MRS. NELSON DIE

Stretching out her hands to relieve distress pherever found, she is the symbol of a great force

for good in our evil world.

She is the spirit of the Red Cross, a militant, sercking army of good will.

Out of the villages and cities of America, into the heart of the war torn world marches this great people's crusade to beep the lights of civilization

THE RED CROSS is pressing forward on every front. It is a carrying overseas ever increasing stores of relief supplies, eloching and medicines to the war victims with all that goes with that that operation of distribution, warrhouting, transportation and administration. It is shoulder to shoulder with our fighting forces from training camp to the front lines. Understanding and helping with the problems and troubles of the service men and their families. Sharing the dangers of combat to make those little things that mean so much to men available in shell hole or life rafe. Making the weary days of convalescence more bearable with

Making the weary days of convalescence more bearable with

use numes seem and cheerful sympathy that the Gray L give so well.

Training our people on the Home Front. Fighting to su public health when doctors and trained nurses go to war.

a rauning our people on the Home Front. Fighting to sustain public health when doctors and trained nurses go to war. Millions learning through Red Cross First Aid, Home Nursing Courses, Canteen, Motor Corps and Nurse's Aide training to meet the new needs and the grim civilian dangers of modern warfare. Collecting our people's blood for plasma given so freely and needed so ungently in ever increasing amounts as the essaulty lies grow. Organizing and sustaining thousands of production groups where our women give long hours to provide surgical dressings and clothing in moremous quantities.

The barest outline of how the Red Cross serves. It belongs so all of us, it must have support from all. The Second War Fund is greater than the First, but no greater

The Tank Model

volidated Liborator Model

ford Announces NEW MODELS
for 1943

 Γ ORD PRESENTS a mighty line of scalwart new models for 1943 designed throughout for distinctive utility in their respective fields and built with mechanical excellence that is a Ford tradition.

In quality of materials—stronger steels and alloys—in craftsmanship and careful inspection of every manufacturing step, these are the finist products Ford ever made!

Built for global service under every condition and clime, the new products are rugged, able, dependable and have a stout-hearted capacity to "take it" as well as "deal it out."

Each of these models is a masterpiece of design and construction-each has met the gruelling tests of pittless proving grounds-each has been proclaimed by experts an outstanding competitor in its field.

Watch the dramatic performance of this year's Fords in all parts of the world and remember that the lessons learned in building these 1943 models will be reflected in the car you buy after the war. Many of the new metals, plastics and production techniques developed in these days will mean even finer peacetime products.

Entangling Commitments

Entangling Commitments

As long as the present-time planning for the bright new world that is to succeed the war was confined to the pleasant diversions of the professional do-gooders the pastime might be viewed with a certain degree of equaninity. When men high in the official ranks of the country evince the same bent however it becomes another story.

There can be no planning either now or after the war which can avoid taking into the account the whole world economic situation, or to put it more bluntly, the trade and industry provisions that are to be arranged after the war.

The lot of the American working man, and of unnerestance of the party now in power. To the exact extent that the hereditary political and economic tendencies of the party still exist among the more venerable leaders of that party, does the concern of American industry in the coming radeepen.

The people of this country have the sincere hope of being albe to help all of the rest of the world to a better plane of living. No people that has ever existed as a political entity on Earth entertain more genuine sentiment of good will in this direction than those who live here.

They will not be agreeable however to undermining the They will not be agreeable however to undermining the voil of the surface of the world of a century to early out this fine, altrustic idea. It is not human nature and they will not consent to it.

There are too many issues awaiting just around the correct the moment peace comes, to permit any embarrassing

out this fine, altruistic idea. It is not human nature and they will not consent to it.

There are too many issues awaiting just around the corner the moment peace comes, to permit any embarrassing commitments now. These are bridges we will have to cross when we reached them. We don't relist the idea of our future course being charted now by a group of statesmen whose instoric tendencies have always been away from adequate historic tendencies have always been away from adequate relican workingmen and who, whenever they came into control of the Government since this country became a great industrial power, have brought wreck and ruin in their train. In 1914 Woodrow Wilson was spared a repetition or the same experience by the outbreak of the war in Europe and President Roosevelt has been no shining success as a Doctor of American Industry. He pumped Twenty Billions into the economic body of the country in his panicky efforts at artifical respiration in a time of peace and again, he, like his last party predecessor finds plausible excuse for the incompletion of his program in a great war in which we have to bend the aboring our.

of his program in a great war in which we have to behavior and laboring our.

Let these planners, be they starry-eyed theorists on the sidelines or officials still carrying the responsibilities of governing, remember that the people of this country, or any country, will be unwilling to surrender advantages for their wellbeing. Things don't happen that way.

This is an appropriate time to follow the advise of George Washington and recall that entanglements can occur in the economic dispositions of the nation as well as in its millitary or pollitical arrangements.

"We do not believe that our young men overseas, who will run this country in years to come, are planning in their excepts and foothers to spend in rest of their lives alwring Borneo.

"And neither do we believe that the yeap of the country will long submit, after the war is over, to the tax now below that the property of the country will long submit, after the war is over, to the tax now below made in their name by the Wachington stargaters." Detroit Free Press last Monday.

gatern." Betroit Free Press ast Monday.

Right O.' and the Grosse Pointe News has been saying the same, identical thing, often in quite similar language, in at least half of its issues eyer since the apostles of sweetness and light began talking about an economic utopia for all mankind. This state couldn't be achieved oven if every man and woman in America would agree to scale down their own plane of living, which they will not do, nor will any other people, as long as the ambition for betterment exists in the limit of the state of

Springtime Rationing

Springtime Rationing

Aside from the drafting of our young manhood for compulsory service nothing has made the war so real to us here at home as the point rationing system of food consumption control which went into effect last Monday.

The state of the point rationing system of food consumption control which went into effect last Monday.

The state of the control into the point of the food control has been quite frank in telling the people the why and wherefore of the procedure, but necessarily the picture has not been filled in in all its details.

With the Government's plan to restrict the home consumption of certain types of food that there may be more available for our fighting forces, there will be instant and wholchearted agreement by the home folks, even to the point. They will be willing to endure uncomplainingly our enforced sharing of food with those of our allies who have borne the brunt of the actual fighting. Jike Britain and Russia. They will go far and endure much to help those small but always priendly people who have been the innocent sufferers of German aggression. They will have little sympathy with the use of their own needed foods as mere brites to other countries who are hovering on the bords of meutrality, such as 50 mills of the proposition was even bears down most heavily on those foods which can be supplied by our of this point in the calendar when the plans were in the man and the proposition of the plans were in the man and the proposition of the plans were in the man and the proposition of the plans were in the man and the proposition of the bords when the plans were in the man and the proposition of the plans were in the man and the proposition of the plans were in the man and the proposition of the plans were in the man and the plans were the plans and the

in a year can be cut down to a fourth—the high grade scrap iron that remains after the tin film has been melted away will add a mighty pile to the iron heep.

The big lesson which we of the home front must learn at once from the restriction in the consumption of vegetables and fruits put up in tins is to make immediate arrangements to produce all we possibly can on our garden plots.

There is enough land lying dile normally right here in the Grosse Pointe area to produce every growing vegetable the people here could eat in a whole season. There is no better way for us to serve ourselves and our country—and add to our health and strength—than to dig into Mother Earth with a patriotic vengance bright and early this spring.

into Mother Earth with a passessor.

While most of the crops of greatest food value are planted in May the actual planting season runs all the way from leiture and radishes in March to potatoes in June. The lowly turnip broadest even in August, after the earlier crops have been cleaned out, should do very well, and you who were born south of the Mason-Dixon line will have a nostaigir recollection of the delicious greens they produce as long as things grow.

w. And for those who wish to take their fats and physic unitaneously, hog jowl and turnip greens are tops. Ask John Garner of Uvalde, Texas: he knows.

"A Much Finer Funeral FOR A LOWER COST"

This is the answer you will get if you ask any of the several thousand families who have used Harris Servine. There are good reasons for such expressions of safe-factors. There I because both Harris Homes are settly dignified and have the most motor facilities—flower cost because the large number of Harris Homes possible a considerably lower unit overhead charge.

Every Harris Funeral includes more than 50 items of thoughtful service. A companison will quickly contines you that a Harris Funeral has definite advantages in pressing, quality and cost.

THE OLD JUDGE SAYS...

"Looks like a pretty expensive eigar you've got there, Judge."
"Neitre, it is a real good one, Bill. Won it "Neitre, it is a real good one, Bill. Won it can be a second of the second of the second of the second of the second one had and It had to take him up on it. Bet me three good eigers to my one that the three states that still have prohibition have less crime than the other states. Will, all I had to do was etch across states. Will, all I had to do was etch across

the street to my office where I had some recent F. B. I. figures in my desk draws. Why, on the average, those three states have a worse crime record than the whole rest of the country. And there's a good of the country. And there's a good of treason for it, Bill. There's no such a sa a dry community. It's only a question whether liquor is sold legally of ally. And when it's sold illegally it means aggress.

THIS IS PART OF YOUR PAY CHECK

SEE THAT GUN?

It's making things plenty hot for the Axis.

Know where that gun came from?

From the pay checks and pay envelopes of people like you.

It was bought with the money you lent your Government in regular installments from your pay.

But hold on now-

Maybe this isn't your gun at all. Maybe you haven't been lending the Government a regular amount from your pay.

Maybe you haven't been setting aside at least 10 percent of your salary, and more if you can, for War Bonds!

There are still some people around who aren't . . . not many—but it's just possible that you're one of them.

If you are, we're sure it's not for want of patriotism, but because you just haven't quite got around to it.

Tell your boss or shop representative today that you want to help win the war by joining the

Pay-Roll Savings Plan. Tell him you want to save at least 10 percent of every pay check by putting it into War Bonds.

You can't make a better investment-

You'll be buying the weapons that insure a future of freedom, peace, and plenty!

You'll be getting back \$4 for every \$3 you save when the bonds mature.

Makes sense, doesn't it?

THEN-START TODAY!

SAVE WITH U.S. WAR BONDS EVERYBODY...EVERY PAYDAY.

AT LEAST 10%

TRETCHING OUT HER HANDS TO RELIEVE distress wherever found, she is the symbol of a great force for good in our evil world.

She is the spirit of the Red Cross, a militant, marching army of good will.

Out of the Villages and cities of America, into the heart of the war torn world marches this great people's crusade to keep the lights of civilization burning.

THE RED CROSS is pressing forward on every front. It is carrying overseas ever increasing stores of relief supplies, clothing and medicines to the war victims with all that goes with that vast operation of distribution, warehousing, transportation and administration.

It is shoulder to shoulder with our fighting forces from training camp to the front lines. Understanding and helping with the problems and troubles of the service men and their families.

Sharing the dangers of combat to make those little things that mean so much to men available in shell hole or life raft.

Making the weary days of convalescence more bearable with the human touch and cheerful sympathy that the Gray Ladies give so well.

Training our people on the Home Front. Fighting to sustain public health when doctors and trained nurses go to war. Millions learning through Red Cross First Aid, Home Nursing Courses, Centeen, Motor Corps and Nurse's Aide training to meet the new needs and the grim civilian dangers of modern warfare.

Collecting our people's blood for plasma given so freely and needed so urgently in ever increasing amounts as the casualty lists grow. Organizing and sustaining thousands of production groups where our women give long hours to provide surgical dressings and clothing in enormous quautifies.

The barest outline of how the Red Cross serves. It belongs to all of us, it must have support from all.

The Second War Fund is greater than the First. but no greater than the increased needs.

You will not fail the Greatest Mother in the World.

EASY WAYS TO SAVE

COOKING. Plan more own meels la your electric range. Preparing a complete meal in the oven at one time is economical: The same amount of electricity cooks meal, potatese, vegetables and a pudding. • • Use LOW heat to finish most of your surface cooking, after foods have reached the steaming point. When the cooking operation is almost completed, the heat may be turned completely OFF. Stored heat in the unit finishes the cooking operation. • • Don't waste electricity heating up a large quantity of water when cooking vegetables: Half-acup of water is ample.

LIGHTING. Dust steals light and wastes electricity. Wipe all lamp bulbs frequently, also reflector bowls and ceiling fixtures. Use the right size lamp in the right socket. Dark colored lamp shades soak up light. Use light-colored shades wherever possible, or try fitting dark shades with a white lining.

APPLIANCES. Don't leave appliances turned on when temporarily not in use (your electric iron or toaster, for example). Pull the plug, and connect the appliance again later when you are ready to use it. Defrost your refrigerator regularly. Don't overically sealed, have it oiled and inspected regularly. leasy scatter, nave at once and inspected regularly. Be sure to locate your refrigerator away from heat sources, and allow adequate air circulation all evound the refrigerator. The Detroit Edison Company.
