

SUPT. VAN KLEECK DEFINES STATE LAW

Major Burns Henry Post Arranges Third Big Americanism Program

The Major Burns Henry Post No. 303, American Legion, of Grosse Pointe, will present its third Americanism and national defense program in the auditorium of the Grosse Pointe high school, Fisher road at Grosse Pointe boulevard, on Friday evening, April 25, at 8 p.m.

The program will offer one of the most thrilling stories from the pen of Edward Wallace, master writer of mystery literature, the film "Secret Column".

A stirring story of today's headlines—the hunt for fifth column agents. Four brave men, each imbued with a passionate love of his country, and the freedom for which it stands, have banded together in an unofficial counter-espionage system for the sole purpose of wiping out the fifth column in England.

"Secret Column" depicts the activities of the fifth column. It shows the far-flung reaches of its sinister web—sabotage, intrigue, murder are the weapons of the fifth columnists who do not stop to favor their own if a member even seems to falter in his part.

The lead is played by Frank Lawton, star of "David Copperfield," "Cavalcade," etc. Anna Lee, last seen in King Solomon's Mines, plays the part of a young newspaper reporter.

"Secret Column" alone would be outstanding entertainment, however the committee has arranged for Harold N. Morden, RAF veteran and one of Canada's leading journalists, to relate Great Britain's part in the Battle of Britain.

Other entertaining features have been arranged, and last but not least, the local Post's Sons of the American Legion Drum and Bugle Corps will make their first public appearance. St. Ambrose high school's Glee club will also appear on the program. Martha Mocerri, a 14-year-old Pierce junior high student, will present an accordion solo.

Dr. E. R. Van Kleeck, of the Grosse Pointe Board of Education, will officiate as master of ceremonies. This program has been arranged at absolutely no admission charge.

For tickets, telephone or write Walter S. Hoyt, post commander, 190 Oak street, Grosse Pointe Farms.

Local Draft Board Complimented On Farewell Breakfasts

Grosse Pointe's Draft Board 57 has been officially complimented by state officials on the recent series of early morning breakfasts that local men have received before induction into military service. The Review learned early this week.

A letter received by Board 57 last Saturday from the Lansing office of the selective service department follows: "Draft Board No. 57, 15115 East Jefferson Avenue, Grosse Pointe Park, Michigan. Gentlemen:

"We want you to know that we appreciate the fine send-off you give these boys before they go to the front. It has been a great help to them and it shows a fine spirit on the part of your community. It causes considerable work for you, but the men leave in the right spirit. Yours very truly,

E. M. ROSECRANS, State Director, JOHN I. CROSHAW, Mobilization and Induction."

The breakfasts, held in the Neighborhood club, Waterloo avenue at St. Clair in the City of Grosse Pointe, are given by a group of local women who have gathered together and formed an organization known as The Breakfast Club. Mrs. Richard Campau, of 603 Neff road, City of Grosse Pointe, is president of the new club. Other officers include: Mrs. Harry Lipski, of 267 Merriweather road, treasurer; and Mrs. Douglas B. Crane, of 956 Lincoln road, as secretary. Food for the breakfasts are donated by local merchants, Mrs. Campau has announced.

Lions Club Helps

The last meal, given on Tuesday, April 15, and attended by nearly 50 prospective draftees, was sponsored by the Grosse Pointe Lions club in conjunction with the ladies breakfast organization. Nearly 100 local men have served meals of this type, draft officials believe.

LOVELL-SACHS WEDDING

On Saturday afternoon, April 19, the wedding of Miss Rose Lovell, of 3974 Balfour road, Detroit, and Harold M. Sachs, of 765 Washington road, City of Grosse Pointe, took place in the Peace Lutheran church, Warren avenue at Balfour. Bridesmaids were Bette and Dorothy Lovell, sisters of the bride. Leonard Sachs, brother of the groom, served as best man. A reception was held in the bride's home following the wedding ceremony. Following their honeymoon, the couple will live in their new home on Country Club drive in Grosse Pointe Woods.

Two High School Lads Rescued From Lake During Initiation

Cast adrift in Lake St. Clair in a leaky rowboat off the Seven Mile road dock during a high school initiation ceremony last Friday night, two 17-year-old Grosse Pointe youths were rescued by Farms Patrolmen John Reed and John Pelkey after the dilapidated wreck went to the bottom. The Grosse Pointe high students, William Chase, of 927 Westchester

New Home of Turner Buick Sales

Now located in their new, permanent showroom at 15222 East Jefferson avenue at Beaconsfield, Grosse Pointe Park, the Turner Buick Sales is offering the only Buick service department in our community. Featuring a no charge pickup and delivery service, Harry Turner is displaying "The Best Buick Yet". For further information on this car, 1941's finest automotive buy, call LE. 7748.

Parks Department Heads Named by President; Parking Problems Heard

Grosse Pointe Park's six village commissioners were appointed to head the municipality's various departments by President Karl B. Goddard last Monday night, at a meeting in the Park Municipal building.

The reshuffled posts as announced by Goddard are: Commissioner C. A. "Cap" Pfeiffer, Department of Public Affairs; Commissioner Henry E. Breyter, Department of Public Works; Commissioner Howard P. Marshall, Department of Finance; Commissioner Homer C. Frisick, Department of Health; Commissioner William S. Van Dusen, Department of Safety; and Commissioner Archie Dammann, Department of Water.

A petition signed by 188 Park residents was presented at the meeting, urging the return of angle parking on the north side of East Jefferson avenue between Maryland and Wayburn avenues. Upon the suggestion of Henry W. Piel, Park police chief, parallel parking was substituted in this block several weeks ago. Piel stated that the change had been made to offer local motorists "better traffic regulation and safety." The petition places its request on the fact that business places facing on that block had been affected by the lack of parking space.

Park Budget Hits Snag

A special village commission meeting was called for this morning to discuss the 1941 budget for Grosse Pointe Park.

It is rumored that some discrepancies have appeared that will probably result in an increase in the tax rate for 1941.

The Review therefore withholds any comment on the budget until a comparison can be made between the figures adopted by the commission and those submitted to us by Byron J. Rockwood, village manager.

LOCAL PASTOR HONORED

Rev. M. Luther Canup, pastor of the Grosse Pointe Lutheran church, was elected chaplain of the Michigan Society of the Sons of American Revolution at its annual meeting held in Pontiac recently. Doctor Canup served as chaplain of the Detroit chapter of the Sons of American Revolution for 10 years. His family settled in Pennsylvania 50 years prior to the Revolutionary War. As chaplain of the state society, he succeeds the Rev. Joseph A. Vance, D.D., former pastor of the First Presbyterian church, Detroit.

road, and Don Moore, of 252 Moran road, had been told to row from the dock up the lake to the old Dodge estate, a distance of approximately a quarter-mile, police said. The boat had been equipped with oars, but no oarlocks.

The initiation was supervised by a high school boys' club. Farms police stated Chase is a well known Pointe varsity swimmer, it was learned.

Hardly Any Difference

Piel answered this argument by pointing out that angle parking permitted spaces for eight cars, while parallel parking offered room "for five or six cars." J. L. Wehmeier, safety engineer of the Wayne county road commission appeared at the meeting and told the commission that angle parking in this block produced a definite traffic hazard. The matter was referred to Piel and Commissioner Van Dusen for further study.

The board of review as May 14 and 15. Following this move, Van Dusen was elected president pro tem to serve in Goddard's absence, five votes to 1.

Special Budget Meeting

In an effort to apply the finishing touches to the village's budget for the coming fiscal year, the commission decided to hold a special executive session this morning, Thursday, April 24, at 8 o'clock. This early meeting date was arrived at after several minutes of discussion, and after Commissioner Dammann's joking request for "a 5 a.m. time" was dismissed.

Cyclone Coming?

EDITOR'S NOTE—The following article was written by the Michigan Public Expenditure Survey.

To many undiscerning taxpayers, everything is serene. Business is going good again, despite the many new taxes which have burdened it. For the moment, it looks as though things are once more "hunky-dory."

But wait! Not many people have experienced a Kansas cyclone. Many times these catastrophes are preceded by nice weather—sunny, warm, balmy. Suddenly, the "twister" is sighted. A short time later, it strikes with an awe-inspiring fury. It's the same now with taxes. We've seen plenty of new levies—levies which have sent many a courageous small business man or taxpayer "through the wringer." We've had increases in income taxes and indirect taxes which sap us rather painlessly.

Good business has made many taxpayers forget these temporarily. But the impact of the tremendous new defense taxes will strike with cyclone-violence and many will be sorry if they have not prepared for them by minding their own "P's" and "Q's" in their own backyard.

Our own backyard is the state, county and municipal expenditures. Here at least, we can effect some common-sense economies and put our own house in order to weather the cyclone of defense costs.

Our Michigan legislature has a golden opportunity to show some vision. By economizing here, by passing the consolidated revenue collection bill and similar measures, by writing off the state deficit while revenues are high, then we should be in much better shape to weather the cyclone of terrific taxes and the next depression.

Why not rent that spare bedroom. For sure results advertise in the classified section of the Review.

Music Students of Pierce School to Present Two Spring Performances

Music students of Pierce school will be presented in two performances this Spring, the vocal music students on Friday evening, May 2, in the operetta, "The Ghost of Lollipop Bay," and the instrumental students on Wednesday, May 14, in the semi-annual band concert.

Director for the operetta is Miss [Name], who is in charge of the dramatic phases of the production, and Mrs. Mary Allen, who will serve as accompanist.

Characters in the operetta are Margo Sonnesman as Miss Jeannine Steel; Patricia Baumgarten as Mary; Margaret Gray as Midge; Mary Farmer as Molly; Mary Lou Ewing as Dinah; John Bartemeier as Prof. Alvin Flint; Edward Henkel as Dick; Jack Wilson as Harry; Robert Allard as Tom; and Ray Rochelle as Marcus Adam Johnson. Members of the A and B choruses will play the parts of the other students of the school.

Jacqueline Tenny and Betty Pinkston will dance a duet, and Patricia Fell will do the ghost dance. A chorus of dancers includes Frances Lee Peck, Betty Pinkston, Pat Fell, Marjorie Holland, Beverly Brown, Sue Rogie, Jo Ann MacLeod, Ruth Osborn, Dolores Candler, Barbara Kitson, Marietta Kujath, Barbara Gough, Caroline Morris, and Pat Genematias.

The story of the operetta involves Miss Jeannine Steel, who is director of a school for girls, and Professor Flint, who heads a school for boys. The schools are located on opposite sides of Lollipop Bay. Mary, Midge, and Molly, three girls from Miss Steel's school, and Tom, Dick and Harry, from Professor Flint's school, are close friends.

Mary, wishing to stir up excitement, pretends to be a ghost. Dinah, Miss Steel's cook, desiring to break up camp, so she may return to her lover, pretends to be another ghost. Marcus Adam Johnson, Dinah's lover, turns out to be a ghost, too, since he wants to break up the camp so that he can return to Dinah.

The complications that result when these various ghosts run into one another, and the effect they have on the other characters, form part of the humor of the operetta.

Eighty Pierce students will take part when the school's band gives its concert on May 14. This group of youthful musicians has during the past two years won first division rating at the Southeastern Michigan Band and Orchestra festival held each year at Ann Arbor.

MEETING AND TEA

The Republican Women's Federation of Michigan will hold a meeting and tea at the Women's City club in Detroit on Tuesday, May 6, at 2:30 p.m. in honor of Mrs. Charles W. Weis, Jr., of Rochester, N.Y., president of the National Federation of Women's Republican clubs. Presidents of clubs of the Eastern district of Michigan will act as hostesses. All Republican women are cordially invited to attend.

Woods Business Men Hear Reasons For Five-Year Payoff of Building Debts

Why new Grosse Pointe public schools have to be paid for in five years was explained to the Grosse Pointe Woods Business Men's association by E. R. Van Kleeck, school superintendent, Monday night.

Doctor Van Kleeck said that the school district, under the state law and state constitution as amended in 1932, had no choice in the matter. The constitutional amendment provided that debt service acquired after 1932 should be charged to operating costs. The same constitutional amendment provided that the operating expense tax millage to be shared by the townships, counties and school districts be limited to 15 mills unless a higher millage was voted by two-thirds of the electorate. A further clause provided that the mill-

age could not be increased by action of the voters for more than five years. Taken together, these various provisions make it impossible to sell bonds that run for a period of more than five years, as there is no way by which the buyers could be sure that at the end of the five years two-thirds of the voters would again vote the increased millage.

All school districts in the state are similarly limited to five-year bonds.

Doctor Van Kleeck said that the plan had the virtue of decreasing interest costs but that it was impossible for most communities to pay in five years for buildings that would last half a century. Consequently, most Michigan communities have been unable to supply needed school buildings. Many were unable to take advantage of the PWA's 45 per cent grants because they could not afford to pay off the other 55 per cent of the cost in so short a period as five years. Grosse Pointe, however, had outright PWA grants of 45 per cent on both the Mair elementary school and the John D. Pierce junior high school, the two grants totaling more than half a million dollars.

The manual arts addition at the Grosse Pointe high school, planned to relieve overcrowding in that building, is to be paid for without a bond issue, the bulk of the funds coming from part of the proceeds of the school board's sale two years ago of an acre of Kercheval avenue frontage. This will be the first of the 10 school building projects since the consolidation of the school district in 1922 to be financed without a bond issue. It will also be one of the very few projects financed without a bond issue in the school history of Michigan.

Unidentified Friend Saves High School Athlete From Jail

It took Grosse Pointe high school baseball team 11 innings to defeat Fordson high's stubborn nine on the local diamond, 1 to 0, last Tuesday afternoon, but much of the credit should go to an unidentified friend of Lawrence Schock, 19-year-old winning pitcher, who paid Schock's \$15 fine for speeding last week, after the youth had been sentenced to 10 days in the Detroit House of Correction when he was unable to raise the money.

Arrested by Albert Wyffels, patrolman of the City of Grosse Pointe police, for traveling "45 miles an hour on Waterloo avenue", Schock was arraigned before Justice Frank W. Lindstrom in the City courtroom Wednesday night. Confined to a cell when he failed to post the necessary \$15 (45

two hours later when his high school buddy arrived with the cash. The youth lives at 1242 Maryland avenue, in Grosse Pointe Park.

Backed by two years of previous prep experience, Schock is half of Grosse Pointe high's pitching staff. By turning in a successful season on the mound, he can easily spell the difference between a Border Cities league championship or another mediocre year for the local "Blue Devils".

Possessing a sizzling fast ball, Larry occasionally tends to turn "strike-out mad," and police believe he may have carried some of his excess speed onto Grosse Pointe's streets. Protesting that he had been duped, Schock related, "I was hardly doing 35, and I've got three wickets" (also high school ball player).

Asked his opinion on the 10-day sentence he narrowly escaped, the pitcher shyly commented, "Aw, it wouldn't have been so bad!"

Seventeen Students Receive All-A Cards

Seventeen Grosse Pointe high school students received all A report cards for the first marking period of the second semester, school officials announced early this week.

The students are: Dick Fox, 7B; James Kennedy, 7A; Sally Page, 7A; Lloyd Loring, 8B; Carole Castriucum, 8A; Ross Herron, 9B; Jean Loring, 9A; Shirley Searles, 10B; Myles Standish, 10A; Elaine Raiss, 11B; James Austin, 11A; Fred Gallagher, 11A; Sally Ann Cartmell, 12B; Lucile Barnes, 12A; Jean Campbell, 12A; Francis Nutto, 12A; Anita Uvick, 12A.

Points Resident Wins Three Canadian Shows

Snatching three straight best of breed awards at recent Canadian dog shows, Beaugarde Vakeck, four-year-old Great Dane, owned by Martin E. Guttridge, 40, of 1233 Beaconsfield avenue, is today one of Grosse Pointe's proudest offerings for national and international canine recognition.

A Pointe resident for only a year, Guttridge has been a dog fancier for the greater part of his life. In addition to Beaugarde of Vakeck, Guttridge is now training a one-year-old Great Dane female.

Wins 38 Ribbons Previous to his victories in the London, Chatham, and Windsor shows last week, Guttridge's Beaugarde had been awarded top honors in gatherings at Chicago, Fort Wayne, Columbus, and Cincinnati. In all, the dog has won 38 best of breed ribbons during his show career, Guttridge calculated.

Guttridge, who has lived in Detroit for 10 years, is unmarried and employed by a large automobile concern.

ALL CHURCH BAZAAR

Jefferson Avenue Methodist church, East Jefferson avenue at Marlborough, is having an all-church bazaar, "House Beautiful", on Friday, April 25, opening at 10:30 a.m. A cafeteria luncheon will be served from 11:50 to 1:30 o'clock, with dinner from 5:30 to 7 o'clock. There will be useful articles for sale for every room in the house, also a home bake sale and men's pantry. Every one is invited.

Woods Community Club Plans Dance on May 1st

The Grosse Pointe Woods Community Club will hold a dance in the Hoop-De-Do hall, 2845 Mack avenue, on Thursday evening, May 1.

All proceeds will be used to buy playground equipment for the Community Club's house and playground at Mack avenue and Ridgement. Fred DeMerse, owner of the Hoop-De-Do has donated the building and an orchestra free of charge for the evening. The Broedel Plumbing & Heating company is furnishing the tickets, which may be obtained from any member of the Woods Business Men's Club or Community Club.

Other local stores and individuals who are assisting in the plans for the dance are: Lochmoor Hardware, Bobs Drug

store, Norbert F. Deak, Muehring Service station, Rita's Beauty Salon, Lochmoor Appliance shop, Athman Coal and Coke company, Roilyn market, Clay Period Barber shop, Smiley's Hardware, Phil's Beer store, Vic and Mel's market, Grosse Pointe Woods Sweet shop, Grosse Pointe Woods Barber shop, Lochmoor Greenhouse, Scientific Cleaners, Adolph L. Damman, Earl Dean grocery, Duross tavern, Grosse Pointe Woods Recreation, Grosse Pointe Woods Beauty Salon, Woods Shoe Repair shop, Kroger grocery, the Howard store, Steadman's Drug store, Charlie Louie's Cocktail bar, Al Giesbre, Art and W. Reed, William DeWitt, and C. E. Smith store, Mr. Schimmel, manager.

College Life Pictured By U. of M. Freshmen

Helpful hints on college life were presented to Grosse Pointe high school's eleventh and twelfth grade students who are planning to attend college, last Thursday morning in the school auditorium by Bill Ludwig and Sue Stephenson, Grosse Pointe high graduates.

W. R. Cleminson, Grosse Pointe high principal, presented the two University of Michigan freshmen, who spoke on some of the difficulties encountered by freshmen just entering college and how to overcome these difficulties.

no one to tell you what to do or how to do it, so how you run your life is completely up to you."

"I have plenty of confidence, but don't go up there feeling like a B.M.O.C. (big man on campus), or you'll get the wind knocked out of your sails," said Bill. "During rushing time wait until you have visited more than one fraternity or sorority before making your choice," he added.

That college life is one of the most pleasant and exciting phases of life that one can experience, was the belief of both Bill and Sue.

SOCIAL MEETING

The Amadeus Circle Daughters of Isabella will hold a social meeting on Monday evening, April 28, at (Gabriel) Richard Hall, 9375 Amity avenue, Detroit.

Half of Our Presidents Were Habitual Smokers

It is estimated that about half the men who have been President of the United States have been regular smokers.

Chester A. Arthur and Warren G. Harding, like Franklin D. Roosevelt, were habitual smokers of cigarettes. Theodore Roosevelt and Woodrow Wilson both smoked an occasional cigarette or cigar, but apparently neither was a regular smoker.

Grover Cleveland and Benjamin Harrison were both perpetual cigar and pipe smokers.

U. S. Grant was seldom seen without a cigar in his mouth.

Calvin Coolidge was an indefatigable cigar smoker and inaugurated the custom of supplying cigars for cabinet sessions. His own favorite was a cheroot.

William Howard Taft is said to have tried every possible kind of smoking, but never was a heavy smoker.

James A. Garfield smoked large, thick cigars.

Both Andrew Jackson and his wife smoked corn-cob pipes.

Abraham Lincoln never used tobacco in any form.

George Washington seems to have been definitely allergic to tobacco smoke. His adopted son says that Washington, though a tobacco planter, had the "utmost abhorrence" of the weed, and even when compelled by custom to take a whiff of the calumet while conferring with Indians, the Father of His Country made a wry face and passed the Indian pipe along after one weak puff.

Some writers say that Washington's mother, like many other women of the time, smoked a pipe.

Washington had many snuff-boxes, but it is not certain that he took snuff.

Clerk's Son Marries

Mary Ann Stark, 29, of 1874 Maryland avenue, and Edward W. Stammen, 26-year-old son of William G. Stammen, Grosse Pointe Park's village clerk, were married by the Rev. A. H. Leober in the Messiah Lutheran church last Saturday afternoon, April 19. The couple, shown above cutting a unique wedding cake, are now honeymooning in the Great Smoky Mountains of Tennessee.

Fourteen Boys' Softball Teams Organized At Pierce Junior High

Spring sports at Pierce junior high school have begun with the organization of teams in softball and hardball. Plans are now being made for activities in tennis and track.

Under the direction of Howard Poe, 14 boys' softball teams have been organized. The teams in the seventh grade are headed by James Goldnetz, George Will, Don McPhail, and Kirke Moore. Eighth grade captains are Victor Lisabeth, Ralph Jones, Dick Finch, and Doug Seigfried. In the ninth grade the captains are Bill Phelps, Don Barrett, Bill Bowles, Nathan Van Osdol, Tom Hanley, and Bob Beyer.

From this group 20 players are to be chosen to wear the school colors. They will represent the school in games with other school teams. Players not making the first squad will play on an intramural team.

Instruction in tennis will be given Pierce students on the Defer courts by D. Van Dalen. A tennis tournament which will be open to all Pierce students will be run off later in the spring.

Kenneth Cary will take charge of track activities, practice for which will begin early in May. Interclass meets and a possible meet with Brownell junior high are planned.

Careful Fall Spading Speeds Crops in Spring

In the fall plow or spade up your garden for vegetables, burn all debris and leave the ground in the rough until spring. The winter freezing and thawing will benefit it.

This treatment is especially advisable for heavy soils. Such soil is in some ways most trying to the amateur, but it repays in good measure the well-directed efforts put upon it.

One of the few facts well established about plant growth is that plants take from the soil the building materials they need only in liquid form. So we water our gardens and find that the soil which is retentive of water in just the right way seems to encourage plant growth.

We speak of this quality as the mechanical condition of the soil, and when soil is in good mechanical condition it is known as friable or mellow soil. When taken in the hand it crumbles easily, and while it allows water to run through it quickly it retains water, as a sponge which has been squeezed out still remains moist. Most plants refuse to thrive in a soil which holds too much water, but demand that the soil shall retain just enough.

Heavy soils are made friable by breaking up the cohesion of their particles. This is best accomplished by mixing with them decayed animal or vegetable material, which makes humus. Anything which is decayed or will decay readily is useful, but substances slow to decay should not be mixed with the soil of a cultivated garden.

All forms of wood, including shavings, are detrimental. Leaves decay slowly and should be buried deeply or piled up to rot in a compost heap. Humus is black and colors the soil. Black soil is usu-

Spading Heavy Clay Soil.

ally in good mechanical condition, though not necessarily fertile, while some of the most fertile soils are not black and yet are both rich and friable; for example, the brown limestone soil of Kentucky.

Other things than humus are useful in making clay soil friable. Pulverized limestone is excellent, for it not only loosens but sweetens the soil. Wood ashes, hard coal ashes, sand and even cinders will serve. Much is accomplished by tillage.

Each time soil is handled its manipulation becomes easier and its condition better, provided a single precaution is taken, which is especially important with heavy soils. Never work any soil when it is too wet and never clay soil when it is too dry. The usual test is to mold a handful into a ball and then strike

Borrowing Wives Cause Of Servant Shortage

The fact that housewives often borrow all their maids' wages was cited by the Indiana state employment service as one of the many reasons explaining the shortage of domestic help.

Maids also leave service, said George J. Smith, Indianapolis manager of the service, because employers contend that their help should run a "short-order house," serving snacks at all hours, including the wee ones.

Smith contends that factory and industrial jobs, which are now becoming more plentiful for women, are more desirable than positions as maids because in the latter capacity:

1. The pay is too small in comparison to the work.
 2. The employers give too little consideration.
 3. The care of children in the try-out.
 4. No private quarters are provided.
 5. There is no leisure time.
- However, Smith said, most maids regard their work as "good training"—professionally and matrimonially.

Greenland Important Today

Greenland, the icy island inside the Arctic circle, assumes new importance in America's hemisphere defense program, for Greenland is a Danish possession and Denmark is under German rule.

Although the island boasts only 17,000 residents today, it is the site of the first attempts at European colonization in the New world. Settlements there antedate Spanish and English colonization by 500 years.

Eric the Red, the Viking adventurer, explored the country in 982, and named it Greenland to attract colonists. He returned in 986 and founded colonies. Soon there were 3,000 settlers on the island.

For 400 years the colonies remained in existence. But when the island was "rediscovered" in 1498 all traces of the settlements had disappeared. Modern colonization began in 1721.

Greenland's great ice pack has been called the world's best potential landing field.

Crisp in Eel Market

The war has knocked the bottom out of the eel market, according to Capt. John H. Carter, well-known eel fisherman, who was bound for New York recently with his first boatload of eels.

This specie of fish, said Carter, once brought as high as \$1 a pound, but this year the best he can get is five cents a pound. He added that an important reason for the great drop in prices was that the eels cannot be shipped to Germany.

Aboard his specially built craft, which has an open bottom to permit fresh water to reach the eels at times, were 38,000 pounds—a small shipment. However, it will take care of the present demand with other shipments yet to be made. Some boats carry as many as 75,000 pounds.

Student-Made Articles Delivered to Fort Custer On Good Friday

Nearly 1,500 articles made by Pierce, Brownell, and senior high school students as part of their Junior Red Cross work were delivered to Fort Custer on Good Friday by Miss Jean Boswell, sponsor of the work in the high school.

This most recent contribution to the help of hospitalized soldiers at Custer included: 200 napkins, 225 nut cups, 300 place cards, 150 tray covers, 150 Easter cards, 400 scrap books and 50 cribbage boards made by Pierce students.

With the organization of the Grosse Pointe Junior Red Cross council early this month, the participation of the public schools was advanced to the status of a full fledged division of the international organization, a branch of the American Red Cross. To attain this status it is necessary to carry on local, national, and international activities.

The council, which held its first meeting on Wednesday, April 9, at Richard, is made up of a representative from each school in Grosse Pointe. The representative from Grosse Pointe high school is Sarah Kanter, 11A, and from the Samuel Miller Brownell Junior high school, Carole Castricum, 8A. Mrs. Ruth Pace, instructor at Richard school, is in charge of the Grosse Pointe council of the Junior Red Cross.

In charge of Junior Red Cross activities in Grosse Pointe high school is a group of representatives from each grade. These people were nominated by the Senate. They are: Dorothy Adelsperger, 12A; Sarah Kanter, 11A; Mollie Lester, 10A; Jean Malcomson, 9A; Carole Castricum, 8A; and Sally Page, 7A.

This group held its first meeting on Tuesday, April 8. In order to promote student participation in the project it decided to ask home room teachers and home room presidents to choose one student from their home room to encourage Junior Red Cross work.

High School Senior Gets \$800 Scholarship

Barbara Swain, popular Grosse Pointe high school senior, has been awarded a scholarship to Mac Murray college, a school for women in Jacksonville, Ill.

The scholarship was awarded to Miss Swain on the basis of high scholarship standing, character, social attainments, and general ability.

The award is for a period of four years, and amounts to \$800. It will be necessary for Barbara to maintain a B average, in order to keep this scholarship, school officials stated.

The Grosse Pointe Review is read every week by 35,000 readers in Grosse Pointe and Gratiot Township.

Rain Postpones First St. Paul High School Baseball Game of Year

Rained washed out St. Paul high school's opening baseball game at St. Gregory high's field last Sunday afternoon, forcing a postponement of the contest until a later date as yet unannounced.

Tomorrow, St. Paul will begin its defense of the Catholic league's second division crown, when Annunciation visits Grosse Pointe for the year's first home game. The contest will be played on Kerby field in Grosse Pointe Farms, beginning at 3:30 o'clock. Following in the footsteps of many other Detroit schools, Annunciation is backing a baseball team for the first time.

Cavanaugh Will Pitch

Ed Lauer, St. Paul's veteran coach, early this week announced that Pat Cavanaugh, star basketball player and baseball letter winner, would be his pitching choice for the Annunciation game. Tom "Tuffy" Martin, slugging little freshman, will be behind the bat to gather in Cavanaugh's offerings.

Sunday afternoon, De LaSalle high will engage St. Paul's in an exhibition game on Grosse Pointe high's improved diamond. De LaSalle, a first division school, is rumored to have one of the city's better prep teams.

Middle Rouge Parkway Closer to Completion

Completion of Middle Rouge Parkway was brought a step closer with approval granted this week by the board of supervisors for the Wayne county road commission to acquire additional park lands. Of the 186 acres authorized, 56 acres are along the Middle Rouge river at Nankin Mills.

This land will be developed immediately into playground and picnic areas, it was announced by Charles L. Wilson, chairman of the county road commission. About 1,000 acres are needed to complete Middle Rouge Parkway from Northville to the Detroit city limits.

The balance of 130 acres, composed of nine parcels of tax delinquent land obtained without cost from the state land board, is scattered at points throughout the county where park facilities have not been available. The acreage at Nankin Mills was obtained for a net purchase price of about \$100 per acre.

SCHOOLS TAKE DAY OFF

Grosse Pointe's seven elementary schools will hold regular classes as usual this Friday, April 25, while the junior and senior high schools will be closed because of the schoolmasters' convention in Ann Arbor.

Sex-Control Advanced
In Rabbit Experiment
A score of lively rabbit families, recently produced at the Applied Research laboratories in New York, added weight to increasing evidence that sex in mammals—including humans—can be fixed in most cases before birth.

Biologists at the research institution near Dayton, N. J., announced that 97 out of 139 young rabbits in the experimental group are of the sex sought when the mothers were treated with soda or lactic acid before mating. The normal sex ratio in rabbits is 96 males to 100 females. This was violently upset in both directions.

The rabbit matings are part of an experiment to see if the treatments affect color. So far color results are uncertain. But sex control successes continue.

Monte Cristo's Son, Circus Yarn Featured At Punch and Judy

"The Son of Monte Cristo" will be at the Punch and Judy theatre Friday and Saturday. "The Son of Monte Cristo" has scenes of sweeping and dramatic grandeur, it has smooth, crackling dialogue, breath-taking suspense and mystery, down-to-earth romance and thrills galore. The picture co-stars Louis Hayward and Joan Bennett with George Sanders featured.

Colorful, earthy people and the thrilling drama behind the creaking wagons of a wandering tent show are brought to life in the screen version of Walter D. Edmond's novel "Chad Hanna" which comes to the Punch and Judy Sunday, Monday and Tuesday. Filmed in technicolor, it stars Henry Fonda, Dorothy Lamour, and Linda Darnell. Also "Meet the Fleet" produced by Warner Brothers, in technicolor, in co-operation with the United States navy will be on the same program.

School days, loyalties, youngsters turned detectives, mingle comedy, thrills and heart interest in "Gallant Sons," which is playing at the Punch Wednesday and Thursday. Jackie Cooper, Bonita Granville and Gene Reynolds are the school pals while Gail Patrick and Ian Hunter provide the adult romance.

Thousands of Wives Can't Cook Real Applesauce

A wife seeker of Candia, N. H., claims that at least 3,000 women don't know how to make applesauce. But that is just part of the complaint of Joseph Cronan, 30-year-old farmer, who has spent the last three years advertising for a wife to keep house for him so he can run his farm.

In response to his advertisements, Cronan says he has received about 3,000 replies from women eager to share his life on a 180-acre farm "one of the best in the state." But none of the would-be brides suit him. Cronan admits his standards may be high, but at the same time he thinks middle aged women lack cooking ability. "None of them can make applesauce," he moans, to prove his point.

The applesauce question is important to Cronan who says, "I like good eats and I want a woman who can cook while I run the farm." Unable to find his ideal by himself, Cronan now has offered \$100 to any person who introduces him to the right woman.

"I test them out with sponge cake recipes," he says, "and if they tell me they sit up the flour or beat the eggs, then I drop them right away." That's not Cronan's idea of the best way to make this delicacy, that because it hits the right spot in the stomach is supposed to be the shortest way to any man's heart.

The applicants for positions as Cronan's wife don't get a personal interview or the sponge cake test just by answering his ads. They have to sit down with pen or pencil and do some thinking. The first thing they receive is a penny post card with a questionnaire composed by Cronan to ease the burden of his extensive correspondence.

Animals Living on Mars Would Be Fast Breathers

Speculation that life COULD exist on Mars, the earth's nearest neighbor next outward from the sun, has been renewed by Dr. Walter S. Adams, director of the Carnegie Institution's Mount Wilson observatory, who has reported on some recent studies of the ruddy planet.

Any animal living on the planet, however, would have to be a fast-breathing creature, because of the thin atmosphere, probably would be dried up because of lack of moisture and, above all, would have to be adapted to weather extremes—particularly extreme cold, Dr. Adams observed.

Studying the sun's light as reflected from Mars—which reflects this light exactly as does our moon—Dr. Adams found the planet's atmosphere contains less than one-twentieth as much water vapor as that of the earth. This would make it a dry place, indeed—hence the dried-up aspect of any life that might exist there.

And temperatures on the planet, he found, vary as much as 90 degrees from day to night—from mildly cold, to far below zero.

Other studies have shown the mean average temperature to be 60 degrees below zero.

Thrashing Machines Antiques Today
The thrashing machine, with steam engine and belt-driven separator, was a familiar sight on American wheat farms in 1912. Today tractor-powered combines make cutting and thrashing grain a single operation, have practically driven the old machines from the American scene.

Combines are used almost exclusively in winter wheat areas and are rapidly moving into spring wheat districts. These men do the work of 10, in less time. The tractor was almost unknown in 1912; today there are approximately 1,800,000 in use.

The passing of the thrashing machine robs farming of much of the co-operative spirit that marked agriculture's growth in the U. S. "breadbasket." Neighbors worked without pay to bring grain from fields to machine, knowing they would be similarly repaid. Only the owner of the outfit and his mechanics were paid in cash.

The coming of the threshers was an important annual event. And no banquet can match the meals farmwives cooked for the crews.

Right-Handed Chewers Lead
Most people are right-handed chewers as well as right-handed writers. Dr. Ales Hrdlicka, anthropologist of the Smithsonian institution, declared that studies of more than 5,000 jawbones, including those of ancient Egyptians and modern Alaskan Eskimos, show that the great majority of people keep to the right even when they are chewing.

A slight difference in the lengths of the two sides of the jawbone furnish the evidence of this fact, Dr. Hrdlicka declared. The right side tends to be slightly longer than the left, he explained.

Broiled Meats
When broiling meats, best results will be obtained by turning the meat only once. Broil on one side until the steak or chops are nicely browned, season and turn. Then broil on the other side, season and spread with butter. Serve on a hot platter with appropriate garnish. Length of time for broiling depends on the distance of the meat from the flame, the thickness of the meat and individual taste—whether you like meat rare or well done.

Longest Train in Woman
The longest train ever worn by a woman was probably worn by Catherine the Great of Russia at her coronation in 1762. The train was 225 feet in length and required 50 train bearers to support it.

At the Punch & Judy

Excitement reaches fever pitch in this scene from Edward Small's "The Son of Monte Cristo," the romantic adventure drama now showing at the Punch and Judy theatre. The picture stars Louis Hayward, Joan Bennett and Florence Bates.

Tennis Team Trims Defending Champions In Opening Match

By DICK BODYCOMBE
Definitely off on the right foot, Grosse Pointe high's slightly inexperienced tennis team opened the 1941 season on the home courts last Friday afternoon by trouncing last season's Border Cities league champion, Mt. Clemens high, 8 to 1.

Led by Bob Kunding, who trimmed Mt. Clemens' No. 1 man, Dave Silburg, 7-5 and 6-4, the Pointers dropped only four games and one match during the afternoon of play. Other Pointe winners in the singles were Mike Ware, lean-faced veteran, John Park, Bud Lester, talented swimmer, and Bob Ireland, ninth grader playing his first varsity match. Grosse Pointe's only loser was Tom "Hungry" Ireland, star basketball player.

In the doubles matches, Doug Mackenzie and Bill Healy, George Miller and Joe "Whitey" Beyer, and Bill Reese and Bob Bridges, were all successful by rather lopsided scores.

Careful summing up the infant season, Coach Lawrence Westerville confided, "They're rather young, but they've got plenty of scrap!"

New Mystery Force May Give Light Without Wire

More than 100 scientists and educators watched a demonstration recently of "klystron," a new type of generator which the inventors said sends out beams of power, without the use of wires, over great distances.

The scientists and educators met in Bloomfield, N. J., at the laboratories of the Westinghouse Electric and Manufacturing company. I. E. Mourmoutseff, research scientist engaged by Westinghouse, said the new type of generator might be employed eventually to turn on lights at great distances over the air.

Homes could be illuminated by power coming over the air just as radio programs are now received. He foresaw the time when the generator might be used to increase the number of television transmission channels and to increase the number of messages transmitted simultaneously over telephone wires.

He said the new generator had potential value for producing heat for medical purposes and for improving the means of aircraft navigation.

"The possible uses of the apparatus are limited only by the imagination," he declared. Klystron was originated about two years ago by scientists at Leland Stanford university.

Substituting Cooking Fats
Can fats be substituted for one another measure for measure? Not usually. The amount of actual fat in a cupful is not the same for all fats. Follow these handy rules in making substitutions.

If the recipe calls for lard and you want to use butter or oleomargarine instead, add an extra 2 tablespoons of butter or oleomargarine for each cup of fat called for in the recipe.

Substituting the other way round—use seven-eighths of a cup of lard (1 cup less two tablespoons) of lard for every cupful of butter or oleomargarine called for in the recipe.

If the recipe calls for lard, and you are substituting a hydrogenated fat for it, add an extra 1/4 tablespoon for every cup of lard called for in the recipe.

Navy Recruiting Head Says 197,000 Enlisted Regulars Are Ready

Information released today by Lieut. Com. Carson R. Miller, navy recruiting officer for this area announced that the navy now has approximately 197,000 enlisted regulars.

In addition to building up the regular service, the navy department stated that it had opened recruiting in classes of the naval reserve that have heretofore been closed.

For service during this emergency, enlistments in the naval reserve will be made for a period of four years or minority. Men will be enlisted as apprentice seamen for seamen and firemen ratings, yeomen, signalmen, radiomen, machinist's mates, aviation mechanics and electricians. These men will be sent to the training stations for the regular recruit training period and if found qualified, upon completion, will be sent to schools located throughout the United States for the above specialties. If they are not qualified they will be available for general naval service.

GROSSE POINTE PARK
This is an exceptionally well built California type semi-bungalow. The exterior is face brick all around with tile roof.
The interior is beautifully finished and the first floor has a large living room with fireplace, dining room, library, kitchen, breakfast nook and two large bedrooms with tile bath.
On the second floor there is a large bedroom, lavatory and large recreation room. There is also plenty of storage space.
The basement has a dining room, furnace room, fruit room and toilet. Heat is steam with oil burner.
There is a brick two-car garage and side drive. Lot is 60 by 119 feet. All beautifully landscaped.
Vacant lot to north of this home was originally part of this property and is improved with a brick fence, ornamental gate and fountain.
These properties as individual units or treated as a whole are splendid values. They are priced way below the cost of reproduction at 1941 prices.
We are Exclusive Agents for this property and same will be shown by Appointment Only.

"WE LEAD, OTHERS FOLLOW"

Grosse Pointe's Blood Bank

Cottage hospital of Grosse Pointe is sponsoring a blood bank to save human lives.

Under the new plan, blood is obtained from healthy persons who often volunteer for this service.

Cottage hospital, when it borrows blood from the Detroit source, must either return it within a few days or pay \$25.00.

This is a very worthy cause and we believe that Grosse Pointe will get behind this movement in its usual energetic manner.

Metropolitan Daily Adopts Our Style Head

The Detroit Free Press is to be congratulated upon its improved appearance. This metropolitan daily has adopted Bodoni and Kobel type and all heads are now set flush to the left.

Since John S. Knight took over the paper, there has been a steady advance both editorially and in number of advertisements.

On behalf of our own little paper, we must admit that we have been setting our heads flush to the left for some months past.

Police Officer Conlon Should Be Returned To Duty

Consider the case of Grosse Pointe Park Police Officer Patrick Conlon, who voluntarily requested suspension from duty March 21, 1940.

Officer Conlon spent many weeks in the courtroom, both at the preliminary hearing and trial.

Conlon was appointed a patrolman on the Grosse Pointe Park police force June 12, 1930. He was later promoted to detective.

According to our American system of justice, a man is not guilty until convicted. Officer Conlon's case was dismissed with no guilt.

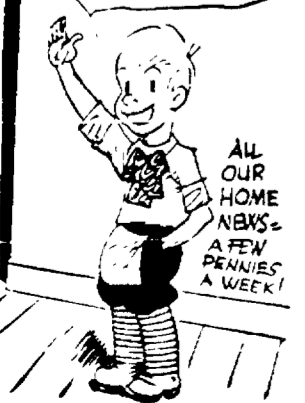

The village commission should consider this case well and on the face of it, there should be no delay in returning Officer Conlon to duty immediately.

FIRST AMITY DINNER

More than 75 religious, civic, labor and nationality group organizations participated in Detroit's first Amity Dinner at the Masonic temple.

MICKIE SAYS—

NOPE, THIS PAPER AINT AS BIG AS THEM IN NEW YORK—NEITHER IS THIS TOWN AS BIG AS NEW YORK—WE DO TH' BEST OUR FIELD PERMITS

Rare Tobacco Plant Found In Juan Fernandez Isle

A long-lost relative of the tobacco plant, a sort of missing link which may help scientists to improve further the modern nicotiana breed.

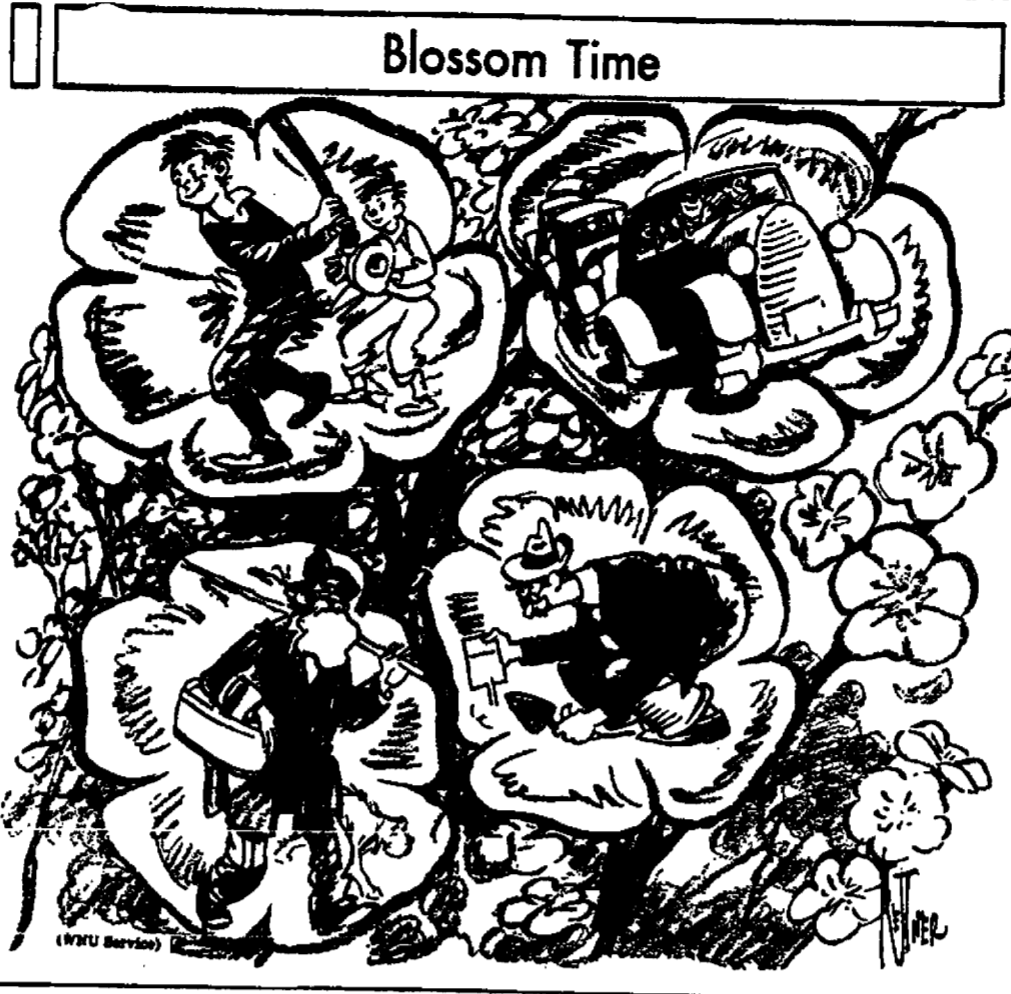

Dr. T. Harper Goodspeed, director of the university's botanical garden, said a lone Chilean collector working under his direction had located the plant sprouting from a cliff on Mas Aduera, one of the islands.

But the collector could not reach the plant. With a rope ladder he dragged down a few leaves and stems and they were rushed to Berkeley where they were identified as a specimen of the long-sought tobacco relative.

Dr. Goodspeed announced he would send a collector to the islands again in search of seed from the plant and perhaps to collect other valuable seeds.

Wings

Icarus is the character in mythology who puffed his wings by flying too near the sun. He and his father, Daedalus, made themselves wings, fixed to their shoulders by wax.

Blossom Time

News Digest

By DICK BODYCOMBE

Detroit's pesky moving van driver strike upset the plans of many shifting Grosse Pointers last week.

After a careful survey, "News Digest" has discovered that seven of the 21 newly elected Detroit Better Business Bureau officials are Grosse Pointe residents.

Laugh of the Week—The veteran Grosse Pointe Farms patrolman, who at the drop of the much-used hat, will argue loud and long that St. Paul's high school athletic teams can whip Grosse Pointe's efforts "anywhere, anytime, etc., etc."

"I'm Forever Blowing Bubbles" Department—Dissatisfied with the results of the first two "five-year plans," Soviet Russia has recently ordered its planning commission to draw up a new 15-year plan.

From Cleveland comes the tale of the two detectives who trailed a victim to the city's main library, walked in, arrested and handcuffed their man, and walked out without attracting the attention of a single person.

"You Take the High Road, and I'll Take an Aspirin" Department—While digging in New York's historic Washington Square recently, frightened workmen uncovered a large number of skeletons.

Michigan's bothersome "Blue Laws," passed in 1846 and strictly enforced, made it unlawful "to work, dance, attend entertainments, or play baseball on Sunday."

According to a recent federal report, Wisconsin, with the human population of 2,000,000, has 1,000,000 automobiles.

geles man used for reasons. First, his wife put black widow spiders in his bed; second, she tried to run him down with the family car.

Dr. Alexis Carrel, world famous scientist who worked with Charles A. Lindbergh on a "mechanical heart" several years ago, is now touring France and Belgium "to study the effects of cold and hunger on the human system."

"Cheap At Half the Price" Department—During the past several months, 16,820 acres of tax-reverted land in three upstate counties have been sold at auction for \$24,143—or about \$1.43 per acre.

Question of the Week—Why do the English think that Elden Auker, St. Louis Browns pitcher, who trounced the Tigers in the season's opener last week, is a German? Answer—Because of his "submarine" ball!

"Your City and Mine" Department—Another famous city landmark, the old "Detroit Journal" building, recently passed into municipal hands.

Lady Godiva (New York style)—A pretty 27-year-old New York woman was arrested last week, for galloping (on a horse) through Central Park while in an intoxicated condition.

Now that Gutzon Borglum, celebrated mountain sculptor, has joined his equally celebrated ancestors, art lovers are waiting for the first contributor to step forward and propose a statue commemorating the great artist.

"Who was That Ghost I Saw You With Last Night?" Department—Thumbing a ride near Barcelona, Spain, recently, a farmer was picked up by a friendly truck driver who was hauling an empty coffin.

Michigan's bothersome "Blue Laws," passed in 1846 and strictly enforced, made it unlawful "to work, dance, attend entertainments, or play baseball on Sunday."

According to a recent federal report, Wisconsin, with the human population of 2,000,000, has 1,000,000 automobiles.

this little tidbit could produce an excellent political slogan or organization. Perhaps, "The Association for the Betterment of Wisconsin's Non-Cow Residents."

"BEYOND THE BENCH"

By JUDGE THOMAS F. MAHER Of Traffic Court

Habitual Disregard of Traffic Laws "To the evil example of all others in like case offending, and contrary to law." Every traffic violation case prepared for court contains this wording on the file following the particular offense specified.

Motorists who habitually disregard traffic laws are contributing immensely to the difficult problem of law enforcement. A bad example is one of the most potent forces of evil afflicting society.

The kiwi is a bird found only in New Zealand. It is the size of a hen, lays eggs that weigh a quarter as much as the hen's, is covered with coarse hair instead of feathers.

Good example is the cornerstone of civilized society, but evil example sits at the wheel of too many motor vehicles.

Good example is the cornerstone of civilized society, but evil example sits at the wheel of too many motor vehicles.

Good example is the cornerstone of civilized society, but evil example sits at the wheel of too many motor vehicles.

Named to Committee By President, Kennedy Tells Postwar Plan

Following his appointment by President Roosevelt as a member of a committee to formulate a postwar plan of super highways, G. Donald Kennedy, state highway commissioner, this week declared that two principal tasks face the committee.

Kennedy, one of seven men chosen for the work which will be under the direction of Thomas H. MacDonald, United States commissioner of public roads, said the first task would deal with the defense highway building program.

"We will also be required," Kennedy added, "to work out a system of cross-country super highways of the Pennsylvania turnpike variety. They will be transcontinental in nature, connecting regions rather than cities."

Kennedy stated that President Roosevelt was vitally interested in road building and was planning to use road construction for absorbing any post-defense boom unemployment.

Endless Variations in Designs for Oil Lamps

Oil for the lamps of America! From 1825 through the 1850s when pewter lamps were the vogue, there seemed to be endless variations in their designs which could not be attributed to particular makers.

Pewter whale-oil lamps were the most common type, and at times have been considered an American invention—but not so. Lamps of the sort were used by the early Romans.

Whale fishing in America was a thriving industry before 1800 and it was easy to obtain this oil which served so well. But it was not until the Nineteenth century that whale-oil was burned in closed lamps here.

Many newer lamps had two or three wicks to give better light; two, side by side, caused a current of air and the increase of oxygen resulted in a stronger flame. As ever there's a crowd and two wicks proved more satisfactory—another Benjamin Franklin discovery, so they say.

Male Kiwi Sits Happily On Eggs; 'Wife' Watches

If you become really friendly with an aviator he will begin talking learnedly about the kiwi. But if you pin them down most will admit they have never seen one.

The kiwi is a bird found only in New Zealand. It is the size of a hen, lays eggs that weigh a quarter as much as the hen's, is covered with coarse hair instead of feathers.

Steamboats First Steamboats operated in this country before steam railroads. The first steamboat was in 1807 and the first steam railroad, in 1831.

YOU can learn to fly... No. 8 FLYING LEAGUE OF AMERICA. Includes diagrams and text for climbing, gliding, and flying.

The Home Front

By ROBERT LAW CRINKIAN

The opinions, and beliefs, expressed by the writer, do not necessarily express those of this publication.

While America's industrialists have been slumbering or busily engaged in our Country's many, and varied interests, the Communists and fifth-columnists have been very successful in obtaining key positions in all branches of our national, state and local governments.

America's industrial barons are beleaguered within their factory-fortresses by armies of saboteurs who have been armed with laws enacted by the congress of the United States of America.

However, being an eye-witness to the confiscation of the industries in Central Europe, and the final enslavement of the workers in those stricken countries, I am going to point out one of the mistakes that have been made by our industrial leaders.

A great number of the industrialists have no understanding of the technical life and have, therefore, shown little interest in anything save the operation of the enterprises they are identified with.

Too, the industrialists have been preyed upon by crusaders with their own private axes to grind, and have been duped into supporting associations and councils formed for the expressed purpose of creating and sustaining a better understanding between labor and themselves.

Your writer was retained, to aid in bringing labor and industry into a closer relationship. I was given to understand that industrial peace was the cause to which I was to devote my energies.

Not one of the associations or councils formed to promote peace between labor and industrialists has settled a strike or been instrumental in preventing one.

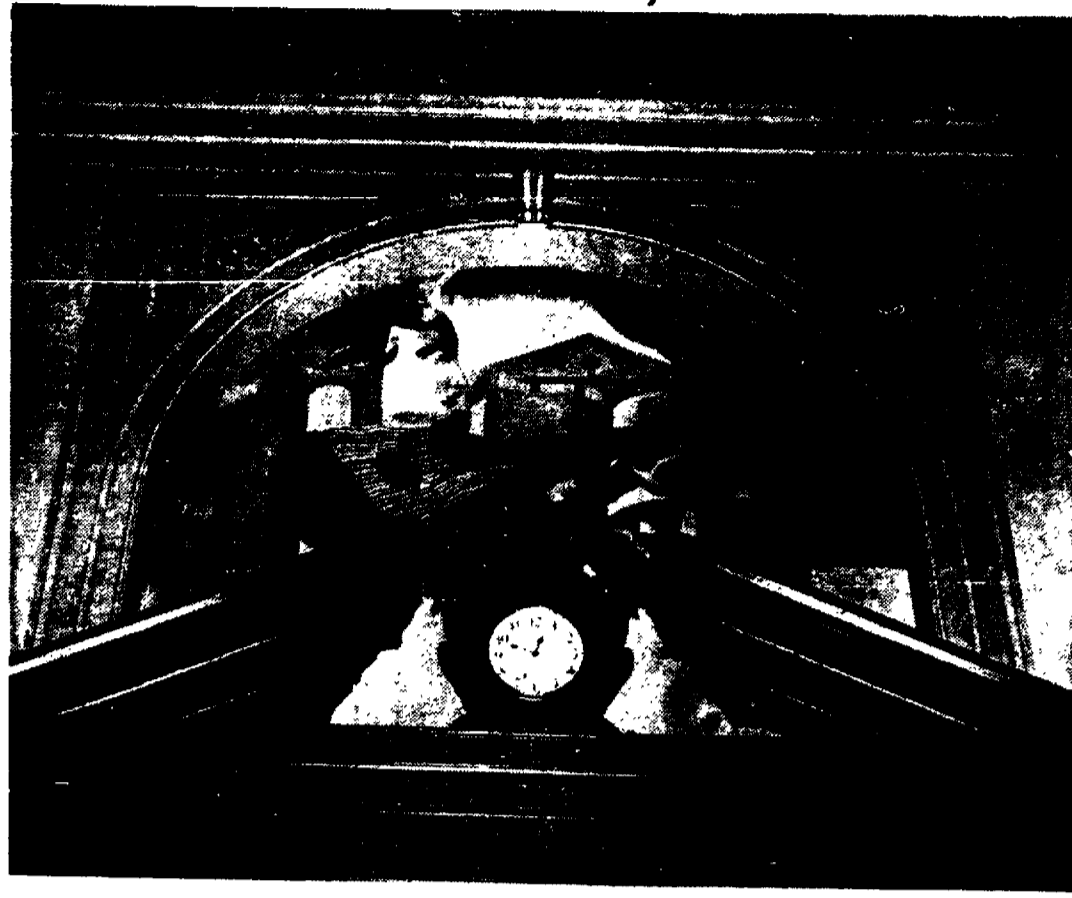

There are many and varied kinds of rockets in this country, but in Cincinnati is a rocket seldom heard of. It is a huge and intricately organized ring of solder thieves.

There are always "fences" waiting to buy it. One of the can factories in that city has had whole truckloads of solder hauled away at night—2,500 pounds and more, according to the company. Petty thievery of solder by workmen in factories goes on all the time, police reports indicate.

High School Holds Open House Tuesday To View New Murals In Library

Mural in Grosse Pointe high school. This is a medieval scene depicting scholars and writers.

Center mural over entrance to library in Grosse Pointe high school is symbolic of the Arts of Literature, Music, Drama and Architecture. The murals are painted in modern style.

Ancient Grecian culture is depicted in this mural, hanging on the walls of Grosse Pointe high school.

Three New Murals By Prominent Artist Hung in Library

Next Tuesday evening, April 29, all Grosse Pointers are invited to a reception and opening view of the Edgar L. Yeager mural paintings in the Grosse Pointe high school library, under the auspices of the board of education. A special program will be held in the auditorium from 7:30 to 8:00 o'clock and in the library from 8:00 o'clock until 9:30. The advisory committee in charge is composed of Dexter M. Ferry, Edgar B. Whitcomb and Perry Rathbone.

There are three large murals in the group; two of them being 9x12 feet in size and located high on the walls above the book shelves. The third is 9x9 feet, and is hung above the entrance doorway.

The first large mural depicts a medieval interior with scholars and writers dressed in fourteenth century costume. The second is a scene in ancient Greece and shows philosophers and writers with scrolls. The mural over the doorway is symbolic of the arts: Music, Literature, Drama and Architecture. The paintings are in modern style and are executed in egg tempera colors.

Original sketches done on composition board were submitted by several artists to a committee of three men, E. B. Whitcomb, Perry Rathbone, former curator of the Alger House, and D. M. Ferry, who made the final selections.

The murals are done on plywood with a canvas covering and are painted in tempera. The large panels are 12 feet by eight feet and the smaller one is eight feet square. One mural illustrates medieval learning, another shows classical learning, and the other symbolizes music, art, and drama.

Yeager did a great deal of research work on costumes and architecture used during the periods represented. Before beginning the paintings, he made clay models about eight inches high of all the figures in order to study the effect of light. He also studied the color scheme of the library before choosing the colors for the murals so that he could select colors that would harmonize.

Other murals painted by Yeager are hanging in the new men's dormitory at the University of Michigan, in the Detroit Naval armory, and in the children's ward at Receiving hospital (these were the first murals painted by Yeager) and the Ford Grammar school library, the last being 60 feet long and representing various fables chosen by the students. He has also contributed paintings for exhibitions at the Detroit Art Institute.

At present Yeager is painting an abstract style mural for the Hudson Valley army camp.

Edgar L. Yeager, the artist was born in Detroit 35 years ago and studied art at Wickers' Art school. He won a scholarship in Europe and studied in Paris and other large European cities. Mr. Yeager spent an entire year on preliminary sketches and the final work. The paintings were executed as a WPA art project and are said to be worth \$10,000.

Local Junior Red Cross Members Attend Meeting

Having completed its organization, the Grosse Pointe Junior Red Cross was entitled to send two representatives to the convention in Washington this week. The representatives chosen were Allen Parducci, 11B, and Rozanne Rupp, 11B. Sarah Kanter and Stephen Baits, 11A, are also attending the convention, but are paying their own expenses.

Last Thursday, a meeting of all the councils in the district, which includes Hamtramck, Wyandotte, Pontiac and many other schools, was held at Red Cross headquarters. Each school organization made a report of its progress. Sarah Kanter made the report for Grosse Pointe.

Glow Worm Stars
Possible explanation came recently of those red stars known as "glow worms." They increase and decrease in brightness 100 to 1,000 times in every 300 days, and in no other stars are found such irregularity of intensity in hydrogen, iron and silicon bands. At Mount Wilson observatory, California, Dr. Paul W. Merrill, astronomer, said the explanation seems to be the fact that excitation of atoms of hydrogen comes deeper within the glow worm stars. "Where part of the bands in the spectrum are almost blotted out, it is due to absorption of light by material higher in such a star's atmosphere," he went on. "The variable stars are low in temperature and in density. Because they are so cool, it is still a puzzle how they can make their hydrogen, iron and silicon lines shine so brightly. Where such lines are not partly blotted out, they are very bright."

Walter Cleminson, principal, and Bernice Stoltenburg, high school librarian, look over sketches with Edgar L. Yeager (center), artist who painted the murals.

Your Soil First
A good gardening soil is both friable and fertile. When friable, writes Helen Van Pelt Wilson in the March issue of House Beautiful magazine, it has water holding capacity, is well aerated and easily penetrated by plant roots. It is rich in active bacteria, due to its humus content. When soil is fertile, it has plenty of those elements which are essential to the healthy, balanced growth of plants.

Too many amateurs, according to Miss Wilson, start gardening with seed packets. That's like trying to decorate a house before the cellar is dug. In gardens, as in houses, good foundations count.

Dig deeply, at least two feet for the perennial borders, place a six-inch layer of stones and debris in the bottom for drainage purposes, and then take great pains to improve the soil which chance has given you.

The first year, if most of the gardening money goes into the hiring of a digger and the purchasing of urromantic but reliable soil conditioning materials it is all to the good.

Highway Department Submits \$16,787,936 In Car Weight Taxes

The state highway department this week submitted to the auditor general for disbursement to county road commissions, record-breaking apportionments of \$16,787,936 in automobile weight tax collections for the first quarter of 1941.

The collections represent proceeds from the sale of 1941 license plates by the secretary of state. In announcing the allocations, it was revealed this year's collections were nearly \$2,000,000 more than for the corresponding period in 1940. In 1938, first quarter returns were slightly more than \$11,000,000 and in 1939, \$10,225,762.

Collections are disbursed on a formula provided for by state law. This requires that so much be returned to the counties according to the amount collected in each one. The remaining one-eighth is returned equally among all the counties.

Legal Notice

Second Insertion

TO THE PRESIDENT, THE VILLAGE CLERK, AND THE VILLAGE COMMISSION OF THE VILLAGE OF GROSSE POINTE PARK, WAYNE COUNTY, MICHIGAN. TO THE SUPERVISOR OF THE TOWNSHIP OF GROSSE POINTE, WAYNE COUNTY MICHIGAN.

You are hereby notified that the Board of County Road Commissioners of the County of Wayne, Michigan, did, at a meeting of said Board held Friday, April 11, 1941, decide and determine that the certain section of road described in the minutes of said Board should be a County Road under the jurisdiction of said Board of County Road Commissioners. The minutes of said meeting fully describing said section of road are hereby made a part of this notice and are as follows:

"Minutes of the meeting of the Board of County Road Commissioners of the County of Wayne, held at 3600 Barlum Tower, Detroit, Michigan, at 10:00 a.m., Friday, April 11, 1941.

"Present: Commissioners O'Brien and Brining.

"It was moved by Commissioner Brining that the Board of Wayne County Road Commissioners assume jurisdiction over the following section of Kercheval Avenue in the village of Grosse Pointe Park, Wayne County, Michigan:

"Commencing at the intersection of Kercheval Avenue and Balfour Road and proceeding thence westerly along Kercheval Avenue to the westerly limits of the Village of Grosse Pointe Park, a distance of 2,000 feet more or less.

"The motion was supported by Commissioner O'Brien and carried by the following vote: Yes, Commissioners O'Brien and Brining; Nays, None. Whereupon it was ordered that the above described street in the Village of Grosse Pointe Park be hereafter a County Road under the jurisdiction of this board."

THIS NOTICE IS GIVEN UNDER AND BY VIRTUE OF ACT NO. 283 OF THE PUBLIC ACTS OF 1909, AS AMENDED.

In testimony whereof, I have hereunto set my hand at Detroit this 15th day of April, A.D., 1941.

BOARD OF COUNTY ROAD COMMISSIONERS OF THE County of Wayne, Michigan CASPAR J. LINGEMAN, Clerk. EDMUND B. SULLIVAN, Deputy Clerk.

Howard Scott, director-in-chief of Technocracy, Incorporated, will speak in the Detroit Institute of Arts auditorium on Sunday afternoon, April 27, beginning at 2:15. His subject is one that is now gripping the minds of all Americans, "The Defense of America."

Sea-squirt A sea-squirt is a peculiar animal belonging to the group of cherting, called tunicates because of the outer covering known as a tunic. The relationship of the sea-squirt to the vertebrates was not known until recently, when the life history was studied. The larva is free-swimming like a tadpole. The adult is stationary and degenerate, losing the notochord or pre-spinal cord, and looking very much like an animated water jar. The name is due to the sea-squirt's habit of ejecting water when irritated.

Literate Soldiers During the World war, of 1,823,266 men who were given the psychological test, 24.9 per cent could not read and write English well enough to understand a newspaper and write a letter. Based on these tests it may be concluded that about 311,000 in the army, or 7.8 per cent were wholly illiterate and 712,000, or 17.4 per cent were relatively illiterate. The number in the literate class was 2,097,000.

Helium Aids Altimeter Production of helium from natural gas at the world's only operating plant, run by the United States Bureau of Mines at Amarillo, Texas, recently reached an 11-year total of 100,000 cubic feet. Production from other government plants bring the all-time total nearly to 180,000,000 cubic feet.

Speeplets Unknown Because no mention is made of speeplets in the whole Latin literature, it is believed that such aids of vision were unknown to the ancient Romans, says the Better Vision Institute.

Death Valley Death valley lies in Inyo county, California, between the Panamint range on the west and the Funeral, Black, Grapevine and Amargoso on the east. The valley is 150 miles long and varies greatly in breadth, in some places less than 10 miles wide and in some twice that breadth.

5526 Is Wages Banished to the woodshed for misbehavior, six-year-old Charles Harlow of Bangham, Maine, did a bit of exploring and unearthed an old hoard of \$25, two gold watches, pieces of jewelry and some documents.

Case Chair Seats Worn out cane chair seats can be replaced quickly and easily with tempered pressed wood, an exploded wood fiber board. The board, with a far greater tensile strength than ordinary wood, can be cut to fit with ordinary woodworking tools.

CHURCHES

GROSSE POINTE LUTHERAN "Christ, the Good Shepherd" will be the subject of the sermon at the Grosse Pointe Lutheran church, worshipping in the Richard school auditorium, Kercheval and McKinley, on Sunday morning, April 27, at 11 o'clock, preached by the Rev. Luther Canup, pastor.

In this sermon, it will be shown how the resurrection of Jesus Christ makes the Christian religion different from all other religions. Mrs. Adeline Doepfing will be the soloist.

Sunday school at 9:45 a.m., with classes for all grades and ages. Announcement of honor roll at next Sunday's Sunday school session.

FAITH LUTHERAN Services for Sunday, April 27: Sunday school at 9:15 a.m. Bible classes at 9:45 a.m. Morning worship service at 10:45 a.m. Crusaders meeting (20 years and up) at 6 o'clock.

The pastor, Rev. R. D. Linhart, will preach on "The Supernatural Christ" Sunday morning.

"Jessica's Journey," a play by the Girl Scouts, will be given in the basement of the church on Tuesday evening, April 29, at 8 o'clock. The public is invited.

CHRISTIAN SCIENCE "Probation After Death" will be the subject of the lesson-sermon in all Christian Science churches throughout the world on Sunday, April 27.

The Golden Text (I Cor. 6:14) is: "God hath both raised up the Lord, and will also raise up by his own power." Among the Bible citations is this passage (James 1:12): "Blessed is the man that endureth temptation: for when he is tried, he shall receive the crown of life, which the Lord hath promised to them that love him."

MESSIAH LUTHERAN "Blessed Be the God of Sanctification" This doctrine will be the theme of the sermon next Sunday, April 27. The sermon will be the second of a series of five, each treating a text of the Scriptures containing a doctrine. The time of the service is 11:15 a.m. The Sunday school will meet at ten o'clock.

JEFFERSON AVENUE METHODIST CHURCH Sunday, April 27, at 10 a.m., worship service with sermon, followed at 11:15 a.m. by classes for intermediates, seniors and adults.

A well-equipped nursery under competent leadership is open from 10 to 12, for the benefit of parents who wish to attend all or a part of this combined service.

At 10 a.m. church school for juniors, primaries and beginners, closing at 11:50 a.m.

At 7 p.m., Epworth League, a service for high school, college and business young people.

World's Finest Gem The American Museum of Natural History in New York city owns what has been described as the finest, emerald green sapphire in the world. The gem was mined in Macon county, N. C.

1939 Peak for Cars Although more than 80,000,000 passenger cars and trucks have been produced in the United States since the turn of the century, the industry did not reach an annual output of 1,000,000 vehicles until 1918. In 1928 and again in 1937 production exceeded 5,000,000 motor vehicles, more than were produced from 1900 to 1918.

Juggernaut The juggernaut as a heathen deity of India, it is taken out in procession periodically, and many of the faithful prostrated themselves before the god's car, which was very heavy, and were crushed.

Largest Per Square Mile Jersey City has the largest population per square mile of any city in the United States. With an area of only 13 square miles and a population in 1930 of 316,000, it had in that year a population per square mile of 24,302.7.

Death Valley Death valley lies in Inyo county, California, between the Panamint range on the west and the Funeral, Black, Grapevine and Amargoso on the east. The valley is 150 miles long and varies greatly in breadth, in some places less than 10 miles wide and in some twice that breadth.

5526 Is Wages Banished to the woodshed for misbehavior, six-year-old Charles Harlow of Bangham, Maine, did a bit of exploring and unearthed an old hoard of \$25, two gold watches, pieces of jewelry and some documents.

Case Chair Seats Worn out cane chair seats can be replaced quickly and easily with tempered pressed wood, an exploded wood fiber board. The board, with a far greater tensile strength than ordinary wood, can be cut to fit with ordinary woodworking tools.

SOCIAL CLUB DANCE

The Social club of the Upper Peninsula will hold a dance in the Mayfair Ballroom, 3116 Woodward avenue at Watson, Detroit, on Saturday evening, May 3. The ballroom features a new floating floor and an \$800 public address system. Refreshments will be served.

Richard School Notes Richard craft class has had a busy season making feeding shelves for feathered friends. Eighteen shelves were made. The children entered their shelves in the local contest in connection with the flower show at Convention hall.

All entries were in the junior group. Joyce Klein won third place for the best feeding shelf at the show. Janet Zur Schmiede, Bob Hollar, Catherine Nebel, and Stuart Friesma received honorary mention.

Keen interest was manifested in the contest and some talk on making entries for next year has already started. The entire group of 4B's enjoyed the trip to the flower show, where thousands of bird houses and feeding shelves were on display.

AN OPEN HOUSE The 8A's of the Samuel Miller Brownell Junior high school will hold an open house on Tuesday evening, April 29.

The chairman for the evening will be Frances Brossey. From 7:30 to 8 o'clock there will be a program in the auditorium presenting music by the Junior high school band, remarks by W. R. Clemons, principal, Dr. E. R. Van Kleeck, superintendent of Grosse Pointe public schools, and a typical home room conference period entitled "A Forward Look." The script for this show was written by Phyllis Cardozo, 8A.

Grosse Pointe Helps Celebrate Annual "Boys, Girls Week"

Starting next week, Grosse Pointe, along with hundreds of other communities in the United States, will be celebrating "Boys and Girls week," an annual observance which aims to encourage community co-operation in all activities directed toward the welfare of our boys and girls.

Many people will take a few moments from the routine of their daily affairs during this week, to give a little extra thought to boys and girls and to the future of the nation whose fate will be in their hands in just a few years.

Important among the activities which will figure in the program, is the election of junior officials temporarily to take place of the regular city officials on "Citizenship Day." The object of this day is to impress upon boys and girls the duty of taking an intelligent interest in civic affairs. On other days, the programs will center the attention of the community upon the educational and vocational development of youth,

which will give them an opportunity to learn about the procedures and attractions of various vocations. The objectives of other days will stress the spiritual growth of boys and girls, the responsibility of the family for the welfare of their boys and girls, and the importance of good health and of constructive leisure time pursuits, all vital in the development of a well-rounded individual.

White Wings
The term "White wings" was first applied to the white uniformed street cleaners organized in 1886 by Col. George Edwin Waring for cleaning the streets of New York city.

Reading Japanese Paper
Before you can learn to read a Japanese paper, you must learn 2,500 characters.

Twentieth Anniversary
August, 1940, was the twentieth anniversary of the carrying of a pouch of United States mail across the continent for the first time by motor-car.

Another Theory Doubted By Science After Years

Does the ether of space, that odd medium in which the earth and everything on it were once supposed to swim, actually exist? A generation ago school books described this mysterious medium in such definite terms that many who are now middle-aged, but who have not kept close track of science since leaving school still believe in the ether as faithfully as they believe in the existence of their noses. Today, however, science suspects that the earlier school books were a bit too certain about the ether, says the Scientific American, for there never has been any really watertight, final, experimental evidence for its existence. There is only logical evidence and logic without actual test often goes astray.

Because they reasoned that there must be some medium through which light could be transmitted, the scientists of a generation or more ago "created," as it were, a medium for this purpose out of nothingness. That is, they "postulated" it. Then they used the word over and over till it sounded substantial and taught it to the youth—those middle-aged men of today. Thus it came to have almost the same standing as if they had actually seen some ether, weighed it, felt it, tested it, smelled it, or heard it.

SCHOOL NOTES

MAIRE
Miss Hoffmann and Mrs. Alexander's room are planning a visit to the Michigan Central depot in connection with their study of transportation. They are to be shown a streamlined train.

Ninety-seven new books were added to the Maire school library last week.

Robert Buslepp was chosen to be Maire school's district delegate of the Junior Red Cross. The first district meeting was held last Thursday, April 17, at Red Cross headquarters.

The 6A group have been making some very pretty bowls filled with flowers of colored construction paper for room decorations.

Henry Walker, in the second grade, found four cocoons this week and brought them to school. The boys and girls are waiting to see the moths emerge. They will be Cynthia moths.

The ungraded room planted flower seeds in pots. These are to be transplanted into the garden when they are larger.

The 1B's had a very interesting time last Friday afternoon. They saw colored slides of flowers and birds. They are learning that in order to have wild flowers that we must not destroy them. Among the birds shown were the well-known robin, pheasant and blue jay.

TROMBLY
The Robert Trombly school was awarded the "loving cup" for its work in safety education this year by the Automobile Club of Michigan. The school earning the traveling cup sends a member of its safety patrol to the annual safety patrol convention in Washington, D.C., sponsored by the AAA and its state members.

Larry Machum, 6A, captain of the Trombly patrol, recently visited Washington with his parents and generously waived his privilege to attend this meeting. We think this action on Larry's part is a demonstration of the highest type of citizen.

David Kilgore, 6A, past lieutenant of the Patrol club, has been selected to represent the school at the convention. He has been an outstanding member of the patrol during the entire year, and served in the capacity of lieutenant during the past semester.

The school representative from the metropolitan area will meet at the Masonic temple, Thursday, May 8, and will leave for Washington by train on the same day. The boys will spend Friday and Saturday in the capital city and will return to Detroit early Sunday morning, May 11.

The 6B class at Trombly school is profiting by many first hand travel

tales. The onset of Spring seems to have increased the traffic between Grosse Pointe and parts north, south, east and west.

Joan Can and Peyton Weary are both vacationing in Florida. Harold Beattie is spending some time at his grandmother's home in upper Michigan. The Easter parade found Janet Eckfeld in Chicago, Ill.; Suzanne Sherman in Cleveland, O.; Margie McCallum motoring in the Smoky Mountains; and Betty Pfeiffer visiting her grandparents in Indiana. William Cunningham was seeing the sights in Washington, D.C. and John Jervis exploring Mammoth Cave on his way home from Alabama. Jack Brinck tells wondrous tales of the United States arsenal at Rock Island, Ill., which he visited last week. Nancy Beard is still enthusiastic about her visit at Sue Roger's farm near Brighton, Mich.

As far as we can figure it out, the frogs, wete as musical, the leaves as green, and the sun as hot in all sections of our well-traveled territory.

British Drill Barefooted
British soldiers are entering the bandon derby stage, drilling and marching barefooted in order to toughen their feet. First they will use soft ground, then harder turf. The war office, in disclosing the innovation, said: "British soldiers are being made the toughest fighting men in the world."

Wet Get Asthma Too
Birds exposed to drafts in wet, chilly weather may develop catarrh of the head colds. This will be manifested by sneezing, a discharge from the nostrils and a thickness due to mucus in the throat. As usual with any ailment of your bird, it will not be so lively and will have a dullness of feathers.

If your bird is affected by a noisy, dry wheeziness it is usually asthma, known as aspergillosis, rather than a head cold. A bird has nine air sacs distributed in the lower portion of the neck, between the lungs and ribs, and inside the wall of the abdomen, and if these sacs become clogged with this fungus or mold, your bird will have great difficulty in breathing, which in turn will make him very weak. This is very similar to hay fever or rose fever in human beings.

Lighted Match Visible Half-Mile
German scientists have been conducting experiments with the black-out to determine how serious infractions of regulations may afford possible guidance to British fliers. They have discovered among other things, it is reported, that a lighted match is visible for more than a half mile, a stable lantern for a mile and a quarter, and the light from one window of a fully lighted room for 1 1/2 miles.

Remove Streaks
Rub a freshly cut kernel of a Brazil nut over scratches in furniture. Although the depressions will remain, the oil in the nut takes away the white streaks.

Sorting Station
The largest sorting and delivery station in the nation for handling shipments has been opened in New York. It occupies an entire city block.

Theta Chi Rho Plans Gala Dance Titled "A Nautical Night"

The Theta Chi Rho sorority has planned a dance called "A Nautical Night," to be held at the Grosse Pointe Park clubhouse, Windmill Pointe drive, on Saturday evening, April 26.

Jeanne Herrinton, chairman of the affair, is busy supervising Beverly Bliss' decorations (all of which will be carried out in red, white and blue with ships, life preservers, flags, etc.) With the help of Bill Raven and Roy Pelletier, Mary aven succeeded in getting Roy Oberschulte and his orchestra to blow out their own sweet melodies for what promises to be a gala affair.

The pledges also assisting are Mary Lee, Evelyn Armitage, Bette Youngblood, Mildred Ferguson and Bette O'Brien.

The Grosse Pointe Review is read every week by 25,000 readers in Grosse Pointe and Grosse Pointe Township.

Adequate Wiring Improves Lights

There is a little more to the phrase "adequate wiring" than is usually visualized. Everyone is familiar with the necessity of sufficient electrical outlets and the convenience of enough switches to light the way around the house, but not all home owners are acquainted with "wire capacity" or "light that is right" or the need to prepare for the future.

When a heavy duty appliance is used, such as ironer or washing machine, a voltage drop is caused and the lights in the house will be slightly dimmed. That is the result of insufficient wire capacity. A reliable electrician can inform the home owner as to the proper gauge wire necessary.

Ceiling or bracket lights controlled by wall switches should be installed in all rooms, halls, and porches. If a wall switch controls a lighting outlet serving movable lights then ceiling or bracket lights may be omitted in the living room.

In all houses new electric appliances are being used now than ever before. Undoubtedly, the next few years will see the development of many more electrical appliances that will be used in homes. House wiring and outlets should be adequate to take care of them.

Homemade Molasses Taffy
A heat wave is undoubtedly no time to stage a taffy-pulling party, but come a long day of steady, moderate rain a distracted mother with vacationing children on her hands will appreciate this recipe for molasses taffy.

While keeping the eight flavors of the lightweight taffy a secret, the confectioner imparted the following information for the homemade molasses variety: Melt 3 tablespoons butter in a heavy kettle, add 2 cups molasses and two-thirds cup sugar, stir over low heat until sugar dissolves. Boil at 250 degrees F., stirring constantly until the mixture turns brittle when dropped in cold water. Then add 2 tablespoons vinegar. Pour out on platter, shallow pan or marble slab (any of them must be buttered), and when cool enough to handle pull until light colored and porous. Then cut in small pieces with scissors or sharp knife. Dust cornstarch or flour on fingers to keep them from burning while pulling and use only tips of fingers and thumbs.

Vitamins in Dog Food
Further than just giving a dog food to see that his appetite is increased, we must make sure that this food contains the vitamins necessary to the well-being of the dog. Calcium and phosphorus in a ratio of two to one should be maintained in a dog's diet at all times. Calcium controls so many conditions of the body, normal and abnormal, and it is such a cheap item to obtain and the dog's need of it is so great that it should be fed in some form every day.

If you see your dog eating grass you know that nature is taking care of something lacking in the dog's system. Grass acts as an emetic and laxative to dogs and also supplies roughage to a diet that is concentrated and lacking in bulk and succulence and also supplies vitamin A, iron and other necessities.

TWO ENGLISH BOYS
"When I was in Windsor, the war started. My mother took two English boys.

"The older one is six. He has black hair and his name is Michael Wightman.

"The younger one was four. His name is David Wightman and his hair is red.

"My mother and father moved and brought them to Grosse Pointe." — KAREN BELL, 4A. Taken From The Richard Reporter.

LUNCHEON-CARD PARTY
The Amadeus Circle Daughters of Isabella are sponsoring a luncheon and card party on Tuesday, April 29, at the Broadway Market at 12:30 p.m. There will be table and door prizes.

Window Treatments
Colonial rooms furnished in Chippendale, Sheraton or Hepplewhite mahogany require damask, silk or satin draperies. If glass curtains are used they should be of sheer voile, crepe or rayon.

Here Are Secrets of Sowing Garden Seed

Space Garden Rows Accurately
How far apart should rows in the vegetable or cutting garden be planted? There is no standard answer to this question. Market growers may plant radishes, for example, in rows that vary from two inches apart, in rich, mellow, weedless soil, to three feet, where it is desired to cultivate them with horse or tractor.

The home garden, which can be watered when necessary, and supplied with plant food as required, should be laid out chiefly for convenience in cultivating; except that vine and bushy crops should have the room they need to develop.

For the leaf and root crops, dwarf peas, beans and most flowers, the width between rows may be equal to the space you can cultivate with one trip of the wheel hoe, or whatever cultivator you may use. This is likely to be 18 inches.

Taller growing vegetables, cabbage, cauliflower and tomatoes, should have up to twice as much; and vine crops four to six feet. It does not pay to crowd. Above all, whatever spacing you decide upon, make it uniform, and reasonably exact.

Some crops the directions tell you to sow in "hills." Except in regions of heavy rainfall and poor drainage, this does not mean an elevation. It simply means that several seeds are sown in a group (to be thinned out later) and the rows are spaced some distance apart, in contrast to the continuous "drill."

Tear off one end of the packet and examine the seed. If they are small it will pay to mix with them three times their bulk in light colored sand, perfectly dry. Mix it thoroughly.

By holding the packet as shown in the illustration, and tapping it gently with the forefinger, the seed can be made to drop evenly in the row, and the sand will prevent sowing too quickly.

After sowing, rake soil over the seeds and tamp it down with the foot of the blade. Soil and seed must be in close contact, so that when germination starts food in liquid form may be extracted from the soil to nourish the growing plant.
