholas I issued an order substituting punishment with a lighter whip of three thongs known

Cocobola, Central American Wood Cocobola is a Central American wood that has been used in the cutlery trade for more than 50 years. In appearance it is one of the most striking of woods, with peculiar shades of red and orange shot through with bands of jet black. It is extremely hard and heavy, and being more oily than most of the rosewood group, to which it is related, is so difficult to glue that it is not used to any extent for furniture except novelty pieces.

Muskmelon and Cantaloupe

Many persons are puzzled by the names muskmelon and cantaloupe. Horticulture states that the term muskmelon is the proper one to apply. The cantaloupe is really a small melon used for forcing in European greenhouses. This name, however, has come to be used in the trade for certain kinds of melons. It is purely a trade name and is given to what is actually a muskmelon.

Dogs Look Like Monkeys

Not only do Affenpinscher dogs look like monkeys, they resemble simians in certain mannerisms. They walk with their hind quarters close to the floor, climb almost as well as monkeys and screech excitedly when agitated.

Glanders, Horse Disease. Is Communicable to Man

Few equine diseases are communicable to man. Glanders is the most common one. Extensive outbreaks occurred in the great armies of the Eighteenth and Nineteenth centuries when, for the sake of a horse, a kingdom might be lost or won. Glanders is characterized by ulcers in the nose, which sometimes spread to the lungs or intestines. To humans it may be deadly, though in horses it tends to become chronic and not necessarily fatal, according to Victor G. Heiser, M. D., in Collier's Weekly.

Another disease the horse shares with man is anthrax, although cattle and sheep are far more subject | F to it. Direct contact is the only method of transmitting anthrax. But once the soil where the animals have pastured is infected, it may remain so for years unless prompt steps are taken. In human beings anthrax begins as an inflamed pimple with a hard

center and a gradually extending red zone of inflammation around it. The enormous carbuncle, burning like a little coal, as the Greek derivation of its name implies, extends into the deeper structure below the skin, far into the connective tissue. The patient is simply overwhelmed by the poisons and the high fever. Farmer George Washington, at the beginning of his first term, developed one of these on his leg and we almost lost our first President. Anthrax has the distinction of be-

ing the first bacillus to be definitely associated with the cause of a specific disease. It is easily stained and, because of its great size, was also one of the first in which the great Koch recognized the reproductive spores, the little nucleoli inside the bacilli plainly visible under the microscope. These spores will remain alive for several years in a dry condition; hence anthrax may be conveyed to human beings in all industries using hair or hides.

Pekingese Dog Favorite

of the Chinese Rulers One of China's three contributions to the dog fancy is the haughty-appearing little Pekingese. This waddling little "kou," as a dog is known in that land is one that has been 100 per cent pure-bred throughout the centuries, writes George Butz in the Philadelphia Inquirer, Pekes were the coveted court dogs

in the regimes of Chinese emperors. Howe They were once the pampered pets | Turn of the mandarins, and perhaps that is the reason of their arisocratic expression. Chows and pugs are the other two dogs which originated in China. The Peke's luminous eyes, set far

apart upon his broad skull, serve as a mask of his real disposition. He is a jolly fellow and faithful. Because of his diminutive size the Peke has sometimes been wrongly called delicate. However, he is not by many miles, because he is one, of the sturdiest of toy dogs.

Pekes are active, they are strong for their size and would this dog be larger he would be fitted for police work. The Peke has a massive coat for a small dog. The frill of soft hair around his collar suggests a lion. In fact, in his native China, the dog has been called the little "lion dog." That was probably due to the fighting heart of the dog. Pekingese were first imported to England from their native land.

eagles "Singers" of Dogdom Beagles are the "singers" of dog-

These merry little dogs are virtually vest pocket editions of a foxhound. Their main forte is trailing and being equipped with a good scenting nose, they are used to seek the fast flying "Br'r Rabbit." Just as soon as a Beagle gets "on the line" of a cotton-tail, notes a writer in the Philadelphia Inquirer, he broadcasts his joy of the hunt with a throaty call, which devoted admirers of the hound describe as "clear as a bell." The Beagle is built on compact lines. He is a durable little fellow and will hunt tirelessly over a long period. Although the Beagle is equipped with short running gear, his legs are strong. Due to his short coat of varied white, black and tan hues, he can penetrate thick brush in trailing a rabbit.

Piccolo, Old Instrument A German invention, the piccolo is just about 400 years old. But its ancestry goes much further back. For, as the name indicates, it's a "little flute," and flutes were probably the first musical instruments. Flutes were popular in ancient Greece, where, legend has it, they were invented by Athena, goddess of wisdom. The story goes that Athena threw her creation away after seeing in a stream how her face was distorted while playing. But the flute came back when another god, Marsyas, found it and became proficient at it.

Bamboo Arithmetic

Japanese arithmetic is done by boys and girls in school on a kind of slate made of bamboo rods. Numbers are represented by colored beads which easily slip back and forth as one counts. Written letters and numbers are made with a fat brush and black paint. The brush has a fine point for delicate parts of letters and much practice is needed to make the alphabet with its intricate design.

Continental Glaciers

Continental glaciers are ice sheets of enormous extent, covering thousands of square miles. The great ice sheet of Greenland, 500,000 square miles in extent, and the one at the South Pole are the only two fully deserving of this classification.

Gion, Aoi, Ancient Fetes

Traced to Early Century Two of the most picturesque festivals held in Japan are those known as the Gion and Aoi, says a noted authority. The Gion festival (Gion Matsuri) dates back to 876 A. D., when the head priest of the shrine formed a procession with decorated cars as a means of seeking the protection of the gods against a pestilence raging in the city. The fete officially lasts for seven days.

A special feature of the fete is the fitting out of expensive cars to take part in the procession. These are of two kinds, the yama and the hoko. The yama is carried on the shoulders of a number of men by means of long poles and contains decorated figures. The hoko is a kind of ornamental tower placed on four massive wooden wheels and beautifully decorated. There is usually a mast, 120 to 130 feet high, in the center of the tower. Originally there were 66 of these cars, but the number has been reduced to 28.

The chief festival of the Shimogamo-jinsha is known as the Aoi (hollyhock) festival, it having become the custom to offer hollyhocks to the gods on this day. The origin of the festival is traced back to the Sixth century.

The festival is in imitation of the imperial procession which formerly used to pay homage at the shrine. Early in the morning imperial messengers and their suite, in full court costume, assemble at the old imperial palace and start in procession for the shrine, accompanied by police officers on horseback, old-time gendarmerie (kebiishi), pages, hal-berd bearers, an imperial chariot drawn by oxen, etc. At the shrine the priests perform a ceremony on the arrival of the procession, and s similar service is performed at the Kamigamo shrine before a return is made to the palace.

Snuff-Taking Once Was "Dainty and Elegant"

In 1759, George Washington, a Virginia planter, shipped 55 hogsheads of tobacco to England. When the national capitol was built, tobacco had reached such an important place in American life that its leaves were used on some of the columns, along with corn, another New World product, relates a writer in the Washington Post.

To Sir Walter Raleigh goes the credit for popularizing smoking in the Elizabethan court and so in Europe. School children learn the story of how his servant threw water on him when he began smoking—thinking he was afire.

The spread of the habit, however, was not always clear sailing. King James termed it a filthy weed. Shah Abbas of Persia, fearing its effect upon the birth rate, prohibited the use of tobacco and burned a merchant alive in his stock of the plant. In Connecticut, in 1647, smoking in public was forbidden.

During the fashionable reign of Louis XIII snuff-taking was pronounced "far daintier and more elegant" than "puffing out tobacco smoke."

As late as 1900 cigarettes—a South American invention—were considered too sissy for use by red-blooded Americans.

One of the interesting things about tobacco is that it adapts itself peculiarly to the soil and climate in which it grows.

About Allergy
The Modern Home Medical Ad-

viser defines allergy by saying that the person with allergy is an individual who inherits some peculiar constitutional make - up which causes him to become sensitive to certain things. Thereafter these particular things become violently poisonous to him, even when encountered in minute amounts. Allergy patients may become sensitive not only to material things but also to physical agents such as light, heat or cold. Sensitiveness may develop to such an extreme in certain people that they may be badly affected by a millionth of a milligram of substance which may be devoured as a food by a nonsensitive person. Hay fever, asthma, hives, eczema and other diseases are linked with allergic conditions.

Tomatoes Brought Fame to Town A quaint community of more than 1,000 persons living on the north end of Majorca, one of the Balearic islands, off the east coast of Spain, gained its fame as a producer of a single variety of tomato, which was the community's sole means of support. The islanders planted millions of vines of this single variety each year, but they had to overcome almost unbelievable hardships to do Their island is mountainous, to procure level patches of ground the Majorcans built by hand great stone walls, 10 by 15 feet high and several feet thick, thus forming a series of mountain-side terraces. Then they built concrete reservoirs for irrigation water, moistening the terraces by intricate irrigation sys-

Alligator Pears

There are numerous varieties of alligator pears, distinguishable by slight differences in foliage and the shape of their fruits. The seedlings, such as are started in the home or the greenhouse, have the same deep rich green laurel-like foliage, and are attractive in appearance. The leaves also have a pleasing aromatic odor resembling that of anise.

Strand Once London's Gay Spot In Victorian times the Strand was the gayest spot in London. The center of gayety later moved toward

Egyptian Sudan's Dust Storms Enormous dust clouds, "haboobs," blanket Khartoum in the Egyptian Sudan on an average of 20 times Numerous Names for the

Friendly Black Cherry The wild black cherry has quite a few names which reveal that it is sort of a friendly all-rounder, appreciated by the farmer and the lumberman. Among the names for this tree, observes a writer in the Chicago Tribune, is cabinet cherry, which tells how valuable the wood of the tree is in making furniture. Then there is the intriguing name of rum cherry.

The wild cherry tree is a familiar figure in the woods. It is apt to give you the impression of being a rather unconventional tree compared to the dignified manner, assumed by the oaks. It isn't pardiscriminating ticularly about where it grows. Then, too, it is unconventional in contour. trunk is apt to be crooked and the foliage is thin and drooping.

The happy-go-lucky cherry tree, growing most anywhere in the woods, along the fences or wherever it may take seed, looks much like a character that has tried hard to be correct in every detail. But apparently it has been too much trouble to be precise and stand formal and reserved like an oak.

Although the useful wild black cherry tree may not impress you as you look over the landscape and see it in comparison to the stately elms and the big oaks, it really joins the elite among trees when you consider its wood. It is close grained, takes a fine polish and has been used much to imitate mahogany and for making furniture. But its usefulness doesn't end there by any means. The bark of this rugged old species is used in medicine since it contains an ingredient of tonic prop-

Indian Chief Powhatan Scared by the English

The Indian Chief Powhatan was the father of Pocahontas, and his original name was Wahinsonacock, notes a writer in the Indianapolis News. He was one of the most powerful sachems connected with the early history of the United States. His rule covered most of the territory now embraced within the states of Maryland and Virginia. He had residences in different parts of his country and changed his abode at different seasons of the year. At the time of his first acquaintance with the English in 1607 he was about sixty years of age.

He was tall and well-proportioned, capable of enduring great fatigue. He showed his friendliness to the English by sending them much needed articles of food. However, the conduct of the English was so ill-advised and often so unjust that they were continually in trouble with him. Two or three times he planned war against the English, but without result. At one time an accident occurred which had a great effect on him. Some of his men had obtained powder from the English and were experimenting with it when a powerful explosion took place, killing several. This so greatly increased Powhatan's reverence for the English, or fear of them, that he sought peace and sent to the

colony nearly half his crop of corn. On the death of Powhatan, at an advanced age, his brother, Opechancanough, succeeded to the throne, in accordance with the custom by which a brother took precedence over a son as heir of the kingdom.

Circus Giants Die Young

There are two kinds of tall men. The first kind is a normal individual who is tall because of inherited factors received from tall parents or more remote ancestors. The second kind includes those whose normal pattern would be of medium height, but who, because of some upset of the glandular system, develops very long legs and other bone abnormalities. The tallest men are included in the second type, which is well known to the public as the circus giant. Record of seven men whose height ranged from 7 feet 6 inches to 8 feet 7 inches were secured and it was found their average age at death was thirty-four years. The oldest lived to forty-five and the youngest to twenty-nine years. The mortality data of 20,000 men ranging from 6 feet 2 inches to 7 feet 1 inch obtained from records were examined and it was found that the tall men had a practically normal mortality for their age.

The Base for Paint

Paint generally is composed of a base, a vehicle and a drier. The base is the chief ingredient of the paint, and may be one or a combination of several different compounds, such as white lead, zinc lead, zinc white, red lead, iron oxide, and others. When the desired color is not obtained by the use of bases, additional coloring pigments, such as chrome green, Prussian blue and the like, may be incorporated. The vehicle is the liquid portion of the paint, which gives it its covering quality; the commonest is

Wrote "Alice in Wonderland" The author of "Alice in Wonder-

land" was Charles Lutwidge Dodgson, a young cleric and mathematician, who invented the fantasy in 1862 to please the children of his friend, George Liddell. At their insistence, he continued the incredible adventures of Alice and three years later published them under the name of Lewis Carroll,

Goliata's Height The Bible states that Goliath, the giant whom David slew, was six cubits and a span in height. A. Hebrew cubit is equal to 17.58 inches, and a span of 8.79 inches. Goliath, then, was nine feet, six inches in

Lowell Thomas At Art Institute Sunday, Oct. 10

A unique presentation of the Japanse-Chinese situation will be made by Lowell Thomas, famous World-War reporter and radio commentator, and his sister, Pherbia Thomas, long a student in Japan of Japanese life and policies, when they appear next Sunday evening October 10 at 8:30 in the Detroit Institute of Arts, Woodward at Kirby.

Mr. Thomas will also appear on the egular Sunday afternoon program of the World Adventure Series next Sunday at 3:30 in the Detroit Institute of Arts auditorium. He will give his popular lecture, "Through Romantic India and Into Forbidden Afghanistan." This ecture will be illustrated with the motion pictures which Mr. Thomas took during his dangerous expedition into he wilds of Afghanistan.

Grosse Pointe Library

Many young patrons of the Grosse Pointe Library report that reading during the summer months was fun. A Book Cruise organized early in June was terminated October first. The boys and girls received cruise tickets on which they enjoyed this summer. When eight books were read the Cruise was completed. The names of the passengers who made a happy landing are now enrolled on a Book Cruise poster in the library.

The books recorded on the cruise rickets offer helpful suggestions to other young readers.

An Eskimo Delicacy

Giviaq is an Eskimo food consisting of auks-birds about the size of starlings-pickled in oil. It is considered a great delicacy.

Christian Mission Blue Laws The Christian mission established

at Schoenbrunn in 1772 laid down about twenty rigid rules of conduct and government. Here are a few of them: "No one that attendeth dances, sacrifices, or heathenish festivals, can live among us. A man shall have only one wife. . . Likewise a woman shall have but one husband and be obedient unto him. We shall not permit any rum or spirituous liquors to be brought into our towns. No one is to go on a journey or hunt without informing the minister or stewards of it. Young people are not to marry without the consent of their parents, and taking their advice."

Green Tea Is Unfermented Green tea is unfermented, where-

as black tea is produced by allowing the plucked leaves to wither and ferment for a time.

Gauoline Once Waste

In the old days, gasoline was towed out to sea and dumped as a waste by-product of kerosene.

Chromium Is a Silvery,

Hard Crystalline Metal Chrome yellow, chrome steel, chrome leather, chrome green, and chrome alum are the names of a number of outwardly highly dissimilar materials, and the layman may wonder why a single adjective, chrome, is used to describe all of them. The word means that they all contain the element chromium, a substance whose unusual and varied properties give it an unusual position in the chemical industry, says Dr. Thomas M. Beck, in the Chicago Tribune.

Chromium is a silvery, hard, crystalline metal. It is about as heavy as iron and melts at about the same temperature. It is obtained chiefly from the ore chromite, which is found in a few scattered deposits, chiefly in Rhodesia and New Caledonia. The ore is a compound of chromium with oxygen and iron. It is worked up by roasting with soda at high temperatures in a current of

chromium with oxygen and iron. It is worked up by roasting with soda at high temperatures in a current of air. The resulting mass is then washed with hot water, which dissolves the chromium content as one of its compounds, sodium chromate, which may then be converted into the other desired compounds of the metal.

The name chromium is derived from a Greek word meaning color. The compounds of many metals, such as aluminum, lead, or zinc, are colorless (unless, of course, they are combined with some color-producing element). Compounds of most other metals exhibit a single characteristic color, such as the blue of copper compounds or the green of nickel. But the many compounds of chromium present an array of color that can be matched only by Joseph's coat.

Lots Drawn in 1789 for United States Senators

When the nation's first senate was organized on May 14, 1789, only ten states were represented, the others not having accepted the Constitution, notes a writer in the Cleveland Plain Dealer. The twenty senators were divided into three classes, one of six members and the other two of seven members. One member of each class then drew lots, the class drawing number one to serve two years; number two to serve four years, and number three, six years. The lots were so arranged that no two senators from a state fell into the same class.

So the country had three sets of senators, one retiring in 1791, the next in 1793, and the third in 1795. The system so established has never been changed.

As the other states sent senators they were admitted and assigned by lot in the same way. As their terms expired, successors were elected for the full six-year term. Senators from new states, by the enabling acts admitting the states, were also assigned so as to keep the three classes even.

Cacti Native of Americas

With one exception, all of the cacti of the world are native to the Americes. From here they have been transported to the far corners of the earth, and are very much at home in Africa, the island of Mauritius, and even in Ceylon, according to a writer in the Los Angeles Times. In Australia and other sections of the globe they grow in profusion, until a traveler has been fricked into thinking of them as indigenous to those countries. Yet it is in the southwestern portion of the United States, Lower California and old Mexico and some sections of South America that they are found growing in their native state most abundantly.

Some species of cacti, like the tuna, are edible, while others are deadly poison; a few contain juices which are intoxicant and some bring on insanity. The Opuntias Nopaleas bear fruit which is commonly called prickly pear. The products of certain species of Echinocereus are called alichoches by the Mexicans and strawberry cacti by Americans—due to the fine flavor of the juicy pulp.

. Food Plants Used by Indians

A lichen growing on the bark of pine and fir trees in the Columbia river area which was sprinkled with water, allowed to ferment, then rolled in large balls and baked in an oven, was one of the favorite foods used by the Indians. The palatable roots of the arrowhead which were boiled or roasted by nearly all the Indian tribes. The annual wild rice, which grows in great fields along the Potomac and was one of the most important of all Indian cereals. It is not a true rice, but is almost indistinguishable from that grain. The corme of the jack-in-the-pulpit was known as Iroquois bread root. The sumac, whose acid fruit was used to make cooling drinks resembling lemonade. The fruits of numerous wild roses were eaten both fresh and dried.

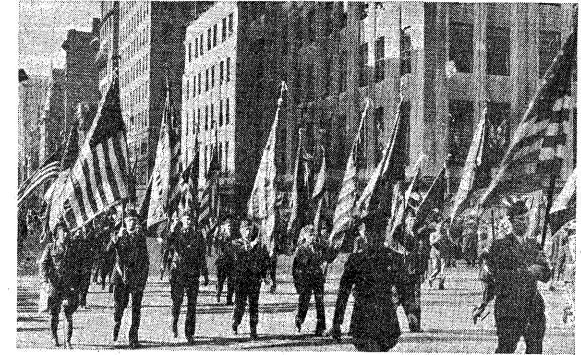

Leaf Skeletons for Scrap Book To make leaf skeletons place the leaves in a little rain water to which

leaves in a little rain water to which a trace of yeast has been added. Allow the fermentation to proceed until the membranous portion becomes soft and easily washed away in a stream of water. Bleach by dipping for a few minutes in a strong aqueous solution of sulphurous acid gas, or exposing them, while moist, in a box filled with the vapor of burning sulphur.

Origin of Word "Almanac" is unknown. It is supposed to be the Arabic words "al" (the) and "men" (month) combined. The oldest fixed date in world history is 4241 B. C. In that year Egyptian astronomers introduced the "year of 365 days," the one we use today.

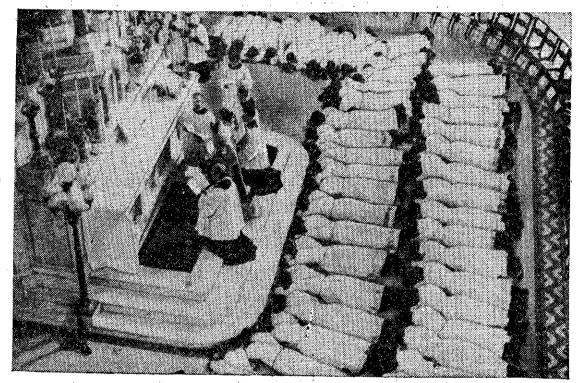

Happenings of the Nation Told in Pictures

Massed Colors Lead the Legion Parade

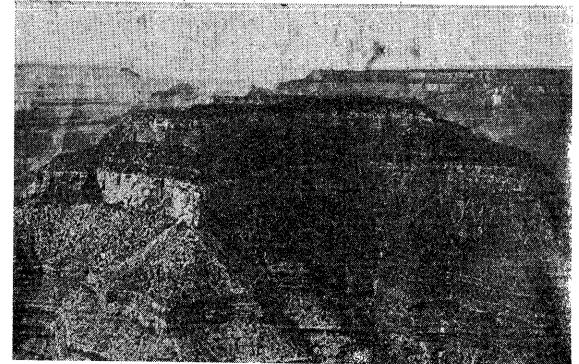

Two hundred thousand strong, members of the American Legion paraded down Fifth avenue, New York, in a procession that lasted for nearly 24 hours. View above shows the massed national colors which were in the vanguard of the marchers, who were attending the organization's nineteenth annual convention.

As 31 Young Men Entered the Priesthood

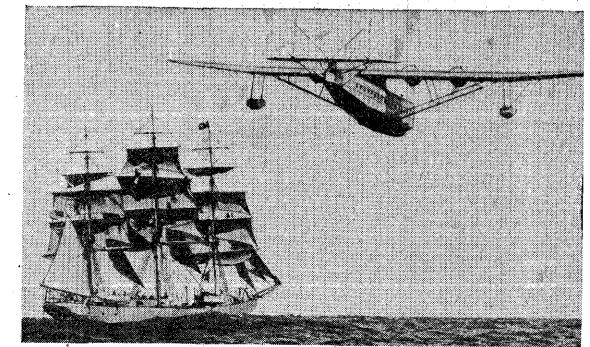

An impressive view of the ceremonies at Latrobe, Pa., as Bishop Hugh C. Doyle of the Pittsburgh diocese ordained 31 young deacens to the Pression. And common are some of the 21 men who were ordained as sub-deacens.

Island in the Sky Explored by Scientists

Shiva Temple, wooded plateau in the Grand canyon which has been explored by man for the first time in history. An expedition headed by Dr. Harold E. Anthony scaled the hitherto unreachable island in the sky to study animal life believed to have been isolated for thousands of years,

Clipper Ships of Today and Yesterday

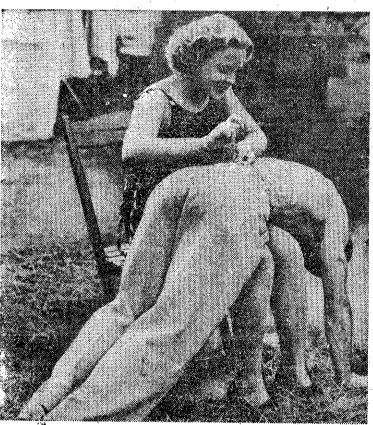

Pan-America's Bermuda clipper is shown circling over the Seven Seas, one of the few remaining fullrigged ships, as she jockeyed for position at the start of the race from Bermuda to Newport, R. I. The Joseph Conrad was her opponent in the race.

"Dickie" Brings Help in Nick of Time

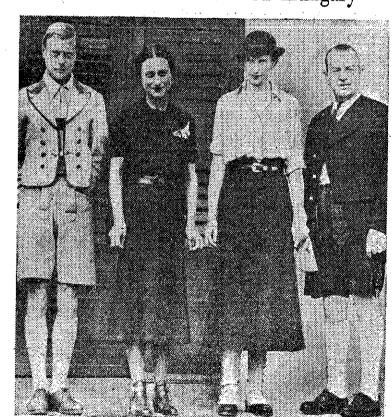

Mrs. Christine Toth, seventy, of Lucaston, N. J., fondling her pet poodle, Dickie, after the dog had been instrumental in saving its mistress' life recently. Ill from toadstool poisoning, Mrs. Toth wrote a note, "Help, I'm dying. Mrs. Toth," tied it to the dog's collar and sent him out of her house. The dog's shrill barking awakened Rev. Harry R. Stockton, pastor of the local Methodist Episcopal church, early in the morning. Noticing the note, he telephoned for a doctor who sped to Mrs. Toth's side, reaching her just in time to save her life.

A Stitch in the Britches Just in Time

But what if the needle should slip? This snapshot was taken at a holiday camp on the Kent coast in England, allowed the fair needlewoman obliged her unlucky companion.

When Windsors Visited Hungary

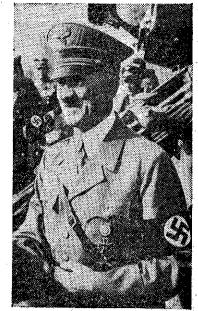

The duke and duchess of Windsor and their hosts, Mr. and Mrs. Charles E. Bedeau, pose in native costume before the latter's hunting lodge at Bordsodivanka, Hungary, where the Windsors were guests recently. The duchess stayed at the French villa of the Bedeaux for a time after she left England last winter.

America's Youngest Freshman

Joanna Xenos, thirteen, daughter of a Chicago cook, is America's States youngest college freshman this fall. She matriculated at Mundelein college. Miss Xenos, shown above, is working in the chemistry laboratory. He has been famous as a prodigy ever since she was seven years old.

HITLER DOLLED UP

Dressed in a faultless uniform, Chancellor Adolph Hitler is greeted on his arrival at Nuremberg, Germany, to attend the National Socialist congress.

PHOTO SAVED A LIFE

A copy of the original photo sent to Gen. Francisco Franco by Mrs. Harold Dahl in a plea to the rebel leader for the life and freedom of her husband, Harold Dahl of Champaign, Ill., who was captured by insurgent forces while flying for the Spanish government in the civil war. Impressed by the beauty of the American girl, Franco spared the life of her husband and promised he would be freed.

SKI FASHION FLASH

Paris.—Weird, but fashionable, is this ski addict, clad in Schiaparelli's latest outfit made of black wool and previewed at a Parisian salon. The boyish knee pants are held at the back with buckle and strap. The "shocking pink" helmet is hand-knitted. A short jacket and long, loose coat complete the ensemble.

LEGION COMMANDER

Daniel J. Doherty, Boston attorney, who was elected national commander of the American Legion at its recent convention in New York city. Doherty was born in Woburn, Mass., in 1894, enlisted in the United States navy in 1917, where he served as a warrant officer during the war. He has held many posts in the Legion.

U of D Sport Shorts

Anvil Andy Farkas, the University of Detroit's hard running halfback, promises to be among the country's leading scorers this season. He rang up 30 points in the opening game, scoring five touchdowns in the 13 minutes he was on the field. He led the team in scoring last season and undoubtedly will do so again.

strongest points in the University of own plays. The idea is that he will Detroit team's play this fall. The detect flaws and see chances for im-Titans work out daily on a complete provement that might escape the notice set of dummies placed to represent of the coaches, whose position on the defensive players. "Buving a new T LAMP?

most important things you can do is look for this reflector!"

You may think it doesn't matter what kind of a lamp you buy, so long as it is attractive and matches the decorative scheme of the room. But if you are buying a lamp to give LIGHT-for reading, sewing, studying, playing cards, or any other close-seeing task-then you want only one kind of lamp: the reflector lamp. These famous lamps were developed to help guard against eyestrain. They are made in hundreds of attractive styles by many different manufacturers.

For example, a reflector lamp corrects the evils of glaring, spotty or insufficient light. A translucent bowl under the shade diffuses the light, giving it good distribution both upward and downward. The bowl controls the quality of light by diffusing and preventing glare. Part of the light is reflected to the ceiling to provide general illumination. A reflector lamp furnishes soft, even, restful light that enriches the color and beauty of a room and its furnishings, and helps to prevent eyestrain.

There is a reflector model exactly suited to your needs-styled for your home and to fit your pocketbook. See the wide assortment of these smart new lamps today.

THE NEW REFLECTOR LAMPS ARE ON SALE AT DEPARTMENT STORES AND ELECTRICAL DEALERS

THE DETROIT EDISON CO.

lilversmith Paul Revere

Artisan of High Renown Although examples of silver made by Paul Revere were among the first sought after by collectors, his activities in the American Revolution and his versatility in other fields have somewhat overhadowed his achievements as a silversmith. Much picturesque information was gathered about Patriot Paul following Longfellow's stirring recital of his midnight ride.

In addition to his craft as silversmith, he was one of our first engravers of copperplate prints and almost the first American industrialist in the production of copper and brass, says the American Collector. Born in Boston, 1735, during his eighty-three years of life, his natural facility was so marked that Revere, the silversmith, was sometimes subordinated to his other accomplishments. Yet had he done nothing else but cleve to the trade learned from his Huguenot father, he would still be one of the most important American workers in silver. In 1754, the same year that Chippendale published his book of furniture designs, the elder Revere died and Paul, a journeyman at nineteen, took over the management of this long-established shop. From then until about 1800, when he largely forsook silvermaking for his copper manufacturing enterprises, Paul Revere was an active and prolific silversmith.

From 1774 to 1780 he played his part in the Revolution by acting as courier for Massachusetts, printing paper money for the Continental congress, repairing spiked cannon abandoned by the British and serving as lieutenant colonel of an artillery regiment. Then he returned to his original occupation, expanding it to include operation of what he termed a "hardware shop." In it he sold everything from gold jewelry to spectacles and shoe buckles and, of course, table silver and candlesticks. Much of this stock in trade was undoubtedly the product of his own skill and that of his workmen.

Elephants' Legs Strong;

Are Set Perpendicularly As to the elephant's agility, it is pertinent to read the interesting statement of Zoologist Ernest Protheroe, F. Z. S., concerning the elephant's legs:

"In order to support the enormous weight which rests upon them the legs are very stout and are set perpendicularly, without that bend in the hinder leg which is found in most animals. This pillarlike structure is of infinite use when the animal climbs or descends steep acclivities, which it can perform with marvelous ease. Considering its bulk, the elephant is remarkably active; it can lie down and regain its feet as easily as a dog; it can stand upon its hind feet alone, or erect itself upon its forefeet; and it can even stand upon its head. It cannot trot or gallop, but nevertheless can move along at eight miles an hour if needed . . . A ditch seven feet wide would prove a complete bar, as the animal's maximum stride is only six and a half feet, and it cannot jump an inch."

The statement about the elephant's pace is probably an understatement, for hunters would have no need to fear an animal whose speed was limited to eight miles an hour. Zoologist G. M. Vevers, superintendent of the London zoo, says: "Both species of elephants are fast movers over a short distance, and a speed of fifteen miles an hour is not uncommonly kept up for a quarter of a mile or so, but whereas the African can keep up a speed of ten miles an hour for several hours on end, the Indian, being shorter in the leg and more cumbersome, cannot maintain a speed of more than six or seven miles an hour."

Rivers Flowing North

The United States Geological Survey bureau says that the Red river of the North, which forms the boundary between Minnesota and North Dakota, flows north for part of its course; the Monongahela flows north from West Virginia to Pennsylvania, where it joins with the Allegheny to form the Ohio river; the Niagara river, connecting Lake Erie and Lake Ontario; the Tennessee river, where it crosses the west end of the state of Tennessee; the Snake river, where it forms the boundary between Oregon and Idaho; John Day, Deschutes and Willamette rivers, tributaries of the Columbia river in Oregon; the Missouri river in the vicinity of Helena. Mont., and a part of the course of the Salmon river in Idaho, all flow north. Others having courses between north and northwest include the San Joaquin and Eel rivers in California, Kootenai river in Idaho, Mouse river in North Dakota, Kentucky and Licking rivers in Kentucky and the New-Kanawha river in Virginia and West Virginia.

Coldest Spot on Earth

The coldest spot on earth is not at either pole, says John Theaman in Globe magazine. It's a town in Siberia known as Werchojansk; here the temperature often falls as low as 80 below zero, and has gone as low as 95.6. The natives of this town live in crude wooden huts, with windows of thin ice cemented in place by pouring on water which freezes quickly around the edges. Walking in such cold air causes the breath to freeze, falling to the ground in a white powder.

Holy City of Rabat
The holy city of Rabat, center of
French Morocca, is best described as a cold country with a hot sun, a land of quinces, pams, olives, figs and cherries. The Morocco landscape is also notable for forests of cork and of cedar.

First Railway Mail Was Begun During Civil War

The railway mail service came into existence during the Civil war. As early as 1838 congress approved an act making every railroad in the United States a post route, and prior to that time many railroads had demonstrated their worth as speedy mail carriers.

The first use made of the facilities of the railroad was slight and generally consisted of a compartment in the end of the baggage car, which was padlocked after the mail was stowed away and opened after the run had been finished. Later a larger portion of the baggage car was given over to the postal authorities, who fitted it with enough facilities for the distribution

of local way mail. This was not an American invention at all but had been copied from similar systems in use in France, England, and even in Canada. Although credit for the system which in use has often been attributed to George B. Armstrong, who was assistant postmaster in Chicago in 1864, that is not proper, for W. A. Davis, a clerk in the St. Joseph. Mo., office actually conceived the idea in 1862, according to a writer in the Chicago Tribune.

Davis suggested that the complete sorting of mail on the train between Quincy and St. Joseph would allow the overland mail to set out several hours earlier than was the case were the sorting done at St. Joseph. He received permission to try out the experiment on this line and there are complete documents in the files of the Post Office department and of the Burlington railroad to show that it was successful.

Brilliant Dunes Sumach

Recalls Indian Legend According to the Indian legends which flourish in the region of the Michigan coast, one of the tribes was driven by a forest fire from its hunting ground to the shores of Lake Michigan, where the sand hills gave them refuge from the flames, recalls a writer in the Chicago Daily News.

Everything in the path of the flames had been destroyed and the ordinarily plentiful wild life had fled or been annihilated. Surveying the blackened countryside, the Indians felt they were doomed to starvation, but one Indian brave volunteered to go in search of meat. He departed, leaving his sweetheart, who vowed to keep a signal fire burning constantly on the highest dune until his return.

Her lover never returned. The Indian maid pined away slowly but never failed to climb to the top of the highest dune to keep her signal fire lighted. One day she failed to return to the camp the tribe had built in the near-by valley.

Her brothers made their way to the top of the dune and found she had died there. They found, too, that in the dead ashes of the signal fire what appeared to be a flame was growing. The living flame continued to grow and to spread until it covered all the dunes, and thus the sumach came into being-and still covers the Michigan dunes with flame in autumn.

Royal Dreams Typified by Palms The desire of every man to be a king is typified by Rio de Janeiro's great number of royal palms. Dom Joso, king at the beginning of the Nineteenth century, had planted the first seed of the royal palm himself and ruled that the tree was to be exclusively his. To preserve his monopoly he ordered every seed from it gathered up and burned. but the residents of Rio who wanted to imitate royalty bribed his slaves to sell the seeds. As a result royal palms soon sprang up everywhere.

Only Dickens Statue

A statue of Charles Dickens and little Nell, one of his famous characters, is in Clark park, at Fortythird street and Baltimore avenue, in West Philadelphia. It is the only one ever made of the novelist, says a writer in the Philadelphia Inquirer, because his son discovered a clause in his will asking "never on any account to make me the subject of any monument, memorial or testimonial whatever." The work is by F. Edwin Elwell. It was exhibited at the World's Columbian exposition, where it received a gold medal.

Deep-Red Rubies From Siam Many of the best rubies have been

found in Siam in the provinces of Krat and Chantaboon, where are located the principal ruby mines of that country. The stones are usual-ly found in detrital matter about 20 feet below the surface. 'The rubybearing gravel is less than a foot in thickness and lies between a clay bed and a heavy covering of coarse sand. The usual color of the Siam rubies is dark red, running al---at to a blackish shade of red.

Ill Luck Followed Ship The Great Eastern or Leviathan,

as she was originally called, the English steamer, built in 1857, at the time the largest steamship affoat, encountered nothing but ill luck from the time she was launched. commercially a great failure. When broken up in 1888, the cause of her bad luck, according to sailor superstition, came to light in the discovery of a human skeleton wedged between her inner and outer skins.

London Only Mile Square Although the county of London,

including London boroughs, has an area of 115 square miles, the actual city of London is but one square mile in area. It is known as "the most valuable square mile in the

The State of Michigan has had two very good high school A Cappella choirs Not all of the songs are sacred, howone of Flint Central high school, and ever. Some come from the Russian and another at Lansing Central high school.

> A group of professional singers under the direction of Noble Cain, which broadcasts every Sunday afternoon under the name of the Chicago A Cappel-

la choir, is also outstanding.

Many colleges have A Cappella

choirs. Those of Oberlin and the Uni-

versity of Minnesota are particularly

Mr. Watkins hopes to add about 20 voices are especially needed. Applicants should see Mr. Watkins before making out second semester programs.

The choir does not expect to appear in public before Christmas. Mr. Watkins hopes to develop a student conductor for public appearances by that time. "A Cappella Choir is very different

from anything we've had here before. It is interesting to work out pieces with no accompaniment. All the voices seem to harmonize very well, and we have many good singers. Everyone seems interested and wishes we could meet every day instead of just three times a week. In the near future we have faint hopes of having robes for everyone in the choir the way the Ford Sunday Evening choir has," said Joan Reutter. AA1, one of the members of the choir.

Standing committees of the Grosse Pointe High School Teachers' Club were announced last week by Mr. Harold Husband, president.

The program committee consists of Mr. Paul Rehmus, chairman; Mr. William Mann, Mr. Paul Junge, Mr. Donald Campbell and Mr. Herbert Hobart. Mr. Harvey Christensen, chairman,

Mr. James Anderson, Miss Isabelle Mc-Kellar, Miss Warrena Rhodes, Miss Estelle Hottenstein, Mrs. Anne Majneri, Mr. Ernst LaFollette, Miss Louise Lovejoy, and Miss Adelaide Schmidt comprise the entertainment committee.

The economics committee consists of Mr. Charles Saltzer, chairman, Mrs. Lucile Mullen, Mr. William A. Hamilton, and Mr. Kenneth Cary.

Miss Doris Trott is chairman of the ublicity committee.

John Haldeman, 12A, was elected president of the Grosse Pointe High school Forum last week. Eddie Hickey, 11B, was made vice-president, and George Vandeputte, 12B, secretary.

All student government legislation is discussed by the Forum and new bills may be suggested by its members. Its membership consists of one person from each homeroom, or two in the case of double home rooms.

John Haldeman, new president, has been president of his home room. He is on the varsity football and tennis teams. He is a member of Service Club, has been a Forum member for the last two years, and is a member of Hi-Y. Eddie Hickey, vice-president, is

known for his cheerleading. He has been a homeroom officer and a member of Hi-Y and Service Club. Eddie also belongs to the Conservation Club. George Vandeputte, secretary, is

secretary of Hi-Y, and president of his home room. He was on the track team last spring and is now on the reserve football team. He holds letters in inamural sports and he is a member of Service Club.

The first Student Association dance of the five to be held this year is scheduled for Saturday, October 16, from 8:30 o'clock to 12 o'clock. The admission is 50 cents per couple and 75 cents

Bob Russel, 12A, is general chairman with Bob Hynes, 12A, in charge of ticket sales; Walter Auch, 11B, chairman of the decorations committee; Sue Stephenson, 10A, chairman of refreshments; Clayton Schwarz, 12A, publicity manager: and Jane Baits, 12A, chairman of the orchestra committee.

A new arrangement has been made to take care of the people who wish to bring outsiders. These people are to turn in the names of their guests to Dick Talcott, 12A, president of the Student Association by Monday, Octo-

Student Association dances were inaugurated last year, and were so successful that their continuation was a point the majority of Forum representatives were instructed to bring up at the first meeting last week.

Besides the Student Association dances there will be four proms, making a total of nine dances this year or an average of one dance a month.

A 7B open house will be held at the high school Monday. October 11, to give parents of 7B students whose classes meet in the Cadieux Annex and the high school building an opportunity to meet classroom and homeroom teach-

Parents will meet teachers and be shown about the school building from At 8:30 parents will assemble in the

auditorium, where they will be welcomed by Mr. Paul Rehmus, principal. A skit presented by 7B gym classes and singing by the Gice Club will entertain the guests. Mrs. Ruth Flom, dean of girls, and Mr. Charles Leavitt, assistant principal, will be introduced to the

Rooms will be open after the auditorum program, for further inspection. Exhibits will be displayed in some class-

supervision of Mr. Forrest Geary.

fer school, Trombly school, Mason, and He makes all that is made." Cadieux and the high school provided recreation for an average of 1,000 persons a day. For the boys there were such activities as hard ball, softball, horse shoe pitching, handcraft, tennis, croquet, pingpong, and volley ball. The girls played soft ball, tennis, pingpong, voices to the choir next semester. Bass croquet, danced and took part in handcraft. There were teams for men in hard ball and soft ball, and they played tennis and horeshoes.

> There were 37 teams competing in the different divisions of the soft ball and hard ball leagues and a total of 316 scheduled games. Six championship eams were crowned. Their names and schools represented are the following: Featherweight soft ball - Hornets Defer playground) Featherweight hardball-Bears (Ca-

Midget hardball-Indians (Trombly)

Senior softball-Pointers (Defer). Senior hardball - Farms (High Girl's softball-Defer.

As a special feature the Detroit Civic Orchestra of 50 pieces gave four concerts on the high school lawn. These programs started August 19 and ended September 9. It is estimated that an average of 600 people attended each

The playground season last from June 21 to September 4 starting at 9:30 a m. and finishing at 8:30 p. m.

A staff of twelve men and women were in charge of the various playfields. There names are as follows: Frank Banach, Kenneth Carey, John Finch. Frank Wilcenback, Jack Gladden, Lois Oldham, Halcitia Bruce, Mary Broughton, Elwood Dixon, John Semroy and Florence Bell.

The recreational program is a Board of Education project.

Christian Science Churches

"Are Sin, Disease, and Death Real?" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world on Sunday, October 10.

The Golden Text, from Romans 8:2, s: "The law of the Spirit of life in Christ Jesus hath made me free from the law of sin and death."

Among the Bible citations is this passage (Romans 13:12): "The night is far spent, the day is at hand; let us therefore cast off the works of darkness, and let us put on the armour of

Correlative passages to be read from

he Christian Science textbook, 'Science During the past summer an exten- and Health with Key to the Scriptures,' sive program was carried out on the by Mary Baker Eddy, include the folvarious school playgrounds under the lowing (p. 472): "All reality is in God and His creation, harmonious and eter-The playgrounds which include De- nal. That which He creates is good.

> Capacity of Human Stomach The capacity of the human stomach depends upon the size of the person and varies in the adult from four to five pints.

Foregumer of the Cigar
The precursor of the cigar was
a roll of tobacco leaves smoked by primitive South American Indians.
