# Morgenthau Goes Haywire

Apparently President Rossevell had some time age named a committee of his cabinet to advise him of their news as to the treatment of Gernany after the war. It named as the committee Secretary of State Hull and Secre-mental and the committee Secretary of State Hull and Secre-tary of the State Hull and Secre-tary of State Hull and Secre-mental transfer of the State State State State State State affairs of this nation and Secretary of the Treasury Mor-genthau

names as me committee Secreary of State Bull and Secretary of War Stumoon the two Elder Statesmen of his administration and both with large experience and administration and both with large sentence in the subject.

It is now revealed by the Washington Bureau of the Associated Press that these gentlemen hold widelv varying views on the subject.

Morgenthau advocates nothing less than the total destruction of German as a modern industrial state Hull refuses to subscribe to this course and Stimson strongly opposit.

It is now that the subject in the subject of the subject

be quickly converted into weapons of war she will perforce keep the peac.

This is all that should be done A rigid enforcement of this policy will in the course of the next one or two gener ations breed a new conception of international morality in the German inmid conducing to the peac of the world and the immeasurable benefit of the German people themselves the control as a form of slaver, which there is negard this control as a form of slaver, which there would be privileged to get such comfort from the thought as they might the should not, however deter us from bewing to this line of action,

# The "Boys" Nuisance

The DOYS IVUISAINCE

The malicrouse musched and wanton destruction of proports by many boys in the Pointe area which has assumed almost enoderne proportions in recent months is getting to be an insufferable nuisance.

The dockets in any of the local police headquarters in the Pointe are sprinkled with long notations of Boys of lenses each week The police themselves are becoming exasperated become endurance and have made up their minds that if the fathers of these young pests cannot keep their offspring under control they will try her own hands at it in a more severe manner than law their own hands at it in a more severe manner than law their own hands at it in a more severe manner than law their own hands at it in a more severe manner than law their own hands at it in a more severe manner than law their own hands at it in a more severe manner than law their own hands and the law of the law

respectable parents against the possible severe disciplinary measures within the province of this court. This easy going and apparently unappreciated course is about to be abandoned several local police heads an It is some negligent father wakes up some morning and linds his unhopeful heir headed. When the police mangurate this some negligent father wakes up some morning and linds his unhopeful heir headed. When the police mangurate this change in treatment they will have the whole-hearted support of hundreds of citizens who wish for peace and protection and haven thad it.

In a single might one day recently nearly twenty electrication and haven thad it.

In a single might one day recently nearly twenty electrication and haven the districted high globes were deliberately broken by these young morons. This cost either the taxpayers or the Detroit Edwon company. Sile per globe But much of the offending is not as mild as this Scores of houses have been broken into and apobled usually by breaking the glass in doors or windows. Much of this work has been by boys 17:19 years old. It constitutes one of the strongest arguments for the proposed compulsory, military service after the war.

One of the milded diversions is to steal tomatoes from gardens not for food but to throw at passing automobiles.

One of the greatest menaces to the peace and safety of the community as the 14 or 16 years old boy who has been or mother and then turned loose in a car to enjoy himself on the highway. Such a youngater is a perpetual threat to the life and him of the walking or driving public.

This community justly prides itself on the good manners and public order which normally prevails but negligent fathers and mothers are directly destroying its former good reputation.

reputation

The juvenile delinquency which has become a nationwide problem deserves no growth in such a community as
foresse Pointe but that it has arrived here is apparent to all
who are even mildly informed on the drift here in recent
moretise.

COLD CATHODE LIGHTING Similar in appearance to fluorescent lighting, with the added virtues of instant starting and extra long life cold cathode lighting promises to have greatly increased use for interior illumination after the wa. Since the tubing can be bent to almost any concernable shape "made to order" lighting intelligence will offer un que decorative possibilities. Various colors and patterns will be waisble and the tubes will some be manufactured in

INFORMATION PILESS The electric business is extremely technical Knotty problems are continually populing up. When one of our engineers encounters a 564 question that he cant answer be unsuly fires it at the Research Department. The variety of subjects investigated is startling, For example "What will be the trend of the water level of the Detroit River in the near futures" Water level has an import nation bearing on the design of power plants. And the water level has an important bearing on the design of power plants and the water level has not income the probability of the pr
