School Monday; Building

Grosse Exaggerations By A. PRYOR

Maybe we've got community-itis, but we're THAT excited about the growing pains of Grosse Pointe. NOW we hear that Arthur Paselk, the florist, will soon be moving to new and attractive headquarters, being built on Radnor Hall Place. With all this shifting around and new snops moving to the Pointe, we'll soon have a little "down-

is doing, so I will tell you. My mistrees and master, (who died a fortnight ago), were very much in love. When my master was on his death Jean Taylor. bed my mistress went bitterly and go into a nunnery.' My master replied. Swear not that, but if you MUST increased to provide an additional swear, swear that you will not marry again until the sod on my grave is vastly increased registration of library of the numerous librarians present. dry.' Yonder sits my mistress, sir,fanning the sod."

The elite of Grosse Pointe have forsaken the ubiquitious cocktail for many little men sitting on the foot! of your bed the next day, when you stick to toddys the night before. Now that the war is causing a scarcity of Scotch whiskey and French vermouth we may have to dust out the bathtub and get to work. We may even have to go back to that horror or horrors, the 'orange blossom,' but that won't worry your columnist, who has learned that the best drink of all is Pepsi-Cola! (Not an 'ad,' we just have a sew shares of stock in the Company!)

Well, the bowling season is back again with a rush, bringing out the amazons of the alleys"; those women whose tennis game is a 'wow,' whose golf score is always in the late eightys or gay ninetys, and who send the ball down the alley with a 'woosh' that makes the men feel like worms. Maybe its sour grapes with us, since we are one of that small army of wives who always sit on the sidelines and are Group," will be guests of their chairknown as the 'sports wallflowers.' Of course we could join that other little man, Mrs. Harry B. Alger, in her home timid group, the high-heel players, who take about en mincing little steps to which time plans will be outlined for the foul line and let the ball trickle out of their hands, then everybody has time for a round of drinks before the ball reaches the pins and feebly wobbles them over, but we'd rather sit and exercise our risibilities.

And now, if you will forgive our moral aphorisms and pedantic extremes, that insidious creepage of thought that flows to a brain more apartan than gargantuan, has ceased to fulminate, but next week we shall dren if the child shows any indisposiaspire to the necromancy of words, if ition or has a cold, because it might be you will excuse a little rodomontade. the first symptoms of polio.

St. Ambrose Altar Society Card Party

The St. Ambrose Altar Society will give a card party on Thursday, Octoher 5, at 2 p. m. in St. Ambrose gym. Mrs. James Griffith is chairlady, assisted by Mrs. John Verlaufen.

Everybody is welcome.

We Regret That This Happened Public To See Pierce

It has always been the policy of the Grosse Pointe Review, to print with impartiality, all letters dealing with local interests and problems and our readers have heretofore co-operated with us by signing their names and addresses on any letters that they have asked us to print: Last week, we printed a letter about the Grosse Pointe High School, which was sent to us by John F. Smith, 23 Oak St. On checking up, we found that there is no such person and no such address. We'd like to apologize for printing this letter without having first checked up on thewriter, who was apparently afraid to back up his statements and therefore used a fictitious name. We would like our readers to know that in the futuge we shall make a careful check on the authenticity of any lesters printed in the Public Letter Box, and we sincerely hope that you will continue to voice your opinions through us and not be ashamed to sign your names. Any Grosse Pointer who has the interests of his community at heart, quant to welcome the opportunity of sharing his ideas with others. without having to hide behind an

Barbaric Jewelry Late Style Fancy

Attention Centers Largely On the Speciacular.

By CHERIE NICHOLAS You may go as far as you like with no restrictions when it comes to spectacular jewelry. Attention centers on necklaces which are of barbaric splendor. So embellishing and ornate are the new necklaces they constitute the entire trimming feature of the majority of simple black frocks such as are so outstanding on the style program at the present moment.

Not only does fancy turn to massive gold effects, the majority of wnich interpret bib and plastron motifs formed of dangling fringes and such, but the newest neck-laces are often of multi-colored stones worked out in a striking manner. A wide bracelet and matching earrings complete the ensemble.

Desinied for tremendous vogue is the new gold bubble-bead jewelry. The coils and strands of gold beads look massive and give the impres-sion of being heavy. In reality they are light as a feather. Jeweled gadgets pinned to coat lapels are smart this season as are also huge clips and brooches.

Perchance you are treasuring one or more big jeweled buttons that were cherished in the long, long ago by your mother's mother's mother. If so, fortunate are you. Lose no time in retrieving them from the old family chest, for in the present season's program old things have become new, especially jeweled buttons which are the last word in style, for the fastening of your smart evening coat of wool fabric or to adorn the fur-trimmed velvet jacket of your dressy afternoon suit.

Artichoke Green

For wear on early fall days, or beneath a coat during the winter. is this new shadow checked artichoke green (one of the se smartest colors) wool dress snort matching jacket. The fabric is chenille woven into rabbit's wool and the belt is gold metal. model was very much admired by the vast audience of visiting merchants who attended a preview showing of fall fashions presented recently in the Merchandise Mart, Chicago.

Vary Accessories For Fall Purses

Purse acc. slated to continue their popularity this fall. Combs and files in cases, ladies' wallets, leather cigarette cases and small, portable watches appear likely to be in considerable demand.

The greatest variety is likely to be found in compacts, where new designs taken from historic powder boxes and snuff boxes will be seen in large quantities.

Style Notes

Big tweed suit season is ahead. Corduroy stars for campus wear. Gorgeously colorful stone-set

ewelry will be worn this fall. Gray is featured for hats as well as for dresses and coats. Twists of gay wool knitting yarn trim turbans and brimmed

Massive decorations of gold a la militaire adorn the fall cos-Satin blouse for day, rich fabric blouse for evening is fall style

Lecture on Christian Science by Dr. Walton Hubbard, C.S.B. Under the Auspices of Sixth Church of Christ, Scientist, in Sixth Church Edifice, Kercheval and Manistique Aves., Tuesday Evening, October 3, 1939

A Lecture Christian Science

Entitled Christian Science: Its Healing Principle

by Dr. Walton Hubbard, C.S.B. of Los Angeles, California Member of the Search of Loctureship of The Mother Church, The First Church of Christ Sciences, Christ, Scientist, in Boston, Mace

Ohristian Science has been defined by Mary Baker Eddy, its Discoverer-and rounder, as "the law of God, the best good, interpreting and cem-constasting the divine Principle and rule of universal harmony" (Rudi-mental Divine Science, p. 1). It is into partness hope that those of you who have come here to learn about it may be enlightened by that which is said, and that God's law may be interpreted to you so that you may begin to demonstrate its blessings. To those who have an understandbegin to demonstrate its blestives. To those who have an understanding of Christian Science, who have purhaps progressed far along the way, may some word here spoken, some thought expressed, serve as a touchstone to unfold new spiritual visitas to you, and so to lead you hearer the goal of complete spiritual understanding and harmony. It is also my hope and expectation that those of you who have come here in the hope of healing may be healed, for the declaration of God's law not only interprets the rule but demonstrates it Mrs. Eddy has said that "The spiritual power of a scientific, right thought, without a direct effort, an auditie or even a minutal arguments. right thought, without a direct effort, an audible or even a montal argument, has oftentimes healed inverterate disease." (Rudimental Divine Science, p. 9). So the word that is about to he spoken, accompanied as it is by both audible and mental argument, will bring about its rightful measure of healing.

Caristian Science

Christian Science, the Science Consument Science, the Science of Christianity, is rightly named. Its teachings explain the divine Principle of this Science, just as the teachings of mathematics explain the principle of numbers. Further than their, rules are provided for the application of Christian Science, so that it may be practiced that at it may be practiced, just as a science of numbers has rules for its application, for its practice. Moreover, the results which follow the healing of sickness, the destruc tion of sin, the setting aside of ma-terial law prove it to be Science, and prove its Principle to be the Supreme Being, omnipresent and om-

presse Being, compresent and om-sipotent good.

It is evident, then, that if we are to get these results, the important thing for us to do is to make every effort to widen our concept of the true nature of God—to understand the beating and having first-pla. This may best be done by studying what others who knew God have east of Him, and by consemplat-ing the divine nature—by carneatly seeking to know Him.
Students of Contettan Science very soon discover that Mary Baker Eddy

seem discover that Mary Baker Eddy had a prefound understanding of Ched. They also find that because of this understanding she has revealed Jesus' teachings to us in a new light —that of the Christian Science which has tareht.

Jesus' Scientific Teaching

All Christians agree that Christ Jesus understood God. Now, Jesus temphs what he knew in the symasogues, and to the people, and to his disciples. It is interesting to note how frequently the Bible states that he "taught" the people. In fact, he himself declared that he "sat daily . . . teaching in the temple." And when they marveled at what he taught, he said, "If any man will do taught, he said, "If any man will do his [God's] will, he shall know of the doctrine, whether it be of God. or whether I speak of myself." Thus he declared that if any man uni-into practice what he taught, the results would prove the teaching to be correct. Throughout the Gospels on Jesus" recorded asymons or disin Jesus' recorded sermons or dis-sertations he discussed the nature of God. To the Samaritan woman he referred to God as Spirit and as Truth. He taught that God is Life, and in the latter days of his ministry he argued earnessly with his disciples that they might sain a leavethat they might gain a larger real-fraction of God as Love. He explained God, and man's relationship to Him, to all with sufficient spiritual receptivity to receive it. Our understandthe divine Principle, is wonderfully increased by comprehending what after Eddy understood about God. Her trachings not only reveal God in His true nature, as she understood Him, but the theology of Jesus is revealed and becomes practical to the through these same tearching.

After the companion of Jesus

After the completion of Jesus' ministry the disciples were obliged to demonstrate more fully for themto demonstrate more fully for them-selves the truth about God and man which he had taught them, because they were no longer able to turn over any of their problems to his superior understanding. Indeed Jesus repeat-ably declared that the spirit of Truth would not come to them except he went away. He pointed out to them that after he had gone and was no longer there to do the healing, thet the Comforer, the spirit of Truth, would come from divine Principle to them in larger measure and they them in larger measure and they would then forget their sorrow at his departure for the for of the realization of the demonstrable power of the Christ which had developed in

Primitive Christian Healing Restored

Two thousand years have elapsed since Jesus preached and practiced his understanding of God and of his understanding of God and of man's relationship to him. Encroached upon by materialicitic boliefs, spiritual understanding was dimmed and spiritual healing was lost, until in our own time it has again been made available to us. And his has come about through the reparkable spiritual unfoldment which time to Mary Baker Eddy and her billty to present this discovery in bility to present this discovery in rientific form, so that it may be udied, and with rules by which it ay be practiced, and so proved to

be the Science of Christ to each one

who demonstrates it.
A study of the lives of great men
will usually reveal that the various
experiences and events which occurred to them from childhood on were definite steppingsiones lead-ing up to the final manifestation of greatness. Each experience brought out and developed the qualities which were later manifested. These successive events were useful and successive evenus were useful and necessary experiences which helped to train the individual for his final work, or which indicated his tend-ency and aptitude for it. long before this final work appeared.

The Discoverer and Discovery

So it was in the life of Mary Baker Eddy. There are indications all along the way of her tendency and aptitude toward spiritual things. From girltoward spiritual things. From surlnood she was a writer, and one whose
contributions to newspapers and publications were accepted. Here then
we have the ability to write and to
express thought on paper which
prepared Mrs. Eddy for the immense
demand which was made upon her
later on in the publication of her
looks. These early writings conlater on in the publication of her books. These early writings conremed frequent references to God, which are evidence of the tendency Godward which she always manifested. We do not put God into frequent and daily expression unless we are thinking about Him. So Mary Baker Eddy thought about God, and talked about God, and searched for God fram childhood. As a child Mary Baker was delicated to the control of the contro

As a child Mary Baker was deli-cate and developed into a rather frail woman. Sine suffered considerably from sickness, and was much of the from sickness, and was much of the time a semi-invalid. Thus she had need of health, and characteristically, she searched for it. This very need of health was no doubt a factor in the spiritual unfollment which followed. She investigated humeopathy and other material methods in her search for healing, discarding them one after another as they failed to satisfy her thought or to permanent. them one after another as they failed to satisfy her thought or to permanently heal her body. Such beliefs might temporarily lead her to believe either in their efficacy, or their divine origin, but they could not long turn her aside or deceive her. It would seem natural that the desire to understand Good ritteb her desire to understand God which had been so understand God which had been so evident in her thought from her earliest childhood, and the desire for health and strength which was an expression of her daily need, should be more or less merged in the conviction that Jesus' healing was the result of the application of spiritual law, and that to understand God and lifts law would again result in healing. His law would again result in healing.

Mrs. Eddy's Studious Nature

In her childhood and youth Mary Baker was an unusually good student. Not only was she educated in the more common branches of learning, but she studied natural philosophy. She sten studied Hebrew and Greek under her brother Albert, who was a brilliant and profound and Greek under her brother Albert, who was a brilliant and profound student, a college graduate, and a young lawyer of unusual promise. His studious neture, in which his sistence and he seem allie, is indicated by his study of the Hebrew imaginage during his vacations. It is probable that the knowledge of Hebrew and Greek which Mrs. Eddy acquired at this time was of great help to her in her study of the Scriptures.

Summing up some of Mrs. Eddy's

Summing up some of Mrs. Eddy's outstanding characteristics. we find that from childhood she was a writer. That she was always a student, a philosophical and metaphysical student. That she was from early life a religionist, in its true spiritual sense. and that from young womanhead she was a constant searcher for the true method of healing. Coupled with these mental characteristics was a these mental characteristics was a quality of fidelity of purpose so that she persisted throughout her life in anything she undertook. It is prob-able that the sicknesses, sorrows, and disappointments which she experi-enced helped to hold her more firmly still in the course which she pursu The ultimate result of her searching was the discovery of the law of God, gradual unfoldment of Christian Science in her conscient

Appreciation of Mrs. Eddy

The Christian Scientist's gratitude to Mrs. Eddy increases as his growing spiritual understanding gives him greater dominion and frees him from material bondage. It would be im-possible for one who really has some derstanding of Christian Science to fail to express appreciation for the spiritual unfoldment which has come to him, because spiritual understanding is in itself so wonderful that the possessor of it cannot do other than express gratitude to the one who has enabled this wonder to be integrit about. It is of course impossible for us to go through the experiences which were factors in the spiritual development of Mary Baker Eddy. We may not possess the natural spir-itual tendencies and desires which itual tendencies and desires animated her in the same degree that she possessed them. But there is in the consciousness of each of us a spiritual desire which can be awak-ened and which, when directed and developed through the teachings of Christian Science, will lead us out of a material sense of things and make available to us the eternal law of healing. Each one of us must ap-proach God from the standpoint of his own individual experience, yet, each one to whom this unfoldment comes realizes with Isaiah that "Unto us a child is born, unto us given: and the government shall be upon his shoulder; and his name shall be called Wonderful, Counsel-The mighty God. The everlast-

ior, The migary God. The everlast-ing Father. The Prince of Peace." The Principle of Christian Science is God, and God is divine Mind. He is Life. Truth, and Love. Principle is first cause. It is that from which all proceeds; that which produces and governs. In order to practice this Science, it is necessary to understand its Principle—to realize in some degree what it means when we say that God is Mind, or that He is Life. Truth, and Love. What is the difference between the Principle and rule of Christian Science? According to Webster. "Principle emphasizes the idea of fundamental truth or reserved. idea of fundamental truth, or general application; Rule, that of more specific direction or regulation." A study of all the sub- number for God andens our understanding of the divine Principle of Christian Science and brings us under the beneficent direc-tion and regulation of its rule.

The first requirement in the practice of Christian Science is complete reliance on God. This means the acceptance of the dumipresence and cumipotence of God, and it therefore excludes any thought of medicine, or any other material remedy. This rule was advanced by Moses, in the First Commandment, and reiterated by Jesus when he asked which is the greatest commandment of all, de-claring at the same time the second to be like unto it, "Thou shalt love thy neighbour as thyself." This rule is again repeated by Mary Baker Eddy in the Christian Science textbook, page 467, where she says, "The first demand of this Science is, Thou shall have no other gods before me.' This me is Spirit, Therefore the commanu means ins: Inou snait navo no truth, no love, but that which is spiritual. The second is like unto it, Thou shalt love thy neighbor as thyself." So the command really means that we are to undertake to realize our perfection as the children of God, and realising it, we are to manifest it in all our ways. Let us, then, expectantly declare

it. We are God's children. And be-cause we are God's children, we are perfect in form and function, and in every essential of our spiritual being and individuality. Divine Love pro-vides us with an abundance of all good. The spiritual food which we need for our rightful nourishment is received by us through spiritual channels, which are as perfect as the Principle which provides them. We are spiritually clothed and fed, and we live, and move, and have our being in the atmosphere of divine Love. We expects the health strength, vigor, and agalessness of infinite Life: the beauty, comeliness, grace, and goodness of infinite Love. We manifest the perfect and useful activity of infinite Mind, and we radiate peace, joy, harmony, and love to all the sons and daughters of God, Jesus said, "The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son

Unreality of Matter

The great impediment to the successful realization of our at-one-ment with God, our real existence in divine Mind, is our belief that we are the offspring of matter, living in a world of matter, and that we are subject to the laws of matter. Ordinian Science, after declaring that Spirit is all, logically teaches that there is no matter. It declares all we seem to be subject to the seems of we see about us to be forms of thought, and false thought at that At the time Mrs. Eddy discovered Christian Science and wrote of it, the smallest subdivision of matter was thought to be an atom. In one of her books, "Unity of Good," page 35, she says, "The material atom is an outlined falsity of consciousness." ter. Today, material benefit for his ter-theory divided the atom into vari-ous and much smaller and less ma-terial forms. Yet humanly scientific thought is still unsatisfied and un-convinced that it has analysed its belief in matter to its ultimate end. And well it may be, for wheat is does, it will find matter to be exactly what Mrs. Eddy declared to be "Griseness".

It will find matter to be exactly what Mrs. Eddy declares it to be (Science and Health, p. 118), "nothing beyond an image in mortal mind."

We would find it very helpful in healing sickness and destroying error if we would stop viewing the things which we see around us as matter, and would view them as beliefs, men-ial counterfeits of spiritual realities. tal counterfeits of spiritual realities. It is generally admitted that the various so-called material laws which in operation are mental the law of gravity, the laws of cohesi iaw of gravity, the laws of cohesion and attraction, capillary attraction and chemical affinities. As an armount, the recognize in the growth and development of a tree that there are a host of mental laws in operation, and that the tree is the end result of the focusing together of these laws. Remove the gother of these laws Remove the laws of cohesion and attraction, and the tree would no longer hold to-gether. Remove the law of chemical which form it. In like manner all the objects of sense which we see around us, which we call matter, are unreal, false mental concepts.

The fact that all is Spirit and spiritual, if clearly seen, would definitely out any such argument as has been offered to prove its nothingness. But the claim that matter is real and substantial is so insistent, that to recognize the inconsistency of it, and its falsely mental nature, even when considered from its own standpoint, enables us to see how readily its sup-posed laws may be set aside when the laws of God are realized. On page 269 of the Christian Science textbook Mrs. Eddy states that "metaphysics enables us to see how readily its sup-Mrs. Eddy states that "metaphysics resolves things into thoughts, and exchanges the objects of sense for the ideas of Soul." The practice of resolving all material things into thoughts has been of great help to me in healing, for it has brought matter out from behind its false claim of substance and power, into the realm of thought, where the falcity of its claims of sickness and discord are more readily recommed discord are more readily recognised and destroyed.

Organic Disease Healed

The healing of organic disease through Christian Science is of common occurrence. Such healings are not only a proof of the efficacy of spiritual law over the beliefs of mainter, but they are also an evidence of the mental nature of matter itself.

Let me relate an instance of healing which illustrates this point. But be-free doing this it might be well to tell you that I came out of the prec-tice of medicine. For nine years I practiced medicine successfully, that is, I enjoyed a good practice. I merely tell you this because it is my inten-tion to set suggestions. tion to say something about drugs and germs and other medical beliefs, and it may be helpful for you to that I am quie familiar with these subjects

But to return to the instance of healing that was to illustrate the

mental nature of matter. mental nature of matter. A woman of advanced years was suffering from pneumonia. Her physician said she had no more than a few hours in which to live. At this point the physician was dismissed and Christian Science treatment was given. The Bestimer was immediate.

Bealing was immediate Now, a Christian Science treatment is a realization of infinite Truth. Therefore, it denies error. The process is altogether a mental one. From a consciousness of pneumonia, the woman became conscious that she did not have pneumonia. Through the power of right thinking, this disease was eliminated from her thought. All that had been done was to change her thinking; yet, she no longer had pneumonia. For pneumonia was in her thought and that it is altogether mental. But poeu-monia according to medical belief, is a condition in which profound pathological changes have occurred in the tissues of the lungs. It is not a disease separate from the lungs. The lungs are therefore as mental as the disease. Since the lungs are menthe disease. Since the lungs are menthe disease. Since the lungs are men-tal the entire body must be mental, and a part of human conscious-ress. As stated by Mrs. Eddy (Science and Health, p. 203): "Mat-ter and mortal mind are but dif-ferent strate of human belief. The grosser substratum is named matter or body; the more ethereal is called mind. This securified mind and health mind. This so-called mind and body is the illusion called a mortal, a mind in matter."

The world of human thinking, believing the human body to be mate-rial, has searched diligently and is still searching in matter for rem-edits with which to cure the illnesses of the body. The fact that this search goes on, and new remedies are con-stantly brought forth, is evidence that no remedy is permanently effective. Each one has its day. So vestigator searching for a remedy for some diseased condition believes he has found it. With faith and expechas found it. With faith and expec-tation he tries it, and the results seem to justify his faith. But when the remedy becomes more generally used and is administered by others with less expectation of results, the results become less and less estis-factory. Though unrecognized by the physician, it is the thought which ac-companies the use of the trug which brings about the result, whether a good result through faith in its efficacy, or lack of result through doubt of its ability to pure. Thus the doubt of its ability to cure. Thus the search for remedies began with vegetables and minerals and has now arrived at animal extracts and serums. Not only is there a diligent search in matter for remedies with which to cure what it believes to be material ills, but likewise there is a continue and, but hewever there is a continual search in matter to determine the cause or disease. Through the failure to recognise that there is no matter and that it is the human mind which is entertaining the belief of disease, the search goes on in the direct line of matter.

One of the beijels that has grown in One of the beliefs that was gaven as a second of the first of the publication of the first edition of the publication of the first edition of the Curistian Science textbook. Microbes and germs were not topics of daily discussion in that day, yet it is evident from the intat day, yet it is evident from the were not topics of daily discussion in that day, yet it is evident from the one sentence in which these words appear in the present edition of the textbook, how Mrs. Eddy classified them. On page 164, in speaking of doctors, she says: "It is just to say that generally the cultured class of medical practitioners are grand men and women, therefore they are more scientific than are false claimants to Christian Science. But all human scientific than are false claimants to Christian Science. But all human Christian Science. But an numan systems based on material premises are minus the unction of divine Science. Much yet remains to be said and done before all mankind is saved and all the mental microbes of sin and all diseased thought-germs are exterminated."

Contagion Mental

The beliefs that are entertained The beliefs that are entertained regarding the germ theory are in the same process of change which goes on in everything connected with disease and its treatment. In the beginning it was contended that every contagious or infectious disease had its germ, but it has since been discovered that there are not enough forms to go around So now it is maintained that same contagious discounting of the same contagious discovered that there are not enough the maintained that same contagious discovered that there are not enough the same contagious discovered that the same contagious discovered the same contagious discovered that the maint in go around. So now it is maint-ined that some contagious dis-eases are caused by what is called a virus. Yellow fever is one of them. Finid in which the contagious mate rial is presumed to be present is filtered and all of the microscopic forms of vegetation called germs ar left behind. The fluid thus contains nothing that can be seen under the highest powered microscope. But it does contain the contagion. No one has ever seen it, but it acts contagiously. This unseen belief of fear is called a virus.

One of the most erochal and dre matic events in sanitary research was the discovery that the bite of a mos-quito which had previously bitten a person suffering from yellow fever was followed by this disease. Remark-ship smooth although the second ably enough, although there seems to be no comment upon it, the mosquito lived its allotted time of six weeks lived its allocked time of six weeks while harboring and developing this contagion, while the human being often succumbed to it very quickly. An article which appeared in a current magazine, written by a physi-cian of note, describes this conquest of yellow fever, and points out that it was based on the proposition that it was based on the proposition that yellow fever was conveyed from man to man by this mosquito alone. On the basis of this conviction many cities were rid of yellow fever. The results seemed conclusive. However, in 1928 there appeared in Rio de Janeiro four hundred cases of yellow fever, although the city was one of those that had been freed of yellow fever, and which had subsequently been kept free of mosquitoes. And then it was discovered that there was an immense back country fued with yellow fever where there were no yellow fever mosquitoes to trans-

No doubt thousands of lives have been saved through the belief that the destruction of mosquitoes would stop the course of yellow fever. Nevstop the course of yellow fever. Nevertheless, the greatest conviction that sanitary science has ever had, and one that had been thought to be completely demonstrated as to leave no possible room for doubt, has been disproved, and the search for

the method of transmission is again soing on. In this particular instance it was not enough to be rid of mosquitoes. The disease had been experienced by millions of people. According to the writer of this article, tests showed that seventy per cent of them had had it and had recovered. They believed in its symptoms, they believed in its periodicity, they believed in its contagiousness, and that is all that is needed to perpetuate

Truth Destroys green

Some day when the world shall have advanced spiritually and when the law of God is more generally recognized, there will also be an increased knowledge of the human or mortal mind and its activities, and it will then be seen that yellow tever it will then be seen that yeltow tever is mental. Then the realization of is mental. Then the realization of the mental nature of disease and the nower of divine Mind to heal will rid the world of its miasuras, and we shall all look for healing where it may be found.

The germ theory has gradually extended fixely until it includes all in-flammations. Where a few years ago our lain diseased conditions or the body were classified as inflammabody were classified as inflamma-tions, now the word most frequently used is "infection." This means that germs are said to be present and to be causing the trouble. Logically, if germs are present, they must come from somewhere, and so it is claimed that germs can and do gain ready admission to the body. Mortal mind believes that where there is inflam-mation there is a definite effort on the part of the body to get rid of the germs. But it also believes that there are certain microbes that gain en-trance to the body against which the body makes no complaint. It ac-

cepts them and entertains them and makes no effort to be rid of them.

On every hand we are reminded that the germs will get us if we don't watch out. The articles we buy are said to be germ-proof or sterilized. The possibilities or probabilities are pictures of injurious results from getting germs on our feet, or germs on our hands, or germs in our noses. This insidious propagands is presented to us through many human avenues. What shall we do about it? Let us declare our true status its one it? Let us declare our true status in divine Mind, and let us remember that the body is mental, that it is part of human consciousness. The part of numan consciousness. The realisation that we are in realist altogether spiritual enables us to recognise with clearness that we can effectually prevent the entrance into human consciousness, or the growth nor upon human consciousness. anything that is harmful and destructive. It is probable that germs have some good and useful place in this material sense of things, and that it is man who has sought out that it is man who has sought out these elementary types of life called germs and microbes and through his material convictions has enviowed them with power to harm. There is ample proof that the realization of the real man's freedom from germs and his mability to harbor them is a law which armule moran within the hew which annuls perms within the heady sint suchmiss these from with-min perms the body closes every avenue through which germs may enter, and leaves nothing within the body upon which they can subsist.

Man Is Spiritually Suntained

Great attention in recent years has been given to the question of food, its necessary constituents, its vitamins, and its poisonous qualities. It is con-tended that we need and must have a large number of alphabetically named beliefs called vitamins. Pur-veyors of foods tell the world that their products contain this or that es scrittal winnin. We are told that we must eat this food in order to get cient of one vitamin, and that sumdent of one vitamin, and that food in order to get enough of vi-other, yet a cow eating only grass gets enough of them all. The atti-tude of many people would seem to be that this mortal man is the only choose his food without the help of a distillan. Yet in reality divine Love supplies us with an abundance or every good thing, and there is never a fack of those ideas which are vital to man's welfare.

From the search for fond believed to be needful to man, the search has been carried over to a search for fcods which might be harmful or irritating to him. So we are said to be allergic to him. So we are said to be allergic to this or that food. Foods that are suitable for one person are thought to be harmful to another, and the bondage to foods becomes greater and greater. Some vegetables are thought to be irritating when taken into the stomach, while when taken min the stomast, while so much as comes into their presence. One of the latter is poison oak. So strong a belief has been built up of its poisonous nature that home beings often suffer irritation by sim-ply coming into its presence, yet goats eat it without harm. We should realize that the spiritual ideas which divine Mind provides for our suste-nance are perfect and complete, and these man-made beliefs of harmfulness will then disappear. On page 442 of Science and Health, Mrs. Edgy declares, "Christ, Truth, gives mortals temporary food and clothing until the material, transformed with the ideal, disappears and the ideal, disappears, and man is clothed and fed spiritually." This Mrs. Eddy refers, is neither deficient in vitamins or any other essential quality, nor is it irritating or poi-

God's Government Suprem

There is great need for the realization that God governs man, and that this government is expressed not only in individual freedom, but in collec-tive freedom as well. The changes which are occurring in many natio which are occurring in many nations and in different types of government indicate man's disappointment in government, and his effort to better it. The good in human thinking establishes its highest ideal of govern-ment, and provides what it believes to be safeguards against its destruction, but the evil in human thinking gradually finds ways of circumvent-ing this ideal. Government, then, is the manifestation of the governintal ideal of the mass though the people. The realization, on the part of Christian Scientists, of the true concept of government by di-vine Principle uplifts the general consciousness of government. In the

present trend, of which no one knows the outcome, the realization on the part of the Christian Scientist that God reigns, has a very definite effect. Issiah deciares: "Of the increase of his government and peace there shall be no end, upon the throne of Pavid, and upon his kingdom, to order it, and to establish it with judgment and with justice from henceforth even for ever. The seal of the Lord of hosts will perform this."

of hosts will perform this."

Above the changing beliefs concerning health and harmony, individual living, and human government, the law of God remains unchanged. The Frinciple of Christian Science declared by Jesus is again made available to us. This spiritual understanding comes into human consciusment when we dwall under consciousness when we dwell upon the neture of God and recognize the perfection of His children. To un-derstand Christian Science necessitates studying it. Yet the moment this study is begun it is possible to begin applying it.

Mrs. Eddy has pointed out the dif-

faculty which she experienced in the dis-faculty which she experienced in ex-pressing spiritual ideas in language which had been developed to express a material serse of things in order to express her spiritual thought, she found it necessary to give some words special significance, such as "mor-tal mind," "substance," "reality" and "unreality." Jesus also seems to have found it necessary to use certain words in a special way in his effort to teach the people the availability of God's law. The pronoun I, or Ego as the word appears in the Greek, was one of these words, and Mrs. Eddy has defined it in the Glossary of Scihas defined it in the Grossary of con-ence and Health, page 588, in part, as "divine Principle." Much light is thrown on Jesus beautiful and sci-entific description of the bread of life, which is to be found in the suxth iffe, which is to be found in the such chapter of John's Gospel, by remembering this definition. Apparently Jesus also used the phrase "kingdom of neaven" in a special way.

A common Jewish method of teaching in that day was by parables. Jesus adopted this method when his direct teachings were misunderstood.

Kingdom of Heaver

The Gospels according to Matthew, Mark, and Luke contain a great many parables, while John's Gospel relates other phases of the Master's relates other primers of the parables which Mathew records describe the "kingdom of heaven," and they either begin with the statement, "The kingdom of heaven is likened unto," or the kingdom of heaven is referred to later on in the narrative. After the delivery of the first of these para-bles, the parable of the sower, the disciples asked him why he spoke in parables. He replied, "It is given unto you to know the mysteries of the kingdom of heaven, but to them i is not given." The Bible records that from that time on Jesus in his pubis not given. The sine records that from that time on Jesus in his public discourses spoke only in parables. As Jesus used the term "kingdom of heaven" it seems to refer to a state of consciousness which is attained here and now through the realisation of the power of Truth as demonstrated in Christian Science. Language of heaven" as "the reign of harmony in divine Science." To experience this reign of harmony it is necessary this reign of harmony it is nec for us to understand the divine Principle, and to be able to so apply this

understanding as to destroy inhar-mony of every sort. It is evident that he who understands the divine Prin-ciple and rule of Christian Science has entered into the kingdom of has entered into the kingdom of heaven. Among other things, Jesus pointed out that the kingdom is attained by those who accept the word, and understand it, and apply it, and bring forth fruit, "some an hundredfold, some sixty, some thirty." He declared that those who accepted the law of God, who made earnest effort to enter the kingdom, would grow in understanding in the midst of the world's evil, until ultimately the rightcom shall "shine forth as the sun in the kingdom of their Pather." an understanding of divine Principle, infinite good, is in the soliny to express it, and he insisted that Truth completely leavens human thinking and blesses those who possess it.

Divine Mind Heals

Today Christian healing as Jesus taught it is again practiced. The application of Christian Science not only heals our sicknesses, but it blesses us in all our ways. It destroys discords in business, in the home, and in our social relations. Its leavening influence, changes, our influence changes our characters, lessening and finally eliminating un-lovely qualities from our thought. Its heating influence is left in every-thing that is unlike God. Mortal thought needs correction along many lines, and this correction can only lines, and this correction can only come through the healing power of divine Mind. Mrs. Eddy has stated this fact very simply and yet logically and completely on page 270 of "Science and Health with Key to the Ecriptures": "Mortals think wickedly; consequently they are wicked. They think sickly thoughts, and so become sick II sin makes sinners. Truth and Love alone can unners, Truth and Love alone can un-make them. If a sense of disease produces suffering and a sense of ease antidotes suffering, disease is mental, not material. Hence the fact that the human mind alone suffers, is sick, and that the divine Mind

Christian Science Church

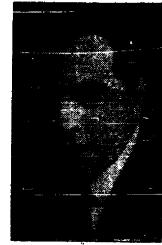

"Are Sin, Disease, and Death Real?" will be the subject of the Lesson-Sermon in 211 Christian Science Churches throughout the world on Sunday, October 8. 1939.

Correlative passages to be read from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following (p. 427); "If man is never to overcome death, why do the Scriptures say. The last enemy that shall be destroyed is death? The tenor of the Word shows that we shall obtain the victory over death in proportion as we overcome sin."

Dunninger, Gibson, to Speak at Town Hall

Dunninger, world famous mind reader, who will open the Detroit Town Hall season Wednesday, October 11, at 11 a. m., and Hon. Hugh Gibson. distinguished diplomat, who will speak October 18. will launch the brilliant celebrity season of 20 Wednesday mornings in the Fisher Theatre.

Gibson, former United States Minister to Poland and Switzerland, and ex-Ambassador to Belgium and Brazil. will arrive in this country October 15 from Europe where he has spent the past several months atudying conditions and interviewing leaders of the conflicting nations. He has just cabled Kathleen Snow Stringer, director of Town Hall, from London, that he has curtailed his European stay in order to accept the Detroit date-his first speaking engagement after his return. 'What's Happening in Europe" will be his subject.

The noted authority will take the place of Edgar Ansel Mowrer, foreign correspondent for the Chicago Daily News, whose American lecture tour was cancelled by his paper due to the war. The other Town Hall speakers from abroad—the Earl of Warmids, Lin Yutang, Linda Littlejolin, and H. R. Knickerbocker-have assured the Town Hall management that they will fill their dates on schedule.

Dunninger, whose amazing powers of etlepathy and thought transference have baffled the scientific world, will epeat some of the experiments he conducted with the late Thomas A. Edison, the Duke of Windsor, the prolessors of psychology of America's dents of the United States. In his lecture he will explain the fundamentals of his uncanny power-a power which, evertheless, he believes lies dormant n the average human being's mind. He will also include demonstrations previously credited to the psychic and supernatural, and which have been the sole property of Oriental fakirs and vonder workers.

Membership information and tickets are available now at the Town Hall office, 220 Hotel Statler, Cherry 5617, Cherry 4960, and at Grinnell's Music Store, Randolph 1124.

Open House for Allied Youth

Annual Open House for Allied Youth and their friends will be held at the downtown Y. W. C. A., Saturday, October 7, from 9 p. m. to 12 p. m. It will be something new and something different. Each post will have a concession, and for the most unique and most popular there will be an award. As an added attraction there will be dancing. A real welcome will be extended to all interested in the organiza-

New Autumn Tints Are Picturesque

Forest Greens and Woodsy Browns in Favor.

By CHERIE NICHOLAS Fashion is undoubtedly in a high mood for adventure so far as the new fall and winter colors are con-cerned. Not only do the rich beautiful forest greens, Robin Hood reds, woodsy browns and sunbright coppery shades now so fashionable, radiate autumn splendor throughout the mode, but into the story of fashion they are weaving an element of romance and the picturesque that is hubbling over with exciting head which bears fascinating promise for

the coming months. With the deep forest greens and the woodland browns that abound in the new woolen weaves or with the smart black daytime frock a dash and a splash of Robin Hood red is or the startling ideas that is taking the world of fashion by storm is that which calls for a bright red jacket to top the black dress, or let your gown be in the new bronzy green if you prefer

green if you prefer.

A scarlet hat is another way of making a victorious approach to smart style for fall. A vivid Robin Red quill thrust at a devastating angle through your deep forest green suede or felt hat is another way of saying "it" with unmistakstyle accent. And a gay red suede bag for a crescendo style note. Then there are the new coppery shades and the cinnamon tones which Paris designers are sponsor ing so enthusiastically—with them wear amber jewelry and you will have arrived at yet another pinnacle

For strictly high style substitute for the much lauded black one of the very new near-blacks, listed among which are black sapphire, black ruby, and certain blackberry tones which when highlighted with bright dahlia red accessories is most

League Coaches Announce New Basis of Debate Competition

A new plan of debating adopted in the Border Cities League this year will give more student opportunity in this activity than ever before, announced Mr. Leroy Selmeier, Grosse Pointe High School coach, last week. "The new plan eliminates the old emphasis on winning and stresses individual growth, improvement of expression, and more independent thinking," Mr. Selemier said.

Each school is to send one affirmative and one negative speaker at least one hour before each debate to plan their cases with teammates from other schools. After the debate, decisions will be given by the vote of the three coaches, while each student in the debate will cast a personal vote for the speaker he considers to have done the best debating.

The regular league schedule will school at least twice. In addition, approximately forty practice debates and two tournaments will be held with non-league schapla. Mr. Selmeier declared that there would thus be as a finae of sunss which they learned during the summer.

Every coach to whom the new plan the better student activity it would carnival atmosphere to the evening. Any student interested in debating

this year is urged to see Mr. Selmeier after school Tuesday or Wednesday of this week.

Hannan Y Notes

The first School of Skills to be sponforce by the Hannan Memorial Y. M. C. A. has just been announced by Ernest M. Hedden, executive secretary of the branch. The directors of the school are W. Carey Foster, activities secretary, and J. Brooks Marstiller, director of physical education. The directors will be assisted by a faculty of 17 instructors as follows: James used in this ordinance, shall be deemed Burke, Ernest Hedden, Ward Stone, to mean the carrying of fire arms or Eleanor Manska, Selwyn Mather, Ralph Tobbe, Norman Young, Al Gorcoachman-type felts that are being don, Ewald Rumminger, Clarence Valshown in the early millinery dis-lier, Wilbert Koyle, Wm. Burche, Theron M. Hall, Warren Johnson and Norman Tweedale.

"Teach Americanism" Is Clark's Message To Pointe Faculty

"Be American! Think American! Teach Americanism! And thank God you are Americans!" Such was the message of Ralph M. Clark, Secretary of the Grosse Pointe Board of Education, addressing the recent opening meeting of Grosse Points teachers, principals, clerks and custodians. The schools' staffs have been subsequently engaged until pupils returned in a series of all-day meetings and discussions, studying curriculumproblems, working out organization improvements and developing new instructional methods, preparatory to the return to the buildings of the pupils.

ican citizen as well as a School Board structing classes of suitable size in member he charged the school em- buildings of adequate size." ployees with the major responsibility The Board's policy, Superinetedent of promoting Americanism and democ- Van Kleeck said, was to obtain the adracy. school results in such fields as reading, been the year's major professional schievement. During the coming year we hope that there may be further progress, and we look toward an inthe summer schools, summer playgrounds, summer symphony concerts and the regular school system, are the Important changes and improvements chief responsibilities of the Board of in the art instruction were discussed Education. Our pupils in Grosse Pointe briefly and the teachers were praised are in general and on the average of for the rapid advance in musical inbigh shifty and with them, therefore, high-quality results should be obtainable. Special stress on hand writing is needed this year, and we hope that the Scorth, Sigh and sheth grade teachers,

programme the new fema-year plan for improving the commination and teaching in those grades. These changes need to come slowly and carefully and with the full understanding of parents and the public. They will all mean The additional room in the Kerby much work, but the Grosse Pointe School was managed by partitioning school system could never have attained the auditorium into two classrooms. In its present excellent status at the same time that it was growing so rapidly in size had it not been that our faculty have shown very clearly that they are

not afraid of hard work." Dr. Van Kleeck discussed in detail, as also did John R. Barnes, Director of Instruction, the plans for the utilization of the period before the opening of the schools for pupils.

tionships with the parents and homes possible help might be given these boys of the children, quoting the State Superintendent of Public Instruction as saying that "It is the people in the promoted from the local teaching staff. final analysis who determine the were introduced. They were Charles amount and kind of education they want for their children."

The Grosse Pointe elementary school report card system was selected with that of Rochester, New York, as representing the nearest approach to an ideal plan by experts at Columbia University this summer, Dr. Van Kleeck told the teachers. The plan was worked out during the administration of former Superintendent S. M. Brownell and is being revised and refined from year to year. The new report to parents of high school pupils on the teach ers' reaction to the children's character and personality traits has been introduced during the last year with a minimum of difficulty and complaint, Dr. Van Kleeck reported. He urged the teachers to be a bit franker in their estimates in the second year's use of these reports. "Our parents are an intelligent group. We can tell them set r. right," he added.

In the absence of Charles A. Parcells. President of the Board of Education, a statement of Mr. Parcells was read of the group. He urged that ized with greatest care to the end that genuine and sound economies might be practiced. Further describing the schools' responsibility, he said that instruction. Electric Slaughter

Australia has evolved a new and more humane way of slaughtering animals for market. It is an electric "stunner." So far it has been used for pigs, and has proved more economical than killing by hand. The "stunner" is placed over the mediately rendered unconscious for 10 minutes. Meantime they are slaughtered and the hair is removed by another new machine in about wiree minutes, instead of half an hour, as is sometimes re-

Chain stores, contrary to popular belief, are not ne winstitutions in the world's economy. As long ago as 200 years before Christ the Chiness enjoyed their benefits. The Fuggers, of Germany, and the Merchant Adventurers, of England, operated chains in the Middle ages. The first chain system in America was, founded in 1670 by Hudson's Bay company.

Anciest Institution

Polish Hilliuillies

In Poland a hillbilly is called a Hucul, which is pronounced "Hoot-sool." The Polish version of our southern mountaineers wear more picturesque costumes than the American highlanders, they are as much addicted to the music of the fiddle and they are even more "sot" in their ways, which are very quaint, indeed. A good many Amer-ican travelers have become acquainted with the Huculs in the past few years. Some of them penetrated the eastern Carpathians as members of art study groups who baunt these mountains every summer, and others were tourists who rode "cruising" trains that carry ski parties on eight day trips from Cracow into the remote and beautiful regions v. . . . the mountainners

Bamboo Repixees Iron

Athes Albertoni and Alessandro Pacioni, Italian engineers, have discovered a process by which bam boo, fast-growing tropical plant may be utilized to replace iron in oforcement of concrete for building and road construction. The new process is based on special treat-ment of bamboo to make it more adherent, and placing of bamboo sticks in petterns for maximum sticks in the reinforcement operatropical colonies of Libya and Bibli opia, where weatherproofing of buildings against cold is not an important factor, and they can be con-

William Tyndale Is Called Father of English Bible

William Tyndale has been called "The Father of the English Bible." Who first printed parts of the Bible in English and sent them broadcast through the land. There was a law forbidding anyone to translate the Scriptures into English without authority, and when Tyn-dale applica to the bishop of London for permission he was refused. To him the translator made his lamous declaration: "If God spare

my life, I will cause a boy driveth a plow to know more of the Scripture than thou dost." While at Cambridge, Tyndale had been under the influence of Erasmus, the greatest Greek scholar of his day, and it was there that he made himself familiar with the Greek testament. He was determined that the people of England should have the advantage of reading for themselves the Word of God through the new invention of printing, and, when he found that this could not be accomplished at home, he left for the continent. That was in 1524. In Hamburg he worked in much the same way as Jerome had done nearly a century before and a year after he was at Cologne with the sheets of his quarto New Testa-

ment ready for the printer. One day a message came that he res being watched, so with his pre cious sheets he escaped to Worms. It was there that he succeeded in publishing the first edition of the New Testament in English. volumes were taken secretly into his own country hidden in cases, in barrels, in bales of cloth, and wherever they could be stowed away and before long they were in many homes throughout the land. To make the shipping of them easier Tyndale also printed an edition in a smaller size.

Thousands of copies were seized and burnt, but when the translator heard of this his comment was: "In burning the book they did none other than I looked for; no more shall they do if they burn me also, if it be God's will that it should be done." Tyndale also translated parts of the Old Testament, but for done." his efforts he was thrown into pris-

on. His last praver was-"lord, open the king of England's eyes. He was eventually strangled and his body hight of the stake. All this was done in the name of religion,

Find Old Cannon Balls Dredges working near Carolina Beach, N. C., recently sucked up two 10-pound iron cannon balls from the ocean floor and deposited them on the beach. Residents of the beach expressed the opinion that the missiles were remains of some Civil war blockade-runner battle, probably the

battle of Sugar Loaf, fought near this point in 1866. Salesmanship in Destroes Salesmanship plays an important

ert in modern business. There are 2,000,000 selesmen and saleswomen in the United States and the annual expenditure for personal salesmanship is \$3,000,000,000, according to Professor H. K. Nixon of Columbia

Norway's Grandest Fjord

The Sognetjord in Norway is over a hundred miles long, and its cliffs are not only 4,000 feet above the water but also 4,000 feet below the surface; and the towering majesty of the scenery makes the fjord the most popular in the country.

Remost Stranger

John B. Webb of Tonawanda, N. Y., received a letter posted in that town. When he opened it, a quarter fell out. Inside was a note which read: "Inclosed, please find 25 cents which I have owed you a long time."
Webb hasn't any idea who sent the

Michigan U Carmon The Charles Baird carillon at the University of Michigan consists of 53 bells in chromatic sequence. The largest (Bourdon) bell weight slightly more than 12 tons and has the pitch of E flat below middle C. The smallest bell weighs 12 pounds and sounds the note of G sharp, four and one-half octaves above the Bourdon. The bells are hung on a steel frame over 30 feet in height, 120 feet from the ground. A sound-proof cabin has been erected to

house the clavier from which the bells are manually played. Music has its "Unfinished Symphony" of Schubert, literature has "The Mystery of Edwin Drood," unfinished novel of Dickens, and recently returned American tourists report an "unfinished" Greek temple which has stood for 25 centuries at Segesta, in Sicily, roofless and floor-

England's 'Sin-Enters' A sin-cater was a person who for a trifling payment was believed to take upon hiraself, by means of food and drink, the sins of a deceased person. The custom was once common in many parts of England and in the highliness of Guntand. Each ribate had in Mitigle distance who

less, but majestic in its architec-

past, he rose and pronounced the whom he thus pawned his own soul. In Upper Bayaria, where the cus-tom long salvived, a corpse cake was placed on the breast of the dead and eaten by the nearest rela-

Tough Old Bird

When a pet cockatoo, with a chain attached to its leg, alighted on a high tension electric wire at Tarralgon, Ontario, spectators figured they would see an electrocution. A flash went up as the chain was dragged across the wires, but the

"Curlew Must Not Ring Tonight" The late Rose Hartwick Thorpe wrote the poem "Curfew Must Not Ring Tonight" on a slate during an arithmetic lesson when she was 17 years old. It was based on a story she had read in Petersen's magazine in 1865. She copied the verses and placed them in a dresser drawer. Subsequently the poem was pub-

lished in the Detroit Commercial

Advertiser. It was not copyrighted and was immediately reprinted in

papers throughout the country and

in England.

Tough Time

Somewhat puzzled were subscrib-ers of the weekly Wyanet (III.) Record when they found that one page of a four-page section was blank. That is, they were puzzled until they saw in small type the explanation: "Don't laugh. We had a heliuva time filling the other three pages."

Rice Wastes as Fuel

Rice wastes are utilized as fuel in Italy in an effort to save coal, seconding to "Industrial and Emgineering Chemistry." With four sponding in heat value to one pound of good coal, it has been estimated that Italy could save 50,000 tons of coal. At present some thousand kilowatt-hours of electric energy, obtained through steam engines burning rice by-products in special furnaces with mobile grates, are being produced, it is reported. Since these plants are costly, they are restricted. The gasification of rice byproducts and the use of the resulting gas for driving motors have permitted the installation of 15 plants producing 1,000 horsepower

Rendervous in Sweden

Den Gyldene Freden, or the Golden Peace, is the name of a small cellar restaurant of Stock. where Bellman, the Swedish Bobby Burns, sang his songs with his cronies two centuries ago. Its food is excellent, but no many visitors have robbed it of the charm it had for artists and bohemians in the old days.

Tell Story of War in Poland Sunday, Oct. 8

The thrilling and dramatic inside story of the war in Poland and the de- tors. fense of Warsaw will be told in a lecture, fully illustrated with motion pictures, by Harrison Forman, motion picture photographer for Paramouni News, at the Detroit Institute of Arts, Woodward at Kirby, Sunday afternoon and evening, October 2. Mr. Forman repaces Julien Bryan, who has been detained in Switzerland, as the opening attraction of the World Adventure Series Fall program.

Ever on the outlook for trouble that will make international news, Mr. Forman was in Russia a month before the present situation started. He toured all the involved capitals of Europe during the crisis, visited the various Polish fronts after the war was declared means. and finally stayed in Warsaw during its siege. He has, in his motion pictures, a L. Connelly will act as Senior Advisors. afternoon. complete documentary story of what happened. Mr. Forman will arrive in Detroit direct from Warsaw having escaped with his films just before the city was completely surrounded. Because of his United States credentials the Polish government permitted him to stay on even after other correspondents departed.

Mr. Forman will give two different ectures, illustrated with different motion pictures, to tell the complete story of the war in Poland. His afternoon lecture at 3:30 is entitled, "Poland Under Fire," and the evening lecture at 8:30 is entitled "The Defense of Warsaw.' The two appearances are sponsored by The World Adventure Series, the public lecture program at the Detroit Institute of Arts, Woodward at Kirby.

Every Sunday afternoon at 3:30 at the Detroit Institute of Arts, world Tel. NI. 4819 relebrates will present informative and entertaining lectures on popular subjects related to travel, adventure, science and exploration. Pollowing Mr. Brynn, these speakers and subjects will be presented on consecutive Sunday afternoons in the order here given: Capt. Dwight Long, "Sailing Around the World in a 32-Foot Ketch"; Dr. Albert Wiggam, "Your Abilities-How to Discover and Develop Them"; John C. Monteith, "Sun and Silence in Death Valley"; Carleton Beals, "The Coming Struggle for Latin America"; Gutzon Borgium, "Great Stone Faces" Count Bernard de Colmont, "Down the Colorado River with a Color Camera"; Van Wormer Walsh, "By Motor Thintings Eugen at Section and Walter Therenes Belging and by Picture Holland

in Tulio Time"; Capt. John D. Craig Danger Is My Business." Continuing its policy of offering world celebrities to the Detroit publi at the lowest possible cost, the World Adventure Series issues season tickets covering reserved seats for all ten of these Sunday afternoon lectures. This permits a considerable saving from the straight individual prices. Reservations either for single tickets or for the complete fall course are now being accepted by the World Adventure Series at the Detroit Institute of Arts. These may be made in person, by mail or by telephoning Temple 2,7676.

D. F. & P. of A.

Members of Michigan Chapter, Daughters of Founders and Patriots of America, will meet Friday, October 13, at the Colony Club, for a luncheonmeeting, with luncheon set for 12:30 o'clock. Mrs. Charles Horton Metcali, state president, will introduce as honor guest, Mrs. Liewellyn N. Edwards, of Maine, the National President of the organization.

Mrs. Metcalf requests early function reservations.
