Grosse Pointe P.T.A. Council, rose at this point commending the Board of Education for its forward looking attitude and action and announced a meeting of the P.T.A. Council to be held tonight (Thursday, March 18) at the Board of Education building to which he invited all who would care to come and discuss plans for

romoting the issues involved in he June election. Following this statement the meeting adjourned.

## James Teetzel Serving With Carrier Air Group

James Ralph Teetzel, seaman, JSN, son of Mr. and Mrs. W. S. rectzel of 30 Sunset lane, Grosse Pointe, Michigan, and husband of the former Miss Carol Brenot of Laguna Beach, California, is presently serving on the staff of Commander Carrier Air Group Eight.

Teetzel, who reported to CVG from the Bureau of Personnel, Washington, D. C., is serving as yeoman in the personnel office. Before entering the Navy, Teetzel attended Michigan State College.

**GOODWILL TAKES DISCARDS** Goodwill Industries can profitably renovate almost any item found in the home for resale at one of its three stores. There are exceptions, however, which include the following: coal stoves, combination stoves, furnaces, ice boxes, jars and bottles, laundry tubs, pianos, refrigerators, water tanks and overstuffed furniture.

# It Speaks a Universal Language

Pictured above is the most eloquent motor car ever to travel the world's highways.

It's the great 1954 Cadillac-and it speaks not only with great eloquence, but in a language which is known and understood wherever there are roads to travel ... and people to behold.

First of all, it speaks of its owner-the minute its beautiful hood comes into view.

"Here is a man," it says-almost as plainly as the words are written here-"who has earned the right to sit at this wheel-by his industry and deportment and enterprise. Be he merchant or lawyer or

businessman-or doctor or farmer or financier-the odds are great that he's a credit to his calling and to his fellow men.

"Accept him accordingly-and you'll likely be right in your judgment."

And then, as it comes closer, it speaks its special message for 1954.

Its beautiful silhouette-graceful, freeflowing and dynamic-announces a whole new era in automotive design . . . "expect me to be copied for years to come!"

And its smooth, silent, easy movementa true symphony in motion as it glides past. and on and away-says with clarity and

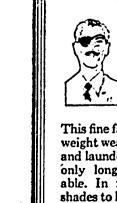

YOUR CADILLAC DEALER

eloquence that the world's standard for performance has been raised again.

And remember-the wonderful "voice" of a 1954 Cadillac, with its significant message, comes as a bonus to the man who sits at the wheel.

It comes in addition to all the priceless fundamentals which make a Cadillac a Cadillac: unvivalled endurance and dependability-incomparable comfort and handling ease-and unbelievable economy of upkeep and operation.

Have you considered letting a Cadillac speak for you? Better investigate today.

# NEW KIND OF LIFE INSURANCE FOR CHILDREN

### Jumps 5 times in face value at age 21 with no added cost

Have you a child or a grandchild between the ages of 1 and 15? .If, so, our new JUNIOR ESTATE BUILDER policy-nicknamed the "Jumping Juvenile" by our field men-will assure him \$5000 of life insurance at age 21 for every \$1000 you buy him now! . . . with no in-... crease in cost and with no further proof of insurability.

You see, this saving-type life insurance automatically jumps to 5 times its original value when the youngster reaches 21, yet the annual premium does not change throughout the life of the policy. Here's the ideal way to guaran-

tee your child or grandchild a substantial amount of life insurance protection as he takes on grown-up responsibilities, with important cash values available for earlier education or later emergencies. Liberal dividends add materially to these values.

Your youngster is now at the life insurance bargain counter. The sooner you buy, the less chance of his developing a health impair-ment that will later make him uninsurable.

For complete details just fill out and return the coupon.

# In the Right Direction

An encouraging move was made by the Farms, when its council voted to join with the City of Grosse Pointe as scope. If you wanted to see or hear one you had to try to get a nucleus for a Pointe-wide body that can mean the saving it through Cleveland. Maybe we don't know the headaches of much time and labor in the administration of municipal of running a t-v station, but it seems that this town is the affairs in which all of the five Pointes have a common interest.

The City came up with the idea several years ago. It suggested that if each of the five municipalities would appoint representatives to a special study and advisory group, a short cut might be found to the solution of many problems which plague the entire Pointe community.

While the idea did not get much of a reception when first proposed, the recent urgency for the development of completing his basic training at some Southern camp. We \*Discussion Group for Expectant Parents-"Feelings About area, has added new stature to the plan.

It is to be hoped the other three Pointes will get into in part: the picture. When a problem arises that affects all of the municipalities, it will be much easier to solve if representatives of each of the Pointes tackle it together right at the difficult to do because everything we do is minutely registart. The administrative officials and representatives from the councils can sit down, and pool their thinking.

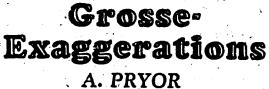

They can then report back to their respective councils with concrete recommendations for action which has already been mutually agreed upon. It seems a far more sensible plan than for each of the five councils to hash over the matter at hand, reach a decision, and then discover pulling it where he can't see it. What I do is wear underwear that their neighbors have conflicting ideas.

# Let's Be Fair

The decision of the Farms council to do nothing about from a tennis racquet factory." the damage created by its plows while clearing the walks of recent snows, isn't sitting too well with those residents who are going to have to foot the bills. They would appear to have a point, though we do not mean to convey the idea one of the dailies last Sunday, a list of perfumes along with that there aren't arguments on both sides.

The clearing of the walks following each snow storm is a service which has long been appreciated by the great that, we don't fool anybody! The list was quite lengthy and majority of the citizenry. There are a few who object, on the grounds that they'd just as soon not have their walks (if you'll pardon our glove) "an-dees-krett." Another peropen, but this is a selfish attitude. Most cities have laws fume that we have always called "Moment Supreme" is which make the cleaning of snow covered walks compulsory. properly referred to as "mo-mawn-sue-prem." We'd feel like If this were true here, the residents would have to clean them a horse collar saying it that way but that's how it is with at their own expense or be subject to a fine.

The mild winter may be blamed for the damage which

"I'd like to get away from earth awhile And then come back to it and begin over. May no fate willfully misunderstand me And half grant what I wish and snatch me away Not to return. Earth's the right place for love: I don't know where it's likely to go better." (Robert Frost)

We don't know what's wrong with radio and t-v in this beloved town of ours but we DO know a lot is missing for some unknown reason. Fer instance, Adlai Stevenson's speech reached us kinescoped about a week after/he made it. Dicky-Nixon was on t-v everyplace else but here . . . where we just heard it on radio. Meet the Press (which Detroit has eliminated) had the controversial Cohn as its guest last Sunday at 6 p.m. In Detroit we got a transcription of the program on radio at the delightful hour of 10:30 p.m. when everyone in his right mind is watching What's My Line.

All big horse races that were nationally televised this past winter . . . weren't shown in Detroit, even by kineonly one that doesn't come thru with important, National events . . . on time. Also we shall never forget not too long ago when Rresident Eisenhower was making an hour long speech on t-v . . . and one local station was carrying "Aunty Dee" at that particular time! We can't be THAT crazy in wondering what goes on!

print some of his letter here in the hope that families with boys in the same "boat" will get a kick out of it. Here it is

"I'm just existing until this basic training is over and also trying to keep alive a spark of individuality. This is mented. They even have a prescribed way we WILL wear our underwear, although I must admit there aren't many different ways to wear BVDs.

"They don't really inspect down to the lower apparel so this is where I put it over on Uncle Sam. One might say from Saks Fifth Avenue instead of the G I stuff. What a rebel! Hope I'm not investigated for subversive activities due to my underpants!

"When I'm through I'll be out of here like a cat escaping

## (Take it easy son-not everyone can Schine!)

A bit of nostalgia reared its gray head when we read in the correct pronunciation of same. The extent of our French pronunciation includes "parley-voo" and "wee" . . . and at the experts.

The nostalgia came when we reached Rigaud's scent has been created, more than any other factor. Generally spelled "Un Air Embaume" and pronounced "uhn-air-ahmthe ground is frozen hard, and the plow which strays slightly over the edge of the walk does little or no damage to the bordering grass. When Mother Earth is mushy, as she has been most of this winter, it is a different story.

Given Under Auspices of The Sixth Church of Christ, Scientist, Detroit, Mich., March 5, 1954 hath directed the Spirit of the Lord, or being his counsellor hath taught him?" The book of Daniel (2:31) states that God "giveth wisdom unto the wise, and knowledge to them that know understanding." Since God is Mind and He is the only God, it follows, in the line of logical reasoning, that God is the only Mind. Flesh, nerve, brain, matter, cannot think. Physicists have shown that all material sub-stance, regardless of its form, whether it be liquid, solid, or gas, whether it be liquid, solid, or gas, whether it be wood, stone, flesh, or brain cell, is nothing more than a collection of atoms. Physicists have learned that the tiny atom consists almost entirely of space in which rotate minute forces around an even smaller nucleus. Reason tells us that the space and elements constituting an atom

How Christian Science Blesses the Individual and

the Family

Arnold H. Exo, C.S.B. of Chicago, Illinois

Ъy

Member of the Board of Lecture ship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts.

Christian Science blesses family and home by revealing "the nature, essence, and wholeness" (Science and Health, p. 465) of God. That which makes a dwelling

place "... the dearest spot on earth, ... the centre, though not the boundary, of the affections" (Science and Health, p. 58)—as Mary Baker Eddy, the Discoverer and Founder of Christian Science, has so aptly described home-consists primarily of qualities such as order, joy, purity, harmony, and an understanding love.

These qualities do not and cannot have their origin in material things, such as building materials, furnishings, and broad lawns. The order, joy, purity, harmony, and understanding loye which make your home and my home "the dearest spot on earth" are reflec-tions of God, who is Spirit. Therefore these qualities are spiritual, and, like all things real, they are limitlessly available, useful, and practical, enriching our whole hu-

are no more capable of producing a thought than is a bolt of lightning or a rain cloud. If the space and elements of one atom cannot think, the spaces and elements of millions of atoms joined together: in the form of a brain and nerve system can never produce one thought or in any way influence or touch God and His creation. Matter and material energy, regardless of their forms, are always nonintelligent, because Spirit, God, Mind, Soul, is the only real intelligence, and this divine intelligence can never be in atoms or molecules, because God

atoms or molecules, because God can never be in matter. In the Gospel of John are re-corded several statements, by Christ Jesus indicating that God, Soul, Spirit, is the only real Mind, For argumba on one second the Mass

The lecturer spoke substantially as follows:

morale of marriage is spiritual unity." Family strife is an evil, blighting foy and health, and too often lead-ing to divorce—a problem which today is needlessly ensuaring many fine husbands, wives, parents, and innocent children in bitter sorrow and disappointment. United homes and families are a higher human demonstration than arc broken homes. Having God as one's only Mind; is the means, potent beyond all others; in maintaining a harmonious marriage and a happy home. This is also the means, potent be-yond all others, in maintaining health, peace; and prosperity; The fact that God is the only real Mind does not cause any member of a family or any other group to lose his individuality. Not amal-gamation but individualization is

the law of Mind to each of its unfolding ideas, because Mind, God, is infinitely individual, and God must and does evidence this fact about Himself in the eternality and individuality of His children. The individuality of each idea of God is forever established, and never merged with that of any other individual spiritual idea. This spiritual law of man's eternal individuality should never be lost sight of in the relationship between husband and wife or between parent and child. A respect for the indi-vidual rights of each member of the family promotes the happiness and health of the members of the

family and also increases affection and co-operation between them,

Divine Mind the Only Healer example, on one occasion the Mas-ter said (John 14:24), "The word which ye hear is not mine, but the Father's which sent me." In Sci-ence and Health, Mrs. Eddy, in re-ferring to Christ Jesus, writes (p. 315): "He knew of but one Mind That family wherein one or more members are, to the best of their ability, actively claining God as their only Mind, is much more likely to be healthier than other-wise would be the case. The un-failing preventive and curative and laid no claim to any other;" medicine used by the Master was the divine Mind, God. Said Christ Jesus (John 14:10), "The Father that dwelleth in me, he doeth the and elsewhere in the same book she states (p. 204), "... in Science it can never be said that man has a mind of his own, distinct from God, the al' Mind." works."

Christ Jesus did not prescribe This fact that God, Spirit, is the drugs, diet, materia medica, or material hygiene in order to heal, and neither does Christian Scionly real Mind, hence your only real Mind, my only real Mind, the only real Mind of anybody, is one ence. The only healing power a of the basic teachings of the Sci-ence of Christ. It is from this absodrug could possibly possess is in mortal mind's false belief that its lute standpoint—that for ins man's only real Mind—that the tragic and afflictive falsity of minds many medicine can heal. To accept mortal mind's suggestion that drugs and material methods are efficacan be uncovered and destroyed. In Christian Science this lie of minds many is called mortal mind. cious in healing lessens one's ability to heal or to be healed by Christ's method of healing. Christ In his letter to the Romans (8:7), Jesus healed on the basis that the Paul designated mortal mind as "the carnal mind," which, said he, "is enmity against God." Since only Mind, God, does the healing. Mrs. Eddy healed on the same basis as Christ Jesus healed. In God is Mind, and He is infinite and explaining how Christian 'Science immortal, there is no room for a finite mortal mind. Therefore this heals physical ills, Mrs. Eddy writes (Science and Health, Pref., so-called mortal mind, together with all its effects, is an illusion. It has no more reality or existence "The physical healing of p. xi), Christian Science results now, as in Jesus' time, from the operation of divine Principle, before which than its own false, aggressive assertion that it exists. Said Christ Jesus of this satanic error of more sin and disease lose their reality in human consciousness and disapthan one Mind and this error's lying belief in itself (John 8:44), "He is a liar, and the father of it." pear as naturally and as necessarily as darkness gives place to

light and sin to reformation." Since mortal mind is a lie about Christian Science reveals that all isease is the objectified state and God, it can manifest itself only in

of my friend's family, who are also Christian Scientists, were away for the afternoon. When notified, they started home immediately. En route they prayed carnestly, ac-knowledging God, good, as supeknowledging God, good, as supe-rior to any accident or its conse-quences. Before the family arrived home, frightened neighbors, in their desire to be helpful, had sum-moned a doctor. When the family members reached home, they ex-plained to the doctor that both they and the injured man were Chrisand the injured man were Chris-tian Scientists and for that reason would handle the situation in accord with the teachings of Christian Science—that is, they would depend entirely upon God, Mind, as the only healer. The doctor, a kindly man, as are

most members of the medical profession, stated that the wound was a serious one. He stated that unless the extensive medical and surgical measures which he outlined were carried out, serious consequences would result from blood loss, severed nerves, and other complica-tions. The Christian Scientists thanked the doctor for his kindness in coming and asked to be left alone with the injured member of the family. When the house was cleared, a Christian Science practi-tioner was called and came to the

The family members and the practitioner declared audibly that the divine Mind, God, is the suffi-cient remedy for every emergency; that man's real life is not dependent upon blood, but is the necessary and unceasing reflection of the Life which is God. With conviction born of spiritual understand-ing they knew that the Principle of their treatment was irresistible Mind, God, and not mere human wishfulness or conjecture. They knew, therefore, that their decla-rations of truth constituted an irre-sistible law of annihilation to the mortal mind beliefs of harmful consequences from any accident, whether such false beliefs were formulated by materia medica, jas voiced by the physician, or formulated by preponderant world superstitions and fears, as expressed by the neighbors. Basing their declarations of truth on the inspired Word of the Bible, these Christian Scientists declared that no idea of God could .ver be subject to laws of matter, flesh, or accident-that matter laws were false because they were not of God. The Scientists declared that these false laws were powerless, without present or future harmful effect, because God's law of harmony and

perfection is the only law. Audible prayer of this kind was continued. In less than an hour the injured man felt strong enough to move about the house, although the doctor had said that the patient would not be able to move himself for several days. A simple bandage was tied around his neck. For the next two or three days he re-mained indoors. After that he gradually resumed his accustomed activities. In about three weeks bandaging was no longer neces-sary. The wound had knit com-pletely. Each day during this period a Christian Science absent

say unto you, Lift up your eyes, and look on the fields; for they are white already to harvest." Mind's inspired ideas are always

available for those who lift up their eyes from the contemplation of limited matter as substance. Right now is the day of salvation of freedom from lack and want-not four days from now, or four weeks from now, or four months from now, or four years from now, or four decades from now. Right now God, good, is all and real, and error is nothing, powerless, and unreal. In Science and Health (p. 227) we find these enlightening words: "Citizens of the world, ac-cept the 'glorious liberty of the children of God,' and be free! This

is your divine right. The illusion of material sense, not divine law, has bound you, entangled your free limbs, crippled your capacities, enfeebled your body, and defaced the tablet of your being."

The primary need of anyone who has a chronic or an occasional fi-nancial struggle is not for more money, is not for more matter, but for more spiritual understanding, more lifting up of thought to look beyond the limitations of matter, to discern God as infinite sub-stance, always infinitely available right now as Love's inspired, reflected ideas—ideas which always abundantly meet every human need. In her book "Miscellaneous Writings" (p. 307) Mrs. Eddy states, "God gives you His spiritual

ideas, and in turn, they give you daily supplies." Spiritual inspiration evidences the ceaseless and irresistible activ-ity of the divine Mind, God, man's only real Mind. When we are spiritually inspired we are not tempted to let our reasoning come to a halt within the false limits of what matwithin the faise limits of what mat-ter presents as supply. With God as our only Mind, we are able to look beyond what the five physical senses are capable of beholding to look beyond a little pay envelope and a small bank balance to dis-cern the omniscience, omnipotence, and omnipresence of Spirit, God the limitless, perfect, and only real substance, which is always available to us as divine Mind'

inspired, reflected ideas. How many families in this day and age, like the Zarephath widow of old, fearfully look down at their little instead of confidently looking beyond the limiting confines of matter into the ever-present sup-ply provided by the inspired ideas ceaselessly flowing from the all-knowing Mind, God! As related in the seventeenth chapter of I Kings, when Elijah, the Tishbite prophet, approached the city of Zarephath, he saw a widow woman of that city. He asked her for a "morsel of bread." But the widow had not yet glimpsed the spiritual fact that limitiess substance is inspired consciousness, Mind, Spirit, bountifully supplying all needs through its reflected, inspired ideas. Instead the widow replied that she did not have bread, but

the healing Christ will animate us, enabling us to heal as Christ Jesus commanded we should heal. In Sci-"Throughout all generations both before and after the Christian era, the Christ . . . has come with some measure of power and grace to all prepared to receive Christ, Truth." This preparation consists—as St. Paul writes in his letter to the Philippians (2:5)—in letting "this mind be in you, which was also in Christ Jesus."

#### Discoverer, Founder, World Benefactor

The Principle, rule, and method of Christian Science Mind-healing, as Christ Jesus taught and prac-ticed it, is fully set forth in the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy. From this textbook and from the King James Version of the Bible cita-tions are chosen which comprise the Christian Science Bible Lesson-Sermons. These Lesson-Sermons are studied during the week by students of Christian Science, and on Sunday are read from the pulpits of Christian Science

churches. When Christian Scientists say that they are grateful to Mrs. Eddy for her unselfish lifework, they do not mean that they worship Mrz. Eddy. Quite the contrary. In ac-cord with her explicit instructions, Christian Scientists, who are grate-ful to Mrs. Eddy, show their gratitude by following her leadership in worshiping God intelligently and letting their lives and healing work attest their gratitude for the many blessings received by reason of this

intelligent worship of God. The magnitude of the lifework of Mary Baker Eddy will become more and more apparent to man-kind as the Christian Science she discovered, the movement she founded, and the activities and rules she established become better understood and accepted in the hearts of men. Christian Science alone of all mankind's discoveries since the Master's ministry—that ministry upon which Christian Sci-ence is based-gets at the root of mankind's problems, be they individual or collective. This evil root is either a false concept of God or

no concept at all. The import of Mrs. Eddy's mis-sion is that you and I, and the or with straw. whole world, may know God aright and thereby be able to follow in the Master's footstep, healing as he healed. Of Mrs. Eddy it has been written (Mary Baker Eddy: Her Mission and Triumph by Julia Michael Johnston, p. 179): "... she gave the world comprehension of Christian healing and its Science of redemption." Scientific Prayer Essential It would be a mistake indeed to imagine that in order to demon-strate the blessings which come to home, family, and business through Mrs. Eddy's lifework, all one needs to do is to repeat such statements The Grosse Pointe only a little meal and a little oil with which she planned to bake a loaf and, with her son, eat and die. Inevitably a limited, mortal mind as "God is my only Mind," or "God is infinite substance." or "Mind's Unurch ideas give me daily supplies." These statements are true and helpful. But to make God's abun-MINISTERS dant qualities our own is much more than a matter of words. It is a matter of prayer and daily Christian living. Prayer is inspired communion with God. It is the spiritual under-standing and acknowledgment that 9:30 a.m. God is the only Mind, Life, Truth, < Soul, Spirit, substance, intelligence, Principle, Love, power, and law-giver, that, as is stated on page 587 11:00 a.m. of Science and Health, God is "the all-knowing, all-seeing, all-acting, all-wise, all-loving." It is the in-CHRISTIAN SCIENCE spired acknowledgment that spirit-ual man is God's expression and SOCIETY evidence of what God is, and that this truth about God and man can-not fail to annihilate the mortal mind lies about us, whatever these Room Wednesday Testimony Meeting lies may be. In referring to the Master's always successful prayers, Mrs. Eddy states (Science and Health, p. 12): "It is neither Sci-ence nor Truth which acts through blind belief, nor is it the human KERBY SCHOOL understanding of the divine heal-285 Kerby Road, at Beaupre ing Principle as manifested in ALL ARE WELCOME Jesus, whose humble prayers were Ð deep and conscientious protests of Truth of man's likeness to God and of man's unity with Truth and Love." Something One error, which renders our prayers unprofitable, is that of praying to a distant god. A god who could be a distant god is not to Depend Upon the infinite, omnipresent God, but a limited god. To pray to a limited god, if there could be such a god, Humanity's call ioday is for security: Can what we think would only add to our limitations instead of wiping them out. By revealing the nature and esprotect us? There is an answer of pricesence of God and the God-derived nature of man as the reflected imless assurance now at hand. age and likeness of, God, giving Many in heartfelt gratitude are identity to every godly quality finding it in the Christian Sci-Christian Science makes it demonence textbook strably plain how natural it is for us to be loyous, healthful, and suc-cessful right now, not at some un-certain time in the future. Chris-SCIENCE and HEALTH WITH KEY TO THE SCRIPTURES tian Science reveals that right now God's blessings are as limitlessly available to individuals and famiby Mary Baker Eddy lies as when the Master taught in Sincere study of this great-Judea and Galilee, and health and book shows anyone how to supply were immediately made turn to God in a way that is manifest to those who were willing to listen and to accept the Christ, both practical and certain. It Truth. shows how to avail oneself of Right now God, Spirit, Love, is the Bible promise, "Thou wilt man's only real Mind. Therefore, keep him in perfect peace, right now each one of us possesses unlimited intelligence whereby to whose mind is stayed on thee: make and to maintain his home as because he trusteth in thee"

lighted with gas and heated by stoves with cord wood always

nished for every classroom. Today the University furnishes enough electricity to light the cities of Sturgis and Charlevoix. The University Hospital at that time consisted of a faculty house and a one-story frame extension. Then it was believed by some that hospitals should be built cheaply so that they could be burned and replaced by another

man experience.

Perhaps some of you might be saying to yourselves, "If the reflected qualities of God which will bless my whole human experience. including my home and my family life, are limitlessly available, use-ful, and near at hand, why do I sometimes have such difficulty in discerning and utilizing these qualities?" The answer might be that you may not understand clearly enough what God is, hence what His qualities are, and the ever-availability and usefulness to you of these qualities in making your home a better home and your family life a happier one. For example, Christ Jesus said that in order to demonstrate the godly quality of eternal life it was necessary to know God, Life, aright. Said the Master (John 17:3), "This is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

Christian Science Explains God

What is God? That is the important question. Have you ever asked it of yourself? If so, are you satisfied with your answer? Do your home, your body, your family relationship, your daily activity out-side your home, whether it be in office, school, store, factory, mine, or on a farm, indicate, at least in a degree, that you are beginning to know the "only true God," and thereby are able to more readily discern and demonstrate the qualities of God which will bless you and your family?

One of the main purposes of Christian Science is to so simply and thoroughly declare God aright that all who are earnestly seeking to know Him may learn what He is and be blessed in their understanding. Based on what she herself proved to be true, Mary Baker Eddy has written in the Christian Science textbook, "Science and Health with Key to the Scriptures" (p. 466), "Science will declare God aright, and Christianity will dem onstrate this declaration and its divine Principle, making mankind better physically, morally, and spiritually."

It is by virtue of its Christianly scientific declaration of God, and the resultant "making mankind better physically, morally, and spiritually," that Christian Science proves itself to be the promised Comforter. Christ Jesus defined this Comforter as "the Spirit of truth" (John 14:17), which would abide with us forever, teaching us

all things. In Science and Health (p. 465) Mrs. Eddy writes: "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Mind, Spirit, Soul, Crincipie, and Truth, Love. . . Are these terms synchymous? . . They are. They-refer to one absolute God. They are also intended to express the nature, essence, and wholeness of Deity." This shows that God is not abstract, mystic, and unknowable. God is knowable because the seven synonymous terms for Him express His "nature, essence, and whole-Dess."

#### God, Man's Only Mind

That God is Mind is implied by. the Scriptures. For example, in Isalah we read (Isa. 40:13): "Who

ways. That is why morta activity of mortal mind's false bemind is the prolific source of all ief that God is not the All-in-allevil, of all that is unlike good-the source of all sickly thoughts, sin-ful thoughts, limited thoughts, that infinite Spirit is not the only Life, substance, power, and intelli-gence. The one Mind, God, never morbid thoughts, warlike thoughts, hateful thoughts. The basis of every wrong act or condition, wherever and whatever it may be, believes a lie, but does understand that He is perfect and All, and that His creation can have no quality underlyed from Him. Hence when is always some kind of a mortal we claim God to be the only Mind, mind lie that God is not the only the lie of mortal mind that God is Mind, Life, Truth, substance, and power-that He is not all. Hence, not all begins to lose its reality and begins to vanish from our con-sciousness. When the false belief in when we erroneously accept the belief that God is not the only Mind, we simultaneously allow disease, inharmony, and fear of evil is no longer accepted, the outmortal mind to act as our mind. We permit mortal mind's lying thoughts to parade as our thoughts ward manifestations of the false belief-disease and inharmony in the home and outside the homeand wrongly influence us. Mortal diminish and then vanish. Thus the logical reme ly for disease and mind, operating as our thinking, makes us believe that we live in inharmony is to stop believing mortal mind lies about God and man, and to rise into the spiritual matter, and that our human existence is filled with evil thoughts, acts, lack, sickness, culminating in death.

understanding of what God is, of what man is as God's reflection, and of the inseparable relationship The only remedy for this awful tragedy being perpetrated on man-kind is in the Science of Chrisbetween God and His reflection. Such spiritual understanding tianity, as taught and demonstrated cannot come from material, mortal by Christ Jesus, and as made availmind, which at best is only an illuable to this age by Mary Baker Eddy in her discovery of Christian Science. Christian Science enables sion. Light can never come from darkness, the absence of light. Only the divine Mind, God, can impart the understanding of the things of Spirit, the perfection of Soul; and the law and order of Principle, be-cause God is the only Mind. If Christ Jesus had attempted to utius to know and prove the truth about God, Spirit, Mind, and to thus find the truth-about man as the perfect reflection or manifestation of God, in whom, there is no evil, no lack of good, no sorrow. In Science and Health Mrs. Eddy Lines Jesus had attempted to uti-lize, as healing agents, such phases of mortal mind as suggestion, hyp-notism, or psychiatry, he never could have raised Jairus' daughter, or the son of the widow of Nain, or himself, or Lazarus. Nor could he states (p. 469): "The exterminator of error is the great truth that God, good, is the only Mind, and that the supposititious opposite of infinite Mind—called devil or evil—is not have stilled the tempest, walked on the water, multiplied the loaves and fishes, restored the palsied hand, sight to the blind, hearing to the deaf, and healed the ten lepers. The Master could not and did not Mind, is not Truth, but error, without intelligence or neality. There can be but one Mind, because there is but one God; and if mortals claimed no other Mind and accepted no other, sin would be uncast out the devils of false belief by

replacing one false belief with an-other. Raiher, he claimed God as Mortal mind, and never person, s always the culprit, and mortal his only Mind and let the inspired man is always the victim. 'It is always mortal mind that is sick, ideas which ceaselessly flow from divine Mind dissipate the false bethat is sinful, that is limited, that liefs originating in the counterfeit mortal mind—false beliefs apparis sorrowful, that suffers. Mortai mind is the error from which we ent as all forms of sin, disease, and are saved by claiming God as the death. Said Christ Jesus (Matt. only real Mind, and by reflecting or expressing divine Mind in our 12:26), "I cast out devils by the Spirit of God." It is on this same houghts and lives. basis that Christian Science casts out evil and error of all kinds.

Having One God, Mind, Brings Harmony

11

Matrimony is much more likely to be a lasting manifestation of love when one or both of the contracting parties recognize that God is Mind, hence their only Mind, because the great I AM is their

known."

SRYS -

The preventive and curative only God. With one Mind, and that God, good, there can be no mani-festation on the part of either husmedicine of divine Mind and the medicine and drugs of mortal mind are antipodes, with nothing in band or wife of such mortal mind common. The methods of matter evils as sensitiveness, jealousy, suspicion, domination, or selfishand of mortal mind are not the methods of Christ Jesus and of ness. Instead, every incident of the daily relationship between hus-band and wife will-exemplify a Christian Science.

renewal of the sacred marriage An Example of Christian Science -, Healing vows. In such an atmosphere, re-

Mrs. Eddy states (Science and Health, p. 482): "Christian Science is the law of Truth, which heals the sick on the basis of the one Mind or God. It can heal in no other with since the human more

other way, since the human, mor-tal mind so-called is not a healer,

but causes the beliet in disease."

spect and growing affection be-tween husband and wife will be About four years ago a friend of mine, a Christian Scientist, accithe invariable rule, promoting hapdentally crashed through the glass door of a china cabinet. A jagged piness in the home and the family. In Science and Health Mrs. Eddy piece of broken glass cut a deep (p. 61), "The scientific wound in his neck. The members

reatment was given by the prac-

titioner In the four years since this healing there has never been any slightest evidence that the severed tissue, blood vessels, and nerves were not perfectly joined and func-tioning properly. In this example of Christian Science healing is seen the truth of the Psalmist's declara-tion (107:20), "He sent his word, and healed them, and delivered them from their destructions."

Christian Science and Children What a happy place is that home where the only medicine is the di-vine Mind, God. This desirable state of affairs must be especially agreeable to the innocent youth who, not having been instructed in popular beliefs about sickness and material remedies, is content to depend upon God, who is Mind and Love, for protection and healing. In such a home the mother does not anxiously fear, and look for symp-toms of disease. This does not mean toms of disease. This does not mean that a Christian Science mother is negligent of her child. Quite the contrary. It means that she is st-tentive, but in a way which does the child the most good. The Chris-tian Science mother does not plant disease in the child's thought by her own unwise words and acts. her own unwise words and acts. Nor does she spoil the child by too much attention and care of the wrong kind.

Christian Science strongly emphasizes that the moral and spiritual education of children is both a privilege and a sacred obligation of the parents. The Sunday School and institutions of learning have their important role in the religious and academic training of the child. But it is primarily at the parental knee and around the family fireside that a love for and an understanding of God is planted in the child's receptive thought. By their example the parents are in the best posi-tion to demonstrate to the child how this right understanding of God governs and sustains mortals at all times, how rectitude overcomes temptation, how Christly dominion overcomes fear, how kindliness overcomes unkindliness, how to return good for evil. Children thus reared are less likely to become involved in juvenile delin-quency or, in their mature years,

in irresponsible adult behavior. It is in the home, under the watchful eye of loving parents, that the seeds of such moral qualities as perseverance, temperance, honesty, trustworthiness, industry, dependability, and meekness are successfully nurtured. When such qualities flourish in the child's thought, they help him to become a successful citizen. His acts will be a credit to God, to himself, to his family, and to his community.

Sometimes a lack of sufficient means to maintain even modest living standards causes much discord and unhappiness in a home. To such a family Christian Science has a practical message of hope. In the words of the Master, Christian Science says (John 4:35): "Say not ye, There are yet four months, and then cometh harvest? behold, I

ense of substance is also a limited mortal mind sense of life, of health, of joy, of good.

Elijah said to the widow: "Fear not. . . For thus saith the Lord God of Israel, The barrel of meal shall not waste, neither shall the cruse of oil fail." When God's spoken by Elijah, had reword. buked the widow's fear that a little meal and a little oil held the issues of life, she became humble and confident enough to obey the word of Elijah. The record concludes:

She went and did according to the saying of Elijah: and she, and he, and her house, did eat many days. And the barrel of meal wasted not, neither did the cruse of oil fail, according to the word of the Lord, which he spake by Elilah."

Christian Science Dispels Fear In healing the widow, Elijah told her to "fear not." How often Christ Jesus detected fear in the thoughts of those who lacked health, supply, and joy, and began his treatment with, "Be not afraid." Fear is a manifestation of mortal. mind belief that evil is real, that there is or can be a presence and power, a substance, intelligence, and life apart from and opposed to God, infinite good.

Fear blinds and binds men. Fear hides from mortals the fact that, God is the only Mind. and thereby keeps mortals from discerning the inspiring ideas of divine Mind and utilizing these ideas in the demon-stration of health, supply, a better home, a more prosperous business. Just as fear mesmerizes individuals, it mesmerizes groups of indi-viduals, such as nations, into sacri-ficing freedom of individual thought and action in order to gain a fancied, security - through such material modes as regimentation. But unless people have freedom of thought and action there can be no security, because there is no secu-rity without freedom. The most secure man is the freeman, not the bondman. 🗠

#### Christ Jesus

It is the Christ, the Son of God, the manifestation of God, Mind, which comes to the human conciousness and destroys therein the false beliefs about God-beliefs manifest to the five physical senses as fear, bondage, lack, limitation, sickness, sorrow, unhappy homes, sluggish business, and similar evidences of mortal mind. The Christ the "dearest spot on earth" (Sci-ence and Health, p. 58). Right now God is omnipotent Principle, everis the Messiah or Saviour. In Sci-ence and Health Mrs. Eddy makes present Truth, the only lawgiver. his helpful statement regarding the nature of the Christ (p. 332): "Christ is the true idea voicing Therefore right now God's law, "I am All" (No and Yes, p. 30), is the good, the divine message from God absolute law of peace and harmony to men speaking to the human con-sciousness. The Christ in incorpon the affairs of men and of na-ions. Right now God is man's only image and likeness, dispelling the illusions of the senses; the Way joul and Life, the substance which Spirit, inspired consciousness. the Truth, and the Life, healing the ible for us to demonstrate healthick, and casting but evils, destroy-ing sin, disease, and death." Jesus wan the son of the Virgin ul bodies, abundant supply, and conomic security. Spiritual man s God's untarnishable, indestruct-

ble glory, because eternally "God expresses in man the infinite idea Mary. He was endowed with the Christ-the healing inspiration of Mind, God-without limitation forever developing itself, broadening and rising higher and higher from a boundless basis" (Science This Christliness enabled the Master to do his incomparable works. As we claim God as our only Mind. and Health, p. 258).

# REPUBLICAN PART

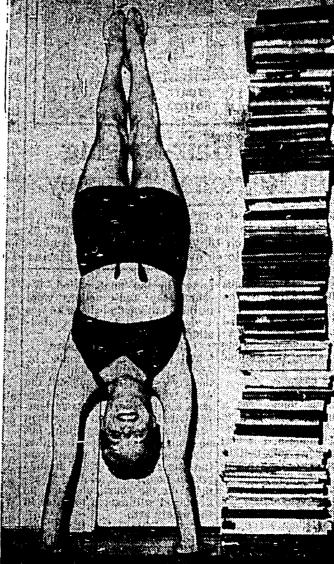

THE ELEPHANT'S HOME—In this one-room schoolhouse in Ripon, Wisconsin, the Republican party held its "first recorded meeting" in 1854. The 100th anniversary of the GOP will be celebrated March 20, and the Republican officials from all over the nation will join Ripon party members for a re-enactment of the founding.

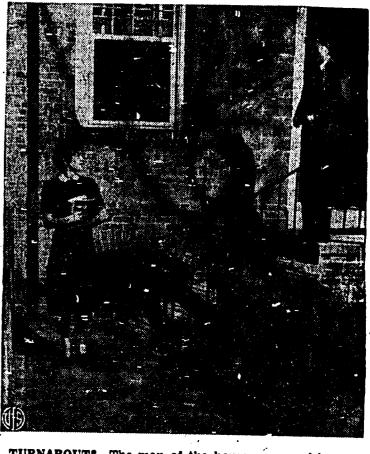

**DODGER DIPSY-DO** — Don Zimmer, heir apparent to Pee Wee Reese's shortstop berth with the Brooklyn Dodgers, whips the ball to first base from high in the air in a double-play drill at the team's Vero Beach, Fla., training camp. Zimmer, a highly regarded prospect, may spend one more year in the minors while waiting for Reese to hang up his glove.

HOW IT STACKS UP-This is how many books you'll have to read before you get your diploma, Harriet Carrol (left), a senior at Marymount College in Los Angeles, tells freshman Joanne McKay. Harriet is the daughter of Hollywood songwriter Harry Carrol, author of such hits as "I'm Always Chasing Rainbows" and "Trail of the Lonesome Pine."/

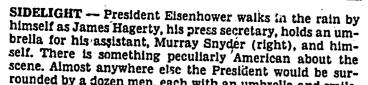

UPSIDE-DOWN SOPRANO CHALKS UP RECORD—At New York's Carnegie Hall the other day Washington State's soprano, Frances Yeend, chalked up a record of 150 appearances as soloist with 44 major U. S. symphony orchestras during the past eight seasons. This record is unsurpassed by any other vocal star and gives her the clear title as "the nation's No. 1 symphony vocalist," or so she claims. The blonde singer, who stands on her hands for several minutes each morning to tone up circulation and ward off colds, indulges in her favorite exercise alongside a stack of musical scores exceeding her own height, any one of which she is ready to sing at the drop of a note.

MANTLE OF MEXICO — Borrowing a fashion note from the Mexican peasant in his colorful poncho, Charles Creed of London drapes a voluminous matching mantle over a tweed dress for spring. The grav-and-gold

tweed "poncho" has a deep, kangaroo pocket at the front.

rounded by a dozen men, each with an umbrella and smile. Here, good old common sense determines where the umbrella is needed most, not political factors.

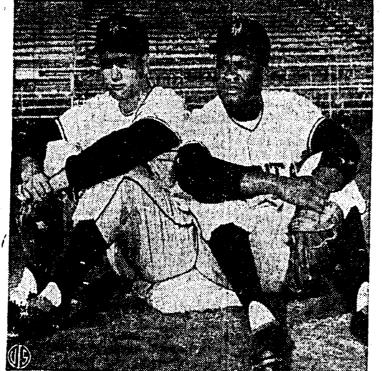

CROSSROADS OF THE DESERT—Camel and trailer paths cross on the sands of Saudi Arabia as Bedouin driver stops to chat with crewmen of exploration team working for Arabian American Oil Company. Thanks to the camel, automotive travel over the desert has been made easier. Seeing the splaying action of his hoof in the sand inspired Aramco engineers to develop a partially inflated sand tire.

"3-D" IN COLOGNE—A bosomy movie queen bursts from the screen to embrace a bespectacled "3-D" film viewer, much to the delight of the crowd watching this parade in Cologne, Germany. The motto of this float was "3-D With Feeling."

•

**BON VOYAGE** — Two enthusiastic Turks seem to be unusually delighted with the ride they "hitched" from a passing iceberg drifting through the Bosphorus in Istanbul. The famous straits froze during an exceptional cold wave that swept through Turkey. In the background can be seen part of the residential area of Istanbul under a blanket of snow.

WHO'S ON THIRD?—Joe Amalfitano (left), a "bonws boy" from San Pedro, Calif., will try to displace veteran Hank Thompson (right) at third base for the New York Giants, now training at Phoenix, Ariz. Thompson was recently named the "varsity" third sacker by manager Leo Durocher. He said others would have to "knock" him off, if

in this skirt of pastel cotton with matching halter and new "flouncer," flounced stole introduced by Margaret Newman of Miami. The print also was designed by her.

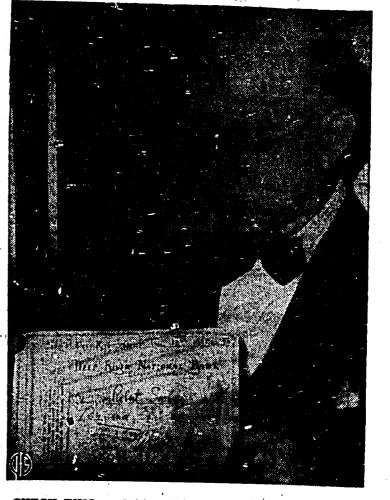

UNDER WRAPS — Huddling under a blanket when a cold wave hit the Brooklyn Dodgers' Vero Beach, Fla., training site are (left to right) Duke Snider, Pee Wee Reese, and Roy Campanella. The trio of stars sought shelter to keep vital muscles from tightening up.

CHERRY BLOSSOM PRIN-CESS — Eighteen-year-old Ellen Dillon, 1954 New York State Cherry Blossom Princess, samples a cut of cherry pie at the New Yorkan restaurant in New York City after her royal crowning. She'll go to Washington, D. C., next month to compete against girls from all over the country for the title of "Cherry Blossom Outer".

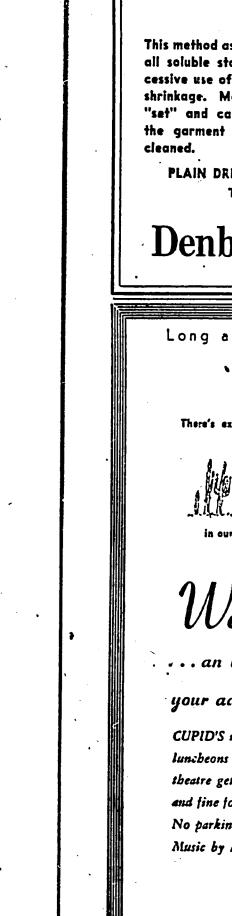

TURNABOUT?—The man of the house says good-bye as the woman of the house goes out in the morning. This man, however, is Senator John F. Kennedy, Democrat of Massachusetts, and he's not sending his wife out to earn their bread and butter. Mrs. Kennedy, the former Jaqueline Bouvier, is on her way to classes at Georgetown University Foreign Service School.

CHECK THIS — A king-size, handmade bank check for \$10.25 is displayed by Louis Thomas, president of the Deep River National Bank, in Deep River, Conn., on which the check was drawn. Measuring nine by six inches, the check was sent by Wilfley Scobey to his son, Robert, as a 19th birthday present. After much trouble, Robert, who is a student at Yale, succeeded in getting the check cashed. At left of the check, Scobey typed: "Special Birthday Dividend No. 19. Payable on the 19th birthday of one Bob Scobey in biological honor of said momentous occasion."

# who, where and whatnot by wboozis

Architect John K. Cross spoke to Grosse Pointe Friends of the Library last Sunday afternoon and showed them slides of Pointe homes he considered closely approximating the "Williamsburg brand" of Georgian architecture. The Pointe beauty homes included those of: The John Owens III; on Stephens road; the Wendell W. Andersons, on Vendome road; the Walter J. Dossins on Provencal road; the Alger Sheldens on Provencal road (reminiscent of the governor's palace at Williamsburg, Va.); the Robert O. Derricks on Ridge road. Also included was the very devoon looking Grosse Pointe Farms pumping station on Moross road.

Soon-to-join-the-benedicts Bob Cudlip ran out of gas on his way to his engagement party last Saturday evening. His fiancee is Gay Buhl, daughter of the Arthur H. Buhls Jr. of Provencal. Incidentally, the bride-elect's grandmama, Mrs. Howard Freeman Smith, sent her a beautiful orchid lei from Hawaii where she is vacationing.

No chance of Mrs. Frank David Boynton ever forgetting a grandchild's birthday. She wears a lovely charm bracelet with eight thin gold discs, dime-sized. Each one is engraved with name of a grandchild and that particular angel's ·birthday!

We're SO glad Vincent R. DePetris turns very definite thumbs down on anything but all white flowers for the bride. We were worried when we read that a recent florist's convention in Detroit suggested rainbow-hued bouquets for the middle-aisle girls.

The George Christensens, of Bishop road, are just home from that flight to Europe and a call at the elegant chateau school, Brillantmont, in Lausanne, Switzerland where their subdeb, Karen, will be a student next autumn. What a packing job Mama Christensen is going to have! Latest request from the sub deb is that her saddle be included in her luggage. So far, she hasn't insisted that her favorite horse be gage. So far, she hasn't insisted that her favorite finde sends Mrs. James M. risher's interest valuting sent to Switzerland, too. The sub deb's schooling will include hobby . . . she really has nothing to do with it. a course in domestic science.' She's loved to cook since she was a toddler.

## PILFERINGS

Some definitions which you needn't memorize:

Baker: The local doughnut and pretzel baker is the same little boy who always wanted to make some crooked dough.

Genius: A guy who can do almost anything except make graphs professionals took of a living.

We: Please never say "We" unless you have a tapeworm. Uncertainty: The only period of life which should give us cause for uncertainty is that brief stretch from the cradle to the grave.

Diet: "No matter how little I eat, the food is waisted," sighed the fat girl.

Conceit: It's easy to pick the best people. They'll help you do it.

in the workshop, as well as in industry hardened lenses for your glasses are important. There's no telling when that sturdy hardened lens will stop a flying particle that might otherwise cause eye injury. With modern hardening equipment all types of industrial and dress wear lenses can be hardened, provided they meet the recommended thickness specifications. In the hardening process a precise control over the heating and cooling cycle to insure uniform hardening is used. Hardened lens are breakable against unusually severe blows, but it can still afford a very high degree of protection. So if Junior is real active we suggest you see Johnston Optical Co., on the hill,

Here is some brand new information. In recreation, at home or

for hardened lens mounted in a suitable frame. They've recommended especially for monocular patients, children, vocational or avocational uses and for sportsmen. Wonderful.

When you buy your Spring bag, don't think of just any old bag... (think of a tote your pet catch-all) plus a com-

panion bag. This season it's smart to carry a tote . . . and a companion. Choose a tapestry tote and a plain companion that latches onto the handle of the catch-all. Or choose two bags in contrasting solid colors . . . or one solid, one print. Arthur Olsen, 80 Robert John; Why not have one? Jacobson's Accessory Department.

We thought we really had something when we told you about the bright-eyed five-year-olds we saw at Marie Bird's a couple of weeks ago. But this week we found that even the little two-yearolds have fun getting their bair carefully cut and shaped. Ummm, Marie Bird's staff 'love the small fry. All the little ones need is an intra-curl cut to turn them into the charmers that their lovely mamas want them to be. 117 Kercheval. For appointment . . .
