"WE LEAD, OTHERS FOLLOW"

WE HONOR THEM

Next Wednesday, Memorial Day of 1945, we the people of Grosse Pointe will be given the opportunity to honor those men and women of this community who are so faithfully serving er, Barbara Schuler, Joanne Ghestheir country in this time of war. These same men and women will honor those men who have given up their lives so that others might live the kind of lives which they want to live in this "Land of the Free."

Memorial Day brings home to all of us the stirring reminder that "these men shall not have died in vain," but rather so William Huetteman. that their sisters and brothers, nieces and nephews may go on liying and not worry about "that next furlough," "casuality lists," or war department telegrams.

Let the people of Grosse Pointe, those still on the home front, show their true appreciation to these brave men and women by attending the Memorial Day service next Wednesday morning at the high school.

Let us review the names of those Grosse Pointers which are tabulated on the Honor Roll, the edifice which will bear witness down through the ages as a tribute to those who are soing all in their power so that this country will never have to erect another one for the heroes of a future war.

YOUR GARDEN THIS WEEK

Do not attempt to work the soil in your garden while it clogs in wet lumps on your tools. Seeds planted n water-logged earth will not germinate properly and the soil will be harder to work later on. No time will be gained in the end. Persons attempting to drain gardens with ditches to the sewers are advised to be careful that their top soil does not wash off into the lake. The best answer to the problem is simply to wait until the land drains itself.

The best average dates for setting out tomato plants, egg plants, and peppers are from May 25th to Memorial Day. They are of semi-tropical origin and expect to be pampered with warm soil and warm air. If staked, tomato plants should be set 3 feet apart in all directions. Unstaked plants should be set 4 to 5 fruit begins to form.

Make new plantings of all seeds sown early in May as soon as the ground dries enough to work. It might still be possible to get good crops of peas and spinach if July remains cool. If beans were planted earlier, they probably have not survived the wet weather. Set out more cabbage plants to have a continuous supply. Parsip seed should be sown—the seed germinates slowly and some radish seed mixed with it will serve to mark the row. Potatoes can be planted when the ground dries, also corn and New Zealand spinach. Plant squashes, melons and cucumbers after Memorial Day.

Plant potatoes in rows not less than 2 feet nor more than 3 feet apart; the hills should be 10 to 15 inches apart in rows. Corn should be planted in several short rows, not in one long one, because it is wind pollinated.

Vegetables planted in April and early May, which have survived the Infantryman's badge. He also wears rains, will need thinning. Carrots should be thinned when they are 2 to 3 inches tall to stand 1-inch apart also beets, head lettuce will not head unless it is thined. It is possible to reset the young lettuce thinnings,

making another row. Do thinning Driver Fails to Stop; when the soil is moist so that the Hits Gate On Kercheval plants will pull out easily.

Next Sunday is also celebrated as Trinity Sunday-an important festival of the church year. For this doubly important occasion the Rev. O. This will be sung by the Senior choir, which is under the direction of Walter H. Matthes.
