### Police, Students In Rap Session

#### By Ror Mallard

Last night I spent two and one-half hours with the police. But unlike many meetings with the police, this time we were involved in a rap session between local law enforcement agencies and a few students from North High School. The session got underway

when students paired off with police officers from the area and got into personal interviews between the two in each pair. Topics discussed in the interview ranged from feelings towards drugs to how the police officers met their wives. When the private sessions were over the pairs joined back into a group to share their experience and introduce their partners. During the main session the

police reminisced about the good old days: "The cops would work us over and when they did you would tell your parents that you got into a fight or they'd work you over too." (And kids think we have it bad today). After the police finished reminiscing about being dog catchers and plumbers we got down to some serious discussions. Stereotyping seems to be the

Stereotyping seems to be the major problem link in communication between students and the police. Grades, school spirit, and the roles that people play in society were tossed back and forth between students and police. Mike Ferrence of the Youth

that there wasn't enough time that there wasn't enough time to really get into things. Most police officers were there on their own time. Senators and Members of the House of Representatives all make exactly the same yearly salary, which is \$42,500.

With a self-cleaning oven all you have to do is turn a knob and the messiest job in your home (oven cleaning) takes care of itself. Giving you time to take care of the more pleasant things

TU 1-5000

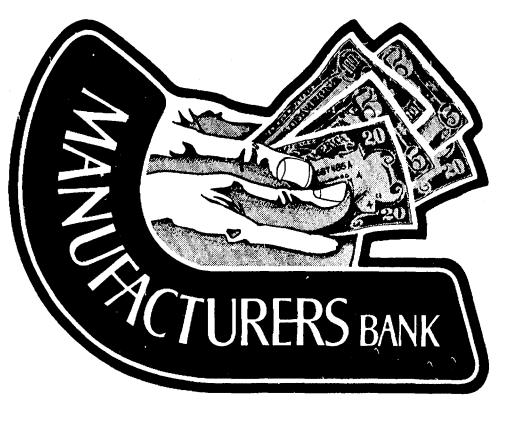

But a self-cleaning oven is just one good feature in today's modern Gas range.

With Gas you have the advantage of smokeless closed door broiling. Infinite heat control. And best of all, total economy. Because a modern Gas range uses less Gas to do the same job. And a Gas range costs about one-fourth as much to operate as an electric one.

So before the holidays, stop by your dealer or any Michigan Consolidated Gas Company showroom, and buy a new Gas range with a full range of features.

A new Gas range will save you Gas and money too. And remember-oven cleaning is no job

The Ball is expected to raise more than \$35,000 to support the new Coronary Artery Surgery Program at St. John Hospital which, when placed in operation early next fall, will make St. John the first hospital in the Detroit area to concentrate efforts in this dra-matic, life-saving heart surgery procedure.

In the few years since the procedure has been developed it has proved remarkably effective in pre-venting heart attacks in persons in imminent danger of attacks.

Past Ball proceeds have helped finance such St. John facilities as the Coronary Care Unit, the Neo-Natal Intensive Care Unit, the Emergency Center and the Intensive Care Unit.

Each year, the Ball directs its funds to a specific St. John program or facility, all designed to increase St. John's scope of services to the community. Each year, that scope of services grows.
