

ADD THE SNAPSHOT TOOL ICON TO THE ADOBE TOOLBAR

If the Snapshot Toolbar is not present (picture of a camera), with a .pdf file open, right click anywhere on the toolbar as pictured. Click “More Tools...” at the bottom of the selection menu.

Using the scrollbar, scroll down to the bottom of the selection menu. Place a check mark in front of “Snapshot Tool” and then click the OK button. Look in the Adobe toolbar for the camera icon.
